minimalist - January 5, 2017, 5:59 pm

I can see this become something successful, reserving my post for whenever your marketplace hits a million in transactions :p

Btw, may be a good idea to hyperlink the thread design to coinmall.io

Suspicion - January 5, 2017, 6:02 pm

Looks nice, all the best on launch :)

??e rando? d??c? g?y - January 5, 2017, 6:08 pm

I found a bug, When i want to edit a listing it wont let me edit it until i have uploaded something. Also cant add a picture after the listing has been added.

Blacnova - January 5, 2017, 6:09 pm

This seems like a great idea, nice job on your thread design as well.

Good luck!

Sell - January 5, 2017, 6:14 pm

Thanks everyone!

@Minimalist, hyperlinked the thread design :)

@the random dutch guy - thanks for signing up and listing a product, we have noted the bugs and will fix them ASAP

Tid?es - January 5, 2017, 6:14 pm

I'm really digging the design

MrArchive - January 6, 2017, 2:51 pm

Really clean design with a nice structure, I can tell you've put a lot of hard work and dedication into this. I wish you all the best in the future with your project.

findingnature - January 6, 2017, 2:53 pm

Yes because you putting those spooky fraud statistics really makes me want to join and spend money there...

Callmedragon - January 6, 2017, 8:37 pm

I definitely can see this growing into something big. Gonna check it out.

Wakka - January 6, 2017, 8:52 pm

This will not and cannot compete with rocketr. Good luck, never the less.

NYCVN - January 6, 2017, 8:58 pm

I'll be joining shortly, awesome concept.

xeezi - January 6, 2017, 10:54 pm

Sell - January 7, 2017, 1:52 am

Thanks everyone, feel free to sign up and take a look around.

We're currently working hard ironing out the last remaining kinks and adding many new features.

For more information on why CoinMall was created you can read our Press Release here:

<http://www.coindesk.com/press-releases/press-release-introducing-worlds-first-bitcoin-marketplace-digital-goods/>

Feel free to use this thread to request additional categories, features or to ask general questions.

MightyOne - January 7, 2017, 4:42 am

This sure looks like something that will skyrocket when its fully functioning!

Great job on the interface it trully feels like a dumb-proof site, everything is easy accessible and nice looking!

Lante - January 7, 2017, 1:54 pm

Goods currently being sold violate the Terms and Conditions of the site.

This is actually a very practical idea that could absolutely take off.

Do you allow account generators? Also add Canadian Dollars as currency and I might consider using it.

Code messages.listing_not_found

Back to this thread, but maintenance is being done. Dang it.

SIM-2223238 - January 8, 2017, 11:04 pm

The statistics are misleading, they're not telling everything. Most of the fraud isn't even directly related to buying and selling, yet you put these statistics in your thread without giving any real information of sources. I don't get how you pulled the number 108 out of 1000 out of your ass.

(Jan 7, 2017 03:18 PM)James! Wrote: [\[CITE\]](#) This [press release](#) calls you the worlds first bitcoin marketplace for digital goods but you're not. I have seen many of them in my time and people selling scripts to run your own - in fact, I even tried selling digital goods on a bitcoin marketplace for digital goods before. Just thought I'd put this out there.

I'm not accusing you directly of claiming you're the worlds first, I just wanted to address the issue I was having.

The site looks really nice and I wish you the best of luck. I'm also pretty happy I got the username James. I also snagged the following stores; James, Minecraft, CSGO, Steam, Account, Code, Key, Money, Social, Media and 1.

I also noticed a grammar error on your delete store popup - the "i" should be capitalised - <http://prntscr.com/dsrzqn>

I'm also able to follow myself which I believe may be an error.

There is no way to change my profile picture, AFAIK.

Also, can you add a favicon on your homepage, please - it's for bookmarking purposes as I don't like to have names in my bookmarks, if you don't believe me or want to see all my nameless bookmarks then PM me an you'll see what I mean.

never seen such scripts before. if you have then pm me the links

OT: Marketplace looks sick OP, great job.

Sell - January 9, 2017, 6:57 am

Apologies for the downtime, maintenance will end in approximately three hours from now.

Nyxuo - January 9, 2017, 9:40 am

Maintenance went from 6 hours to 2 minutes back to 6 hours but definitely has been over 6 hours. Was hoping to check it out.

Mr. Corleone - January 9, 2017, 12:17 pm

Really looks nice. Design looks awesome, and so does the name.

Good luck.

y-y-youtoo - January 9, 2017, 4:16 pm

This actually looks very interesting. I'll go check it out. Thanks for sharing.

McDolands - January 10, 2017, 1:52 pm

I'd really love to use this however I highly doubt I will get any sales on my products on your site with it being new.

Sell - January 10, 2017, 4:42 pm

Hi guys,

Apologies for the temporary downtime. Since our launch we have been working extremely hard on improving CoinMall. Our first improvement to the marketplace has come today, and we are happy to announce that, while in beta, we are offering a 0% processing fee.

We'll regularly be posting updates on new features while they roll out, so feel free to subscribe to this thread.

