Duple glitches aren't exclusive to specific servers (usually) they're usually based on the minecraft version or sometimes the plugins the server uses. Most duple glitches would only be given away for serious money.

I'm almost positive this dupe has something to do with the plugins

Dupes can have to do with a plugin also or typically to plugins conflicting.

Duping what? Items or money? If it was a server that included money, there is an auction plugin that if not configured properly, allows you to just bring millions/billions into the game from just a few commands.

Can you give more info on this?
