Thread: [\[FREE SOFTWARE\] Bustabit Predictor - Simulate games of Bustabit and see if you WIN](#)

NonViolence - January 5, 2017, 1:55 am

BUSTABIT PREDICTOR

Hey guys I was tired of trying out bustabit settings only to loose all my bits..

So I made this software called bustabit predictor that will:

- Scrape x amount of game bust results from the last bustabit games.
- Simulate your settings on these games.

So basically this software will tell you:

"If you played using these settings on the last x amount of bustabit games then you would had won/lost x bits".

Also the program will tell you how many bits you will need to recover loss streaks.

Here is a video instruction on how to use bustabit predictor

[Video: <https://www.youtube.com/watch?v=yOGbWbS0Xcw>]

Mediafire Download Link

http://www.mediafire.com/file/7irbbgk5gc31m41/Bustabit_Predictor.zip

Virus Scan

[.ZIP file](#)

Result: 0 / 55

[.EXE file](#)

Result: 1 / 56

Spoiler ([Click to View](#))

The 1 detection is a false positive.

Virus Total scans the uploaded file with a lot of different antivirus products. Some of these product are good, some are great, but some are also poor.

This is the reason why some of these products will give a false positive without any reason.

I don't know why it got 1 detection but I can assure you that this file is 100% clean.

Well I have a lot of ideas for more features on this program but I decided to release this early beta version to HF for free.

My ideas for new features is:

- A lot of advanced settings to set in the simulator.
- A generator that will generate a custom sript based on your advanced settings.

What features do you want to see? And what do you think of this tool?

Enjoy!

hobble - January 5, 2017, 3:13 am

looks nice, i'm awaiting some vouches for this, because i gotta take precaution when download and trusting software like these.

knevlock - January 5, 2017, 3:44 am

Thank you very much, will try this out soon!

Looks very promising, especially the custom script part! I am currently playing by placing bets by hand, but if I could create a script for my tactics, that would be awesome!

Hope this works smoother then BaBSS :)

Priology - January 5, 2017, 6:29 am

were you hired by black shadow??

knevlock - January 5, 2017, 2:11 pm

Review:

Worked great, takes a bit long to load in the played games (multiple windows increase speed, but drain memory), but you can save them!

Works very fast once you have the # of games, almost instant result!

Would love to see some improvements (speed of game # import) and new functions (custom scripts)!

Frankey - January 5, 2017, 2:16 pm

Looks have been using the web version of this for a while. (Different creator, but same usage). I'll try this one tomorrow.

NonViolence - January 5, 2017, 2:31 pm

Thank you guys for trying out my program, I hope you like it :)

(Jan 5, 2017 03:11 PM)knevlock Wrote: [\[CITE\]](#) Review:

Would love to see some improvements (speed of game # import) and new functions (custom scripts)! Thank you for your review and kind words.

I'm working on the custom script generating function but I need to know which settings you guys wants to be able to set to generate a script from.

Also the game result scraping speed depends on how you put the "wait time before each page load" and the number of windows you open. I can't really make it faster than that.

20MDM - January 5, 2017, 4:02 pm

I was not able to simulate without putting .00 at the end of the Auto Cashout number. Cant wait to test out custom scripts.

(Jan 5, 2017 03:16 PM)Frankey Wrote: [\[CITE\]](#) Looks have been using the web version of this for a while. (Different creator, but same usage). I'll try this one tomorrow.

Can you try scripts with the web version that you speak of?

Nyxuo - January 5, 2017, 5:10 pm

<https://stenlan.github.io/BaBSS/> Is the website hes talking about I believe. You can input custom scripts. To a degree. I've had a few scripts just return 0 due to the nature of the script.

This program looks interesting. I'd like to see it when you can generate scripts from it and possibly

enter your own to see results using those.

Nice work and good share for free. Keep it up.

Invitation - January 5, 2017, 9:52 pm

thanks for the share, i'll take a look into it

Pain - January 5, 2017, 9:53 pm

Gamblers Fallacy.

