Thanks for the vouch copy, I can vouch that this is a legit method.

Also not sure if you're able to infect a PDF but here's a VirusTotal scan:

You're selling a eBook for \$.15 why didn't you just send a pdf. I'm still giving out a warning to all HF members

I am selling it for 15¢ to attract early sales.

I quick uploaded the DOCX because I wanted to send the VC right away, I didn't notice it was the DOCX version, since I have it saved in my documents while the PDF version is in my downloads folder.

Please PM me, this is my first salestthread and would not like it to be trashed.

You can confirm with the other members previously that I have sent them the PDF version.

Even better, open the DOCX with sandboxies and see what processes come through, nothing. Please confirm your allegations.
