Use what to make money?
Elaborate please

Are you are meaning you're an ewhore and you're looking to get into cpa?

Thanks for doing that, Rod\$. I will be following that thread and maybe be asking you some questions. I am new to CPA.

Thank you!

Yes sure, please tell me what area of CPA you would like to get into

adult, mobile games, mobile app installs, gambling, bizzops, sweepstakes/pinsubmits

Ideally tell me what you're good and bad at on the internet and ill be able to point you in a better direction rather than just suggesting a vertical

a vertical in CPA refers to what area of cost per action you are promoting. E.g the list above (adult, mobile games, mobile app installs, gambling, bizzops, sweepstakes/pinsubmits, skin care, diet pills, brain enhancement pills, dick pills etc etc etc)

Bizzops, dating, brain pills are all ever green niches that are doing volume at the moment

also the offer tactical flash light has been killing it on most networks for months
check it out on offervault if you havent heard of it

what are the best traffic sources for someone who hasn't even started CPA yet. I have the funds to make my own site and set it up with content lockers etc but where do you think the best traffic sources generate from?. And also for someone who's looking to get accepted in a CPA network

such as, OGads. In the section where you have to put where you're going to get to your traffic from what should I put, I haven't started my journey yet or have a steady stream of traffic. But I would like to get accepted as it's a start, then move off from that. But it seems hard to do so if you haven't set anything up yet. Any tips would help me in the long run thanks.

aismen - January 6, 2017, 3:29 pm

Hi Rod\$, I work with Ogads and adworkmedia but I do not have a good success yet.. At the moment I have 2 landing pages with hack niches made by me and I promote them with youtube. I managed to ranked one of the videos on the first page for the main keyword but my conversions are not stable. For example, yesterday I made 6\$ with 64 clicks and 11 conversions and today I have 80 clicks and 0 conversions.. I really dont know why. I also had days with 20\$/day but very rare. I tried in the past instagram method with massplanner but without success. I spent a lot of money in investments but I had not a real success yet.. I would be very pleased if you give me some tips.. I also tried to promote dating offers but I dont know what traffic sources to choose to have a good conversion. I'm tired of losing money for nothing.

For ogads just be honest, make sure you mention you are motivated and have a plan and they will accept you, as for sources you need to pick one and stick to it, every source is different and you have to learn is and get good with it. Too many newbies jump around, gotta focus 100% on 1 source, 1 niche until its golden

yeah if you can setup landing pages why not make some for a few niches and start sending traffic to them? also do a lot of spying on what others are doing usually you can rip their stuff, duplicate it, change variations on it and split test them to increase any ROI (return on investments)

sources you could start with

instagram

facebook

snapchat

if you want to get into the media buying scene you would need a budget, media buying simply means buying your traffic, for example buying pop traffic and sending it to a pin submit or email submit offer but you need a budget to test and optimize your campaigns into the green \$1k+ id recommend atleast for paid traffic, fb is a little different you can start with a good amount less

thoughts?

(Jan 6, 2017 03:25 PM)Ben??? Wrote: [\[CITE\]](#) For someone who is looking to get into IG, what bot would you recommend and how many accounts?

massplanner.com/instagram-poster

buy ur own £10 phone, and £1 sims from those corner shops

buy aged accounts 6 months+ will cost around \$2-3

proxies <http://actproxy.com/> is fine for a starter

i dunno what youd want to be targeting but youd need to pick a niche or whatever you're trying to moentise and then build 3-5 accounts A/B testing different angles in that niche

for example

basic niche

free iphone

free ipad

free mac

free samgsung

free tv

these are called angles, the way you present your ad and what it is, test these so you can find which ones are profiting, use sub ID's on your network

most likely if you run enough traffic to them you will see a clear winner, you then dump the other 4 and run the winning one, while scaling more accounts to that

thoughts?

you cant go day by day, record and look at data over a week or 10 days, traffic is just bad some days

dating offers you could promote it via snapchat, what you do is build a female snapchat, start posting/spreading her name on the internet, you'll snapchat will start to get adds, you will post pics of girls and links to dating offers on the snapchats story, your accounts can easily be built up to 2/3/4/5/6/7k if you put in atleast 3/4/5 hours a day depending on your skills, providing you dont have

much skills with coding automation boths to spread the female snap name instead anyway 1000s of guys will see the link to the dating offer, people will click thu when they see and inage with a link saying "See my nude photos on xxx.com ;)"

this can easily make you \$20-50 with medium effort

\$100+ with good effort, time

\$200+ full time

iv made over \$30k with this exact method a while ago, snapchat is only growing these days its still profitable

hints:

use casper for android to post pics to story on snapchat

use phantom for IOS Requires jailbroken device

buy whoIS on domain

URL forward to your dating/webcam offer from your own .com domian

Thanks for the advice I'll make a few variables of niches and do some trial and error with the traffic source see what's most successful and stick at that one until it's expanded into something big. Then after a few months stick with the niche which generates the most income and focus and advertising it some more.

First time here had an idea and wanted to get your thought on it.

I am signed up with AWM as well as OG ads I have made about \$30 with CPA on AWM and \$0 on OG ads (Not much), i have seen the Mobile Rewards offer OG ads offer to there users and it has inspired a idea in my brain, the idea being.

To set up a website, where people complete surveys for points what they exchange for - Giftcards/Cash

i will be setting the pointing and rewarding system so that i always make the most, but i wanted some help on.

- Where should i get the lockers from. OG ads only shows US offers and \$ i will mainly be targeting UK people

- I need to know how much each offer is exactly, so i know how many points to offer for it.

Im sure people already try this but in my head i see this as me dropshipping surveys, i know it sounds mad

let me know what you think, please get back to me.