Eagerkid - January 11, 2017, 3:05 pm

I dont see many products I would be interested in buying but I will certainly check it out later if more people post things

Basti - January 11, 2017, 4:10 pm

Will definitely be checking this site out!

Noisy - January 12, 2017, 9:52 pm

Seems like quite a nice site and idea, The layout is pretty simple and nice Good luck with it all.

Hoody - January 13, 2017, 3:28 pm

I feel like this kind of site is going to get shut down, especially since its on the clear net

Sell - January 14, 2017, 5:51 am

Did you know that you can promote your listings for free until tomorrow (15-01)?

Sign up now and start selling!

Fresh Khalifa - January 16, 2017, 5:30 am

Looks like a really great website. I appreciate you making/sharing this. I'm defiantly going to start using it.

Sell - January 17, 2017, 5:55 am

Many new features being introduced this week which will help new sellers start listing their products. Make sure to sign up in advance!

@Jupiter - January 17, 2017, 6:00 am

You need to fix them thumbnails. They look bad ugly since they're forced to be a certain size haha

Loyds Bank - January 17, 2017, 8:19 pm

I really need something like this will join for sure.

SIM-1073426 - January 17, 2017, 11:27 pm

It actually looks pretty nice, good job on this.

FamousHater - January 17, 2017, 11:30 pm

thought was a good itunes seller on there until noticed hes selling more than the card value lol

Dgk95 - January 18, 2017, 12:11 pm

Love the idea and site... However I think it should be coded in php, also it isn't very warming its kinda dull and looks as if it was coded overnight. There isn't a slogan or anything and when the page load the menu isn't centered its to far left.

Woodsboro - January 19, 2017, 4:55 am

Very interested used purse.io but they Scamed me once but it but will Not Happen again

Matt Bomer™ - January 20, 2017, 2:40 am

If this gets a good SEO, I am sure you'd go miles further.

All the best.

Mathik - January 20, 2017, 12:09 pm

A great service its like eBay but with bitcoin for purchases available, I haven't signed up yet but I'm wondering if anyone can become a seller there or what are the requirements.

Good luck with this project, all the best.

Wre©ked - January 20, 2017, 12:12 pm

Looks pretty cool a suggestion I would have is having the conversion from BTC to USD automatically displayed under the BTC price

SIM-74411 - January 21, 2017, 11:23 am

Looks awesome, good luck with it.

severos - January 21, 2017, 8:48 pm

It's a nice idea, however I see there hasn't been a single item sold? I really suggest putting more effort into listing more products and getting some sales, otherwise I don't see anyone using it in the long run.

waruout - January 22, 2017, 9:22 pm

I'm digging this sick design bro

Grifty McGrift - January 24, 2017, 6:02 am

I was going to signup but I didn't really see anyone getting sales pm me and I think I can help you if you will help me aswell.

x64 - January 24, 2017, 6:08 am

Someone can just submit for example a non-legit league account and get BTC for it?

GodRyuk - January 25, 2017, 1:34 am

Check The Name - January 25, 2017, 4:27 pm

Nice.

I'll keep my eye out on this one.

This.

I suggest that you make a verification process similar to what PlayerAuctions has. It could help combat these kind of problems.

pronunsiation - January 26, 2017, 3:26 am

is it possible to buy bitcoins there?

Excalibur - January 26, 2017, 3:28 am

Oh, so it's sorta like ebay for bitcoins? or something like that?

Sell - January 26, 2017, 9:37 am

(Jan 26, 2017 04:28 AM)Excalibur Wrote: [\[CITE\]](#) Oh, so it's sorta like ebay for bitcoins? or something like that?

That's correct, it's a marketplace like eBay for any digital product or service with the only payment option being Bitcoin.

We're currently rolling out a lot of new features and bug fixes. Keep an eye out on the site or this thread, an announcement with all the improvements will follow shortly :)

ÇdnîS Lu?i? - January 26, 2017, 5:56 pm

If you were to sell physical goods legally, i think you would have a better success rate. Anywho it's a great design but selling accounts and other Black/Grey hat stuff isn't a great idea IMO. Good luck!

I also think so.

you should also provide services like freelancer sites like fiverr and all to make it go up more !

This seems something very similar to <http://www.Purse.io>, even though yours is digital goods. I think the idea is fucking awesome I'd love to make something similar to this.

??e rando? d??c? g?y - February 5, 2017, 1:55 pm

To bad noone is buying anything on the website. Been trying to find something with a sale but i failed. Also there are still bugs wich i already posted before.

We have had 14000 unique visits, ~400 sign ups and 88 different products listed.
Lots of work has been done this month, such as finalizing our localization infrastructure as well as crucial back-end payment processing code.

For more statistics, feature implementations, code changes and our focus for the coming month, feel free to [visit our blog post here](#).

Kind regards,

Not yet. We're working on one as we speak and estimate it will be rolled out in the next two weeks.

VRUMM - February 8, 2017, 10:30 am

Lol this is just like bitcointalk style. Create username under service's name and post a thread. Then buy a lot of ads. Poor execution though. Should work on perfecting the product before spending money advertising. I assume you guys spent around around \$2k advertising already.
