Thread: [Free CSGO Bhop Script *AHK* Giveaway!!](#)

AberrantHD - January 4, 2017, 12:03 pm

Decided to giveaway a nice little script that I coded for Bhoping.

Virus Total 0/54

Spoiler ([Click to View](#))

Download Here! (Made the .exe file into .ahk so you know it's safe)

Note

Since that the file is a compiled source from AHK you will not get VAC banned with this script since you are not injecting anything into the game. This is simply a macro / bind into a script.

It is a .exe but only because it's compiled from the AHK :) but enjoy@

REPORTING: I'm not sure why you would make an exe file instead of just keeping it a .ahk file. For this reason I have not tried it and will not unless others have reported it safe/in working order.

It's compiled from ahk so that's why its a .exe it helps to reduce skids taking the source and claiming it as their own :)

I know. But I like to read sources to learn ;)

Does it just spam the jump button?

Yes it does spam it, you would just hold the space bar. My script is human like so you wont be detected on untrusted. You can not get VAC either

AHK Scripts are always nice.(:

Very useful, thanks for this!