The offer survey locker points thing is popular on youtube comments at the moment if you go to some of the more popular videos on youtube you will be able to find fake top comments saying "gifts for my subs" you could use their landing pages if you can find some

but really i would go for a better niche, that niche is pretty saturated which doesn't mean it's bad it means people are making money at it! but it also means you have to compete with the better people, go into a niche with lower competition so you will have a much faster progress to earnings ogads is alright but there is defo better things to do, email submits/zip submits on cpagrip can work well, ask your AM Account Manager for the top zip offer/email submit offers

then create/rip/buy a landing page around that offer and create 3 angles, maybe its

"win \$500 grocery shopping gift cards" Email submit SOI \$1.60

Now you would create 3 landing pages before the user gets to the offer page

maybe the 3 landing pages would be styled:

Emotion Aspect, hit these guys emotions, emotions are powerful feelings you can target in CPA marketing, people are on food stamps and shit in the US

1:

"Are you and your family struggling with the food bill every week? "

[info text on how this voucher could save them lots of money and let the family spend it on better shoes and clothes for their kids]

2:

"The price of fruit and veg has risen over 30% in the last year, 2017 is the time to start saving! Enter your email for a chance to win a \$500 grocery voucher"

[this is a social data/stat aspect, most people believe statistics they read on the internet]

3:

"Ever wondered how other families are doing their weekly food shops for so cheap?"

ask them retorial questions, it makes the user think and click

anyway

you get the idea im sure

let me know if you want me to clear anything up

obviously you would need to get traffic after you created these angle'd landing pages

so you could setup 5 instagrams for example and start following that like pictures on your target pages

e.g

jerry springer USA IG page

the users that likes the photos on there

good chance they are poor and would do with free \$500 giftcard
you follow them
they get a notification
they checkout your profile
they click your link
and you hope 1/3 of your landing page angles will hit their emotions and they will ultimately take action (cost per action)

goodluck

Cover every aspect of it, you cant just rank with buying video views, and dont be cheap you gotta send a lot of the following to get ranked big time

- views
- likes
- comments
- social shares

and i dont mean a 10-50 of each, send 500+ of each and you should get ranked pretty nicely, it'll cost a fair bit but once ranked the video stays there earning auto pilot

well it depends what you are trying to monetise

if you want to just spam og ads then you would buy aged accounts

if you want to do a different approach such getting into a passion niche, for example

buy stat about cats cute cat pics, have shopify store in bio to cat products, this is a basic and broad example but there is the volume for it

keep in mind youd want to get your posts from your stat into the explore page to keep getting constant free traffic to your shopify

(Jan 7, 2017 01:52 PM)Rob H Wrote: [\[CITE\]](#) Is spamming IG accounts a good way to start CPA? Where can I buy accounts?

i got a guy that sells them for \$3 each 6 months aged can hook you 2 up, and yea it can be if you have an effective niche and test properly, if you havent done it before it would probably require a fair budget for fuck ups and errors, maybe \$200 would be good, \$18 server \$16 mp proxies accounts domain hosting for landers if u self host

its pretty fierce i doing ig spam if you dont know how to do it properly can get banned and loose accounts with silly mistakes but if you are determined to dedicated a month or two learning ig and mp then go for it, people are banking on ig atm it has 550m people if you can find the right sources of accounts to follow their users and a good nice can 100% be profitable, key is to test many niches at once, 3,4,5 and youll soon see which are working, you can then cut the bad ones and scale the good ones

thoughts questions?

aismen - January 7, 2017, 2:39 pm

what settings you recommend for massplanner ? follow/day and unfollow/day after you've followed too many people. Do you recommend to use different descriptions at instagram accounts if i use same niches to be safe? I also have a adult site and I do not know how to promote it to monetize it afterwards.. I have used in the past "ero-advertising" to promote adult cpa offers and I saw those that sell traffic (publishers) earn pretty good. I do not necessarily want to promote adult cpa.. for starters I'd like to try cpm,cpc banners.. I really thank you that you have proposed to help everyone with some tips. People like you rarely find. Respect.

Hey. Thanks for the thread so far. Genuinely really good advice given out. Wondering if you have any tips for getting accepted into MaxBounty or what other CPA sites you'd recommend. Currently

on OGads for IG stuff but looking to try something else. Also I don't currently have access to my mobile phone, nor the home phone. Would that be an issue in terms of being accepted in case they call me or?

Would also like to know where to get started with adult cpa. Always been curious about that kind of thing and how it would work out but no idea what to do or where to get started so any pointers would be appreciated. I have money for investments, etc.

Have you ever been so tired that you almost gave up?

Coon and Friends - January 7, 2017, 6:14 pm

I've been waiting for you specifically to do this.

I'm planning to start IG with CPA/PPD, but I have a few questions:

1. Buying aged accounts, how do I make sure accounts don't get banned as soon as I log in, even when using a unique proxy per account. Is there a deviceid they track?
2. Do I need to cloak my sites when posting on IG?
3. I plan to use massplanner - should I post to all social networks possible? (FB, Twitter, IG, Linkedin (if applicable), Pinterest)

if you want to just spam og ads then you would buy aged accounts
if you want to do a different approach such getting into a passion niche, for example
buy stat about cats cute cat pics, have shopify store in bio to cat products, this is a basic and broad example but there is the volume for it
keep in mind youd want to get your posts from your stat into the explore page to keep getting constant free traffic to your shopify

Question/s: So I love the whole Instagram platform. It is mobile friendly, very easy to use and finding niches is also easy. BUT there is major competition! I have always wanted to be independent through making money via the internet. But I always stall. I probably received \$3 in 1 day at most via PPI on botting Instagram accounts. But I would much rather it be legit so there isn't any chance of me getting banned..

Basically what I am asking is what are the advised niches to focus CPA with & how would you promote on Instagram what is the best way? I want your opinion on this as I have seen many but some people just do not seem to have the experience.

