Thread: [Audible books to mp3 ?](#)

War On Retail - January 3, 2017, 4:31 am

Anyone know of a working program I can use to convert audible files into mp3 so I can send my audio books to others without giving them my account info? I would also like to be able to save the books I already have to other devices so this will help with that as well. I have tried all the ones I found easily on google with no success.

poufpater - January 3, 2017, 5:26 am

nice idea, was thinking about that.

Am not an audible member but often download audio books from them off various places. maybe a sort of audio ripping tool ?

Like perhaps play the audio then take the output and route that into mic input then record it as Mp3. That would take quite a while though I imagine.

Audible gives you .aax's right?

Found this online: Aimersoft DRM Media Converter

You should give it a check.