I don't think these ever work tbh since it is completely random

vaiperboy - January 5, 2017, 11:26 pm

for the scarping part u can make it 1000x time faster by just downloading the page source using webclient n then parse it (to find the XXXXXx game number part) using htmlagilitypack, its quite easy

if u want, i can help u, just pm me for my skype :)

20MDM - January 6, 2017, 11:00 pm

Nice work and good share for free. Keep it up.

I'm getting different results with this program versus that site.

if u want, i can help u, just pm me for my skype :)lol you are right.. I'm not so good at coding yet, will do it with webclient in next version instead of this webbrowser shit xD

Thanks :)

(Jan 5, 2017 10:53 PM)PAIN Wrote: [\[CITE\]](#) Gamblers Fallacy.

I don't think these ever work tbh since it is completely randomYes ofc but if one script gives you -100k bits and another gives you +10k after running xxxxxx simulation games then you will know which one will you give you best results in practice even though it's random ;)

knevlock - January 11, 2017, 12:07 pm

Can't wait for the update :) Good work mate!

wit - January 11, 2017, 12:07 pm

someone get black shadow on the phone

MeltyNet - January 11, 2017, 12:09 pm

Honestly this is very useful to see if your going to profit with your strategy without losing any money!

Great idea OP.

gas66 - January 12, 2017, 1:33 am

I have no idea why anyone would waste their time on gambling on this shit... There is serious casinos online now who accept bitcoin as a currency and you can deposit and withdraw bitcoins and play real casino games as opposed to this bs.

leased - January 14, 2017, 12:54 pm

thank you for making this program, but I get an error trying to use it by clicking "run simulation" everytime:

" Consultez la fin de ce message pour plus de détails sur l'appel du débogage juste-à-temps (JIT) à la place de cette boîte de dialogue.

***** Débogage JIT *****

Pour activer le débogage juste-à-temps (JIT), le fichier de configuration pour cette application ou cet ordinateur (machine.config) doit avoir la valeur jitDebugging définie dans la section system.windows.forms.
L'application doit également être compilée avec le débogage activé.

Par exemple :

```
<configuration>  
  <system.windows.forms jitDebugging="true" />  
</configuration>
```

Lorsque le débogage juste-à-temps est activé, les exceptions non gérées seront envoyées au débogueur JIT inscrit sur l'ordinateur plutôt que d'être gérées par cette boîte de dialogue.

some french words because Windows is in french
what is wrong ? thank you

Wezaro - January 15, 2017, 3:13 pm

What is this bustabit? Bitcoin gamble?

wortel538 - May 15, 2017, 6:09 am

I think this program has some "Hidden Features":

Photo at i.imgur.com/YlkcVC6.png as I cannot send links yet.

Excuse me for the Dutch text.. :)

-Wortel538

OtakuMateTV - May 15, 2017, 7:35 am

Looks really interesting man!

PocketQuads - May 16, 2017, 3:55 am

I mean, though the scraping part in my opinion does not make a lot of sense anyways since you could just generate random data yourself, try adding .json to the game urls, so

<https://www.bustabit.com/game/xxxxxxx.json>

That should reduce the data amount and therefore also the time needed quite a lot.

Lucero - May 16, 2017, 2:01 pm

Youtube comment ranker? I used this but the program kept opening new chrome tabs, and now whenever i go to bustabit it gives me a white page with the text error when i hit f12 it gives me this: Failed to load resource: the server responded with a status of 429 (Too Many Requests) I think i got flagged for too many requests.

gardenpaws - June 27, 2019, 4:25 am

is there a new version out ?

mrvice18 - July 2, 2019, 4:33 am

Is this still updated and functional?

Psychedelic. - July 6, 2019, 3:01 pm

file is clean. very HQ. thanks

Wget - August 16, 2019, 12:26 am

Nice of you to release something like this for free. I'll have a look at it later and give a review.

crackingmonster - October 24, 2019, 1:58 pm

What to do if I receive this type exception when I start application: "The remote name could not be

resolved : 'accessgainer.com'. ?

Something to do with DNS resolver? How to fix this?

i7eChNiQ - *October 26, 2019, 8:25 am*

Thanks for this, i'll try on my future casino session

varveakshay - *August 16, 2020, 2:52 am*

any software for bc.game and roobet.com please need some software for this