(Jan 7, 2017 03:39 PM)aismen Wrote: [\[CITE\]](#) what settings you recommend for massplanner ? follow/day and unfollow/day after you've followed too many people. Do you recommend to use different descriptions at instagram accounts if i use same niches to be safe? I also have a adult site and I do not know how to promote it to monetize it afterwards.. I have used in the past "ero-advertising" to promote adult cpa offers and I saw those that sell traffic (publishers) earn pretty good. I do not necessarily want to promote adult cpa.. for starters I'd like to try cpm,cpc banners.. I really thank you that you have proposed to help everyone with some tips. People like you rarely find. Respect.

ill answer the ig stuff first

aged accounts are good for 300-600 a day, im usually safer with IG than most they can do alot more, anyway you cant follow hard every day, you gotta do it in breaks, for example mon tue wed follow, rest day, friday sat sun unfollow, you get me, as for links in your bios that defo increases the risks of bans, especially on newer accounts, for aged it should work better but avoid direct linking to any cpa offers, use self hosting landing and a bloggerscript javascript url redirect, this is essentially a cloaker which will mean ig wont be able to follow your stuff as easily, make every account unique, ig is fb and fb is smart, you can never be too careful, dont take any risks if you want to stay long term with ig, i use 1 sim/1 proxie/1 6 months aged acc each operation i run, some people oad 2-3 accs on proxies and sims which is pretty safe but rather pay a bit more and be safe than sorry.

as for adult what sort of site do you own, is a tube site you've setup, doing traffic exchanges with other smaller tube sites? or what, try exoclick if you are looking to have banners/popups on your site to monetise it they offer good rates, you could also try and monetise your self with cpa offers, your own banners to your landing page>cpa offer, even try some rev share, depends on the niche of your adult site anyway, say its bdsm then join kink.com affiliate program and promote those offers to your bdsm viewers.

hope this helps

questions/thoughts?

(Jan 7, 2017 06:46 PM)jordan0159 Wrote: [\[CITE\]](#) Hey. Thanks for the thread so far. Genuinely really good advice given out. Wondering if you have any tips for getting accepted into MaxBounty or what other CPA sites you'd recommend. Currently on OGads for IG stuff but looking to try something else. Also I don't currently have access to my mobile phone, nor the home phone. Would that be an issue in terms of being accepted in case they call me or?

Would also like to know where to get started with adult cpa. Always been curious about that kind of thing and how it would work out but no idea what to do or where to get started so any pointers would be appreciated. I have money for investments, etc.

right

as for maxbounty if you want to get in they pretty want want to phone you on the mobile and speak so if you will need a mobile or you can ask to do a skype call, not sure if you need to be over 18 if thats an issue shoulnt think so

just explain that you are new but you are getting help from a friend and are extremely motived, say you have lots of free time to spend on setting up landing pages and sending traffic, sound motivated like you have a fire in your stomach!

adult cpa is 2 ways really, go with spam/targeted type offer promote, or you buy traffic to your adult offer

for a newbie its best to start out with spam type adult cpa'ing, as for media buying you will need a much bigger budget to buy traffic, hosting, tracking tools, cash flow etc etc

for spam you wil need to find a source of traffic, ideally a place you can hoard males and they will

see your stuff, not so regulated, websites/apps with profiles that people can follow you think big and small social networks, dont always go for the main ones as they have much more regulations there are many iphone/android apps fo dating that are filled with horny men looking to fuck, you want to come up with an angle for them to go to your link,
for example

female profile: wanna see my nudes? go here (links to mobile content locker or maybe dating sex type offer soi signup \$1-3 per lead

female profile: im on cam here, come watch ;) (links to a webcam cpa offer, soi again, soi means single opt in, name email password usually, again \$1-2-3 per signps

now lets flip this on its head

why not have a male profile on the site,
"wow this site has loads of local sluts ready to fuck i just got laid lol, the site was link.com"

reversing methods around from another angle can work wonderfull as everyone targets the conventional ways

this may sound like "wtf people arent that stupid, but believe me there are 100s of millions of men 20-60 on mobile devices that don't have awareness to the internet, you've used the internet more tan 95% fo people in the world most liekly depending on your age, for most people esepcaully the growing middle-upper age category of men 40-50-60 ttthey can be targeted !

hope this helps sorry for grammar errors iv got a lot to get thru and i type fast

shit i cicked back and lost a solid q1 answer ill do it again in brief

1; youll get a email info when u buy aged, when u login to ig thru a tool like massplanner ig will ask

to verify ur acc from suspicoud activity, login to ur email and put in the code they send you, also swap out the pre set number with ur own sim card, i use real uk sims with a cheap £\$ mobile, means 2 ways im connected to the account

2; u cant direct link a cpa offer, if its known to be banned your account will probably be banned, use a landing page for sure, with your own hosting and domain, if you still have problems setup blogger.com, edit the blogger url, find a blogger javascript url redirect on google top result, put it into ur blogger html code and that will mask the end destination for ig to see for free!

