Thread: [Shopify theme help me change headers please](#)

Tando - January 3, 2017, 5:31 pm

Right now my header for my featured collection is "Products" but it's plain black boring text. I want to get it to look like <http://www.bhcosmetics.com> the pink bubbles with white text in them. Can someone help me achieve this?

Thank you so much!

Rushax - January 3, 2017, 8:28 pm

I really 'dont' know what you're referring to, if you could point me out to what you mean I'm sure I could help.

I've searched the whole site and I see no pink bubbles with white text.

EDIT: It's 6.45am here, give me a break :P

I've searched the whole site and I see no pink bubbles with white text.

why would you need help if you already know?

Rushax - January 3, 2017, 10:58 pm

Right click and inspect the element and find out if it has any classes.

Once you find that edit your style CSS file through the EDIT HTML/CSS in the Shopify Dashboard.

Put the code

```
Code .button-class-from-inspecting-element{
  height: 38px;
  display: inline-block;
  border: 1px solid #db1892;
  padding: 0 20px;
  border-radius: 19px;
  font-size: 18px;
  white-space: nowrap;
  line-height: 38px;
  background: #db1892;
  font-size: 17px;
}
```
