Thread: [Bitcoin rising/dropping threads threads threads](#)

Undefined - January 5, 2017, 9:36 am

Why do people make threads criticizing people who criticise the people who make threads to update others about the current Bitcoin price? Like if they criticize people posting threads about Bitcoin's exact price then that's fine, but there's no need to create threads criticizing people who post threads on people posting about large pumps and dumps.

You are that LQ that you have to copy and paste someone's thread

Nice

+1