3; i would target down to 1 and master it, instagram is hot right now, fb groups are solid if you can work with them on masspalnner, pick what you know and are best at that and stick to it, jumping around will just slow ur success

4;depends what ur product u want to promote, if its straight spam then id post follow nfollow on accs for a week to warm them up then put links in gradually and start going, following count doesnt matter too much if its straight spam

if its for something else like car/cat/t shirts then a few k atleast 10k+ would look better you want yo get ur posts into the explore section of ig to get lots of free traffic

5; yes pm me with ttle account supplier

yeah dude instagram straight spam with og did my head in a year ago wen i tried it its a pain in the ass until you know how to do it perfectly

but you gotta stick at one thing and now give up thats newbies number 1 mistake, how can you ever get good at something if you dont put time and effort into it for extended periods with many fails, you have to be prepare for weeks and months in this game if you wanna get to the top and stay there, sure people get into cpa for a few weeks and post a braggint thread doing \$500/day with cpa!!! 1 week later their shit dies out and they cant do it again, you have to build up a skill set in this game to consisidently win, small large moneterly gains arent gonna be good in the long run, you have to play the long game in cpa to win permentaly

what do you like?

maybe lik you photography, so you setup 5 instagram photos doing photography, they are all following from 5 sources of other active accs in same niche, you produce HQ content, accounts start to build over time, now you have the data so say..well hmm accounts 1,2,3 did 50% better than 4,5, what did i do right, what did i do wrong, what sources were good and bad, now close what the good aspects were toy our other 2 that were bad, over time accounts will growly nicely solong as you have aged accounts and can follow lots of people a day, once accounts are big enough you can traffic share between them all and build them up faster together, also do shoutouts with other accounts and since you hve 5 instead of 1 account like most, you can do the same shoutout with the 1 guy a good few times.

now you need to monetise this, iv never done photography niche on instagram but off the top off my head, you could sell artwork with shopify, you could promote amateur artist for a price, you sell shoutouts, bigger thinking shoutouts/promos for larger organzations and companies thats where the bigger money will come

anyway this is all hypothetical and just an example, find what you love and are passionate about, dont do someniche that is a chore, do something because love it and the money will follow it

(Jan 8, 2017 11:06 PM)Larceny Wrote: [\[CITE\]](#) May I ask why the throwaway phone/sim cards are necessary? How do I utilize them and the proxies?I'll answer that one for the sake of speed. The throwaway phone/sim cards are to phone verify the accounts. You can only have a certain number of accounts verified per phone number - the actual verification is necessary once it gets flagged up and you won't be able to run anything on the account or even log in until it's done. You'll be prompted when you need to verify.

The proxies let you run the accounts from different IP's when you're using a bot. I used to stick to 3 accounts per proxy to be on the safe side. If you don't all your accounts will be connected by the same IP and will just be flagged up and mass banned. Hope that's a sufficient answer.

Dismiss binary trading than lol your mistake..

if you wanna get into shopify, startby watching lots of youtube videos there is some amazing content out there that shows you how to setup shopify with fb ads from 0-100, after that you will need to learn FB ads and pixel, again lots og great content out there on youtube, after this join a bunch of shopify help groups on facebook, loads of questions and answers in here filled with gold tips and tricks, after this you will need to actually take action rather than sitting and watching (hardest part)

you will need to setup a shopify store, pick a niche, the niche doesnt matter just make sure its something you like, 1.8b people on fb, literally people pushing \$10k a day selling cat socks, like wtf CAT socks who buys them? well millions of people do.. same goes for fountain pens, iv seen people doing \$5-10k revenue days with fountain pens, you need to learn custom audiences with facebook to bring in the real revenue, this is where the pixel comes into play, a pixel is basically a tracker on customers, you can track your previous customers and REMARKET to them and build CUSTOM AUDIENCES which essentially means facebook will take the data you give them usually an email list and find people similar to them! how amazing is that!!

instagram stats sorry forgot to mention, shoutouts, those official type shoutout websites you can defo get much higher prices as its more businesses that go on the, dont sell shoutouts via hf as people just low ball you

hope some of this helps
take action dont just read it and close the tab save it make it into a task list,
download evernote.com and keep organized, make task lists before u go to bed so u dont just wake up everyday check facebook, watch youtube videos, scroll hf and piss around, make a task list, drink some coffee/redbull/gfuel whatever and get going dont burn yourself out, 3,4,5 hours of real work a day is enough to start with but obviously work hard and get shit done

(Jan 8, 2017 10:30 PM)jordan0159 Wrote: [\[CITE\]](#) Thanks for the reply, really love the idea of flipping the angle its head actually. Thought that was really damn smart. Thanks for all your time.

media buying is great for sure, newbies often start with pop up pop under and redirect traffic, bascially they are what the name suggest, pop ups, pop unders behind ur tab and redirect means when someone types in a domain like fcebook.com whoever owns that might have redirects on it selling it to a big traffic exchange which you would pay per redirect

with this type of traffic sources you can do things like sweepstakes and pin submits, meaning you could do a change to win a free iphone or imac, with most traffic sources you can target device id etc etc so you could target an iphone 5-5s for example and then call them out on your landing page "are you sick of having a old iphone 5, is it slow?"
"are you embarrassed with your iphone 5? would you like a chance to win a brand new iphone 7, enter your email here"

target peoples emotions, and social, we live ina culture where people anxiety is through the roof, if you can make people feel embarrassed you can defo get people to convert on that aspect anyway i hope you get what im trying to say

as for actually buying media you should start off with

zeropark.com

you need proper tracking so you can track which traffic sources within the traffic source is getting you leads, these traffic sources work on a basis of you can buy RON traffic, bascially meaning run of

network, meaning you get traffic from loads of different sites that are selling traffic to zeropark maybe you spend \$50 and you get 50k pop ups to your landing page across 35 different sources, but 56% conversions come from 15 of the sources, so this is where you optimize by cutting the bad placements/sites

now you will need a proper tracking solution for this shit, you can actually track conversions and which placement/site is giving you them!

a good tracking system i use is voluum.com they are \$99 a month, you also need a vps which i use liquidweb.com i believe which is about \$60, load time needs to be under 1s on your landing pages ideally 200-300ms other wise people just click off and you loose popups youre paying for! people are impatient in a world of super fast internet and phones

thanks for being respectful in the way you ask questions, hope this helps

Not a bad site, did you make that yourself?

