Thread: [Social-Avatar a Friendly Social Site :\)](#)

ThatOneManInBlack - January 3, 2017, 3:05 pm

Avatar Station - SANS
(social-avatar.net)

Social Avatar is a SANS site which is looking for community members and staff members. What does Sans stand for? Social Avatar Network Script of course!
now we are in need of active members so I may release more things!

To get it out of the way, almost all ranks are open, the possible ranks are:
Community Manager
Admin
Head Moderator
Forum/Asset Moderator
Artist

if you would like to apply please go here
social-avatar.net/Application.php

Pictures for those who dont trust ;)

i.gyazo.com/e0b4d4958482f27e43032a1e23a47e1c.png
just some of the pictures!!

cheers and I hope you enjoy! ??
also any bugs please tell me :)

have you registered already? if so please pm me your username and we can talk about that
application :)

RumbleFrog - January 4, 2017, 4:07 pm

Some improvement you can make that I noticed immediately as I was signing up:

- Registration - I registered, and it brings me to another page to register again with captcha...
- Make links into <a/> tags please
- Notice.php - Posted by is broken
- Invalid https resource - <https://www.tumuski.com/library/Nibbler/Nibbler.js>
- Async loading - Holy crap, please add this. With invalid TLS on Nibbler host, the load time is up to 25.36 seconds and I cannot do anything meanwhile.
- Form elements have no styling besides predefined browser user agent stylesheet.

- Some potential CSRF security holes.