you need a bigger CTA (call to action) the button you want the user to click
you have a nice one on the front page but thats not where they will get the account

they go here <http://www.minecounts.com/almost-there/>

this is where they get the account

this needs to be nice and brief, bullet points if possible, and a big CTA nice like the first one or even have everything on 1 page why have 2, people skim read

also social proof, have reviews at the bottom or somewhere,

sally menson 2 mins ago
wow omg thanks so much

jake andrew 5 mins ago
my brothers been wanting one for ages

also have a count down aspect, (urgency)
29 accounts left today!
(ticks down to 28, 27 while user is on site)

also have a bit say 342 people are viewing this site right now a live counter if possible obviously fake
make it in line to how many accounts you have left

check ur landing page speed too, google website speed test and make sure it loads under 1s

its nice tho, if you can split test different variations of the same page so have like
minecounts.com/1/claim
minecounts.com/2/claim
etc

and change different things on each
make sure you have different sub IDs for each url so you can see which one is performing better,

you cant just test 1 thing at a time or youll be here for ever
google A/B testing if you require a better understanding on this topic

hope this helps

well you buy an aged account

What would you recommend as a starting point to make money with CPA?

That budget prob be cutting it a bit close to do massplanner as your need accounts proxies server etc

you could try some simple spamming, mobile apps, websites, non mainstream site, lots of sites out there, snog.fm for example pretty much all uk 14-25 year olds, what do they like? free stuff, hacks, dating offers

what are you good at, what do you like let me know and ill point you in a direction of a place you could monetise and an angle you could do

(Jan 9, 2017 07:54 AM)aismen Wrote: [\[CITE\]](#) Thanks for the reply. One more thing if you do not mind.. My adult site doesn't look so good because I did not buy a premium theme and I saw that these are very expensive. Where can I find some premium nulled themes that look good? I also saw a kind of script that post videos on other sites or something like that. it is possible? Currently I do not have much traffic and I really do not know how I could promote it (free traffic or paid traffic). I am absolutely new in the adult niche and I'd like to try.

this niche is hard to get into youre competing against guys that have ran tube sites since they first even came onto the scene in the last 1990s haha

but you need to pay for a proper scripts dont get nulled shit you wont get updates or support

itll take months to build up the site, you need to post revelent content in revelent places on the internet, porn comments, upload videos with ur watermarked site in the niche of you site, you have to make a niche based site, big boobs, big boobs milk, ebony chicks, old granny, big dick etc

go on a forum called gfy

google it and youll find it means go fuck yourself its for adult webmasters you can read and learn alot here, i cant help too much on this topic as i only did it briefly im more into adult dating than tube sites, but you will have to stick at this for months and months, failing all along the way before you see some good progress, have a think anyway and browse around gfy, reach out to some of the nicer members get them on skype and ask them the odd question from time to time, dont be annoying and dont seem like you only want to speak to them to get info as in, how was ur day, good, got much planned, oh how do i do this, just ask them straight up and be honest they dont like to fuck around be polite and give them value back whenever possible

if you wanna get into shopify, start by watching lots of youtube videos there is some amazing content out there that shows you how to setup shopify with fb ads from 0-100, after that you will need to learn FB ads and pixel, again lots of great content out there on youtube, after this join a bunch of shopify help groups on facebook, loads of questions and answers in here filled with gold tips and tricks, after this you will need to actually take action rather than sitting and watching (hardest part)

you will need to setup a shopify store, pick a niche, the niche doesn't matter just make sure it's something you like, 1.8b people on fb, literally people pushing \$10k a day selling cat socks, like wtf CAT socks who buys them? well millions of people do.. same goes for fountain pens, i've seen people doing \$5-10k revenue days with fountain pens, you need to learn custom audiences with facebook to bring in the real revenue, this is where the pixel comes into play, a pixel is basically a tracker on customers, you can track your previous customers and REMARKET to them and build CUSTOM AUDIENCES which essentially means facebook will take the data you give them usually an email list and find people similar to them! how amazing is that!!

instagram stats sorry forgot to mention, shoutouts, those official type shoutout websites you can defo get much higher prices as it's more businesses that go on there, don't sell shoutouts via hf as people just low ball you

hope some of this helps

take action don't just read it and close the tab save it make it into a task list, download evernote.com and keep organized, make task lists before u go to bed so u don't just wake up everyday check facebook, watch youtube videos, scroll hf and piss around, make a task list, drink some coffee/redbull/gfuel whatever and get going don't burn yourself out, 3,4,5 hours of real work a day is enough to start with but obviously work hard and get shit done

I think I didn't formulate the question right and you misunderstood me.

sorry about that, np

so why not put your URLs in your instagram bio? it sounds simple if you haven't done this maybe i'm not understanding the question fully

then when you want to drive traffic put up posts on instagram for say 3 hours on peak times, for example special deal on my trainers, link in bio!
remove post after 3 hours so it doesnt make ur ig look lq

same deal with affiliate products, just make sure to have a landing page and then your affiliate offer, you can download heaps of free slick bootstrap html themes from google and edit them yourself with simple html css understanding

and always be testing more than 1 thing, ever seen that quote, "the average millionaire has 7 sources of income, how many do you have? "

your stat instas are good but why not get massplanner and start building up more accounts in a similar niche, use your experience on your stat to build more and keep expanding

thoughts

My urls? I do not have any urls, what urls?

What I am saying is I have lets say 4 good stat accounts with good engagement and everything is

organic.

I have basic understanding of how affiliate marketing works, I do not have understand of where should I go to register, what should I advertise and etc.

I also have basic understanding of shopify, you set up a shop and you need to have a product to sell right? But that's all I know , how to go from there I have no idea.

Yeah right now I have 4 stats and I am using massplanner with the intention of replicating and growing more stats, again will repeat, do not have a good knowledge of what would be the best way to monetize them so this is where I ask for help. Do I use my stats with shopify and sell something, do I use them for affiliate marketing or maybe something totally different? It would be also good if you can use some examples of these. Hopefully you can see my question a bit clearer now.

Have a good day too. Regards

and yes, really appreciate your help, thanks again

I had a website idea a while back where i would buy Bulk Netflix accounts for cheap, then make a site where people would have to complete a survey or two then they would get a account, but i had a few issues, i don;t know how to promote it, i saw one of your comments using the FM website what kids use but i was wondering if you had any other suggestions.

Although i am new to this, i was thinking to my self why don't i get a IG account, try make it look all HQ bot some followers try grow it a lil, then start promoting products, like becoming a affiliate and getting commissions

I'm really confused on what type of CPA i should get in to

and if i did want to go with my second idea how would i even grow a IG like that.

And if my first method is even any good

Thanks in advance for your time and your response, do appreciate it

I'll shoot one more question if you don't mind because extra knowledge is always good - you might not ever need it but when you do you'll be glad you know it. Always wondered how the majority of people growing stat Instagrams get their content. All the luxury ones for example - surely the people don't own the pictures themselves because either a lot of time or money would go into that and there's far too many accounts to account for it. I know of things like the online reddit image scraper but I don't know how I'd ever get consistent high quality content if I was to try and grow a stat?

Also thanks a bunch for the +rep. Was really unexpected. Hope your work's going well today.

cpa grip is often where a lot of newbies start, crakrevenue, ogads, peerfly, affiliaxe

try them

depends what you are wanting to do though obviously, some of them specialize in certain niches

Sourcing images pretty much hq ones?

from other instagrams, from photography websites, flickr i think its called

tumblr is also awesome can find gold images there and find tumblr scrapers online easily, facebook pages, recycle old gold content and some new ones, once you build big enough you will get people pming you pics to use

oh shit am i thinking about pics of nature

you said luxury

too high atm bare with me

so for luxury just same process really, don't steal too many from instagram, try look on other social medias, not really sure what else to say on this topic, finding images you will have to put in the work to google your ass off and find gold mines of luxury images

You need to pick one or the other and stick with it

either monetise with shopify on your instagram accounts, scaling by more accounts, traffic sharing, shoutouts, ig ads since they are on the rise atm

OR

you do affiliate marketing around whatever your niche is, you promote the offers via landing pages on your instagrams again scaling with accounts, maybe ig ads could increase rate of banning ur fb ad acc if ur not cloaking

thoughts? please try keep questions brief, bullet points if possible i like to move quickly

thanks!!

QUESTION AWAY IM A MONSTER AT ANWERING ANYTHING CPA RELATED IN DETAILS
LETSGOOOOOOOO

Cryptography - January 9, 2017, 7:10 pm

What kind of analytics do you have on your site?

Do you use custom landing pages or do you just rip it off people? If you do rip off landing pages, what do you do in-order to make sure they aren't tagged with a malicious js (feel free not to answer this part)

Which split testing script do you use if you do use one? Any useful tips for split testing? Certain psychological effects to use?

Motivational techniques that you use? (music helps yeah!!)

How do you convince yourself to take a risk? (not a small one but a huge one)

Do you highly suggest adding an email lander before redirecting to your main landing? I think that the email lander turns away a lot of people and makes potential conversions disappear. If you do suggest it, in what way would you implement it?

I also have a question in-regard to your VPS usage, have you tried DigitalOcean before? I've just

got the VPS and looking at comparison pages it seems like a nice alternative compared to LW with a 100ms load time. I hope it would work out just fine, think it will?

I also have a potential workforce of 100 people, part-timers, do you have any suggestions on what to do with them? (feel free not to answer this; I've already tried thinking multiple methods out, the usual ones, and the best I could come up with was setting them up as VAs & copywriting for SEO)

Amazing thread you have Rod! This is a intellectual gold mine, thank you for the opportunity. ?

google analytics and voluum are both great

ppcmode.com has some great guides on this but im not a great code tbh so i usually hire if i rip then ill get a coder to check it for me

voluum has spit testing features :D

yes read the book called casvertising its about marketing psychology itll explode your brain with marketing ideas trust me, you can find a pdf online

depends what sort of LEAN GEN you are trying to do, collecting emails can be good for commerce or if you are building a niche audience so you can remarket to them 3 months down the line

if its just bs spam or quick cpa then i wouldnt bother with email, also watch out for your local spam laws

motivational? think of your family, think how you could make their lives better and take care of your parents when they are old and need good looking after, i dont want my parents to die in some shit hole old peoples home, they gonna leave peacefully living the best lives possible and im going to make that happen, mad respect for your parents always!

risks?

you gotta emotionally detach yourself from money

right now money controls your emotions and therefore your happiness

you need to see money as just a tool, something that deosnt really exist as it doesnt, money only exists because you think it does! read a book called rich dad poor dad again pdf on google, reading is incredible if you can do it, books are gold mines of info and keeps your mind active i wish i did it more id be much farher ahead in my life if i read a book a month even

never tried them iv only used liquidweb, i go for vps's hosting etc usually based on their support, liquidweb have HQ fast support so i go for them because its better than a cheap service waiting for 24 hour tickets to be answered, pay for quality dont cut corners on important things like vps's click loss is real, people dont have half a second to wait for your bullshit to load, its just that real

as for 100 people i cant help on this idk how much u gotta pay them a day idk what devices they have idk their demographics, skills, lanauages etc etc
but i know if i was you those 100 people would be working on instagram for me

media buying is great for sure, newbies often start with pop up pop under and redirect traffic, bascially they are what the name suggest, pop ups, pop unders behind ur tab and redirect means when someone types in a domain like fcebook.com whoever owns that might have redirects on it selling it to a big traffic exchange which you would pay per redirect

with this type of traffic sources you can do things like sweepstakes and pin submits, meaning you could do a change to win a free iphone or imac, with most traffic sources you can target device id etc etc so you could target an iphone 5-5s for example and then call them out on your landing page

"are you sick of having a old iphone 5, is it slow?"

"are you embarrassed with your iphone 5? would you like a chance to win a brand new iphone 7, enter your email here"

target peoples emotions, and social, we live in a culture where people anxiety is through the roof, if you can make people feel embarrassed you can defo get people to convert on that aspect anyway i hope you get what im trying to say

as for actually buying media you should start off with

zeropark.com

you need proper tracking so you can track which traffic sources within the traffic source is getting you leads, these traffic sources work on a basis of you can buy RON traffic, basically meaning run of network, meaning you get traffic from loads of different sites that are selling traffic to zeropark maybe you spend \$50 and you get 50k pop ups to your landing page across 35 different sources, but 56% conversions come from 15 of the sources, so this is where you optimize by cutting the bad placements/sites

now you will need a proper tracking solution for this shit, you can actually track conversions and which placement/site is giving you them!

a good tracking system i use is voluum.com they are \$99 a month, you also need a vps which i use liquidweb.com i believe which is about \$60, load time needs to be under 1s on your landing pages ideally 200-300ms other wise people just click off and you loose popups youre paying for! people are impatient in a world of super fast internet and phones

thanks for being respectful in the way you ask questions, hope this helps

Not a bad site, did you make that yourself?

you need a bigger CTA (call to action) the button you want the user to click you have a nice one on the front page but thats not where they will get the account

they go here <http://www.minecounts.com/almost-there/>

this is where they get the account

this needs to be nice and brief, bullet points if possible, and a big CTA nice like the first one or even have everything on 1 page why have 2, people skim read

also social proof, have reviews at the bottom or somewhere,

sally menson 2 mins ago
wow omg thanks so much

jake andrew 5 mins ago
my brothers been wanting one for ages

also have a count down aspect, (urgency)
29 accounts left today!
(ticks down to 28, 27 while user is on site)

also have a bit say 342 people are viewing this site right now a live counter if possible obviously fake

make it in line to how many accounts you have left

check ur landing page speed too, google website speed test and make sure it loads under 1s

its nice tho, if you can split test different variations of the same page so have like
minecounts.com/1/claim
minecounts.com/2/claim
etc

and change different things on each

make sure you have different sub IDs for each url so you can see which one is performing better,
you cant just test 1 thing at a time or youll be here for ever
google A/B testing if you require a better understanding on this topic

hope this helps

People use 3 accs per sim/proxy which is perfectly fine but just the thing im doing is long term so i
want everything to be clean and 1,1,1,1, for everything

how do you utilize them?

well you buy an aged account
massplanner
put in account details
itll ask for security check point
you login to the email you get with the aged account
put in security code
then go into account settings
edit the username and the phone number to your own sim

i buy my sims from corner shops here in the uk for £1 each
you can buy then bulk from ebay too

sorry your question is a little off, if i missed anything please reply and let me know

oh didnt see this one, thanks! repped

this niche is hard to get into youre competing against guys that have ran tube sites since they first even came onto the scene in the last 1990s haha

but you need to pay for a proper scripts dont get nulled shit you wont get updates or support

itll take months to build up the site, you need to post revelent content in revelent places on the internet, porn comments, upload videos with ur watermarked site in the niche of you site, you have to make a niche based site, big boobs, big boobs milk, ebony chicks, old granny, big dick etc

go on a forum called gfy

google it and youll find it means go fuck yourself its for adult webmasters you can read and learn alot here, i cant help too much on this topic as i only did it briefly im more into adult dating than tube sites, but you will have to stick at this for months and months, failing all along the way before you see some good progress, have a think anyway and browse around gfy, reach out to some of the nicer members get them on skype and ask them the odd question from time to time, dont be annoying and dont seem like you only want to speak to them to get info as in, how was ur day, good, got much planned, oh how do i do this, just ask them straight up and be honest they dont like to fuck around be polite and give them value back whenever possible

if i must ;)

a facebook ad promote VR absolutely amazing this one, check out the ad text, it has a quote and then shoots the user into an experience of getting off a horse!

I thank you for your lengthy post regarding all of our questions. I will be reflecting back on this post. One more question, why is it a trend to use that same style of web advertisement with the big bold shiny jumping text with the whole TV Channel reviews and etc..? To be honest, the one you showed me is probably the best one I've seen for something that isn't pills.

Do you believe this has a much bigger success rate than something different? Like a professional website selling the product instead?

Often the case in marketing the simple shit does better, at the end of the day the most HQ landing page you paid a zillion dollars for could be the worst, you gotta remember that 1000s of internet users that are 100x less experienced than you will be viewing your ads/pages

there are certainly tricks you can use to increase ROI CTR etc

such as

count down timers (urgency)

example: this offer expires in 30 minutes <

count down of products left (urgency)

example: ONLY 42 DRONES REMAIN

BIG CTA (call to action) basically the button they will click

its well known in marketing CTA's with borders do better

Bold text, red means less trustworthy for the user, green/blue means more trustworthy, google some studies on this

location call outs (call out)

someone from geo city just bought a dorne

device call out (call out)

use scripts to detect users device

point them to a landing page that fits that device

example: win free iphone 7

send iphone users there with shit iphones iphone 4 for example

same with android

BIG head lines, thats the first thing most people read

UNDERLINES on key words and phrases

its all about split testing small variation changes and see what works

taking that data and making DATA DRIVEN DECISIONS

thats all cpa marketing is

casting your fishing net out

seeing which parts of the sea has fish
seeing which type of fishing networks best
targeting those areas

hope this helps

appreciate you reading my lengthy, most people just dont even both to read what i type and will fail,

marketing ideas trust me, you can find a pdf online

depends what sort of LEAN GEN you are trying to do, collecting emails can be good for commerce
or if you are building a niche audience so you can remarket to them 3 months down the line

if its just bs spam or quick cpa then i wouldnt bother with email, also watch out for your local spam
laws

motivational? think of your family, think how you could make their lives better and take care of your
parents when they are old and need good looking after, i dont want my parents to die in some shit
hole old peoples home, they gonna leave peacefully living the best lives possible and im going to
make that happen, mad respect for your parents always!

risks?

you gotta emotionally detach yourself from money

right now money controls your emotions and therefore your happiness

you need to see money as just a tool, something that doesnt really exist as it doesnt, money only
exists because you think it does! read a book called rich dad poor dad again pdf on google, reading
is incredible if you can do it, books are gold mines of info and keeps your mind active i wish i did it

more id be much farher ahead in my life if i read a book a month even

never tried them iv only used liquidweb, i go for vps's hosting etx usually based on their support, liquidweb have HQ fast support so i go for them because its better than a cheap service waiting for 24 hour tickets to be answered, pay for quality dont cut corners on important things like vps's click loss is real, people dont have half a second to wait for your bullshit to load, its just that real

as for 100 people i cant help on this idk how much u gotta pay them a day idk what devices they have idk their demographics, skills, lanauages etc etc

but i know if i was you those 100 people would be working on instagram for me

Yeah it is hella more advanced, hell even most are moving to ecommerce and fb ads as its huge money atm but cpa will always be around and has the same backend principles, you do homework services? why not use that to write out nice fancy blog posts, learn marketing psychology and what makes people tick, work that into your copy writing and try use that to promote products, spy on other peoples stuff, see whats working and go from there, pick a niche/vertical you have an interest in and go from there. Gotta pick something you like or are passionate about in cpa and you'll stick at it

Sourcing images pretty much hq ones?

from other instagrams, from photography websites, flickr i think its called
tumblr is also awesome can find gold images there and find tumblr scrapers online easily, facebook pages, recycle old gold content and some new ones, once you build big enough you will get people pming you pics to use

oh shit am i thinking about pics of nature

you said luxury
too high atm bare with me

so for luxury just same process really, don't steal too many from instagram, try look on other social medias, not really sure what else to say on this topic, finding images you will have to put in the work to google your ass off and find gold mines of luxury images

You need to pick one or the other and stick with it

either monetise with shopify on your instagram accounts, scaling by more accounts, traffic sharing, shoutouts, ig ads since they are on the rise atm

OR

you do affiliate marketing around whatever your niche is, you promote the offers via landing pages on your instagrams again scaling with accounts, maybe ig ads could increase rate of banning ur fb ad acc if ur not cloaking

thoughts? please try keep questions brief, bullet points if possible i like to move quickly

thanks!!

you seem very new to this scene i have a couple questions,

how old are you
how long have u used a computer for
how long have you been on hf
what eperience do you have on the internet

Id say your main goal at this point is to get your feet wet and do something very simple, just so you
can see the whole cpa process and how this game works, instagram and ogads for example or
ewhoring is both good places to start for newbies to learn about making money online and what it

I'm bad at setting up sites, uploading content lockers I have no experience in this.

I have controlled e-commerce accounts before I have experience with management and talking to customers professionally. (Ebay)

I can stick to a schedule, I know there are many distractions online such as Youtube and FaceBook but as long as I am on the right path i will stick to it, and when i do feel like giving up I just think of the features money has that I'm leaving behind and that puts me back in place.

I understand that I may not be making great money straight away and it may take a while, but I want to stick to something and see my hard work pay off.

When I put my all into something I do well for e.g school when I do try I do well but I have never been someone who just wants to go to school go to uni get a simple job and retire when I'm 60, I believe there is another and better way to succeed.

Simple answer yes, if you can build targeted email leads in your list and have a good volume of them you can literally send out an email to your list of products/services special offer for example and instantly make \$\$\$

but yes email is still very big and profitable, social is popular tooooo

Hard to tell, you cant predict how the market responds unless you try, try both and see, have you thought about basing a niche around say 3 pin submit offers

for example

win free car (5 ig profiles promoting this , landing page, following car people, email submit)

win iphone (same as above)

shopping voucher (same as above)

find the right sources accounts with people that would like the email submit offer

use massplanner and use the option to follow people that have interacted with the big accounts
images

aged accs too 300-700 a day follows with breaks and shit

so your strengths are ecommerce why not shopify+fb ads?

or go back on ebay, find good suppliers and start testing products see whats trending, might aswell do something you're good at and enjoy if you can before trying something new online what other route ideas do you have planned to make money online?

money is nice but doesnt bring real fulfillment or happiness, it can allow me to live a more relaxed life e,g walking into a shop and not worrying about the price of everything

more importantly time, i dont really have much of a concept of time these days, time doesnt really exist we invented it, you probably have to be somewhere at 9am on monday morning for example, i literally have no where to be or have to be unless i am needed or want to go there

also in time freedom of location, i can go and live anywhere i want in the world just aslong as it has

a good internet connection and nice weed

money is just a tool in my eyes, most people are incredibly emotionally attached to their money so forth it controls their life completely, i want to live a life where money doesnt really exist, i just want to do whatever i want and never worry that itll cost too much or limits my experience of life

also family, friends, anyone i love or care for ill be able to help them and make their lives easier and less stressful

i was reading, your odds of even becoming a human are 1 to 400 billion, just think about that for 5 minutes, thats the same odds as winning the lottery 5 times in your life, don't waste your life away in some box, live life on your own terms, who knows there may be some sort of after life where everything is wonderful but im not taking any chances, dont stop till you're at the top my friend

fb ads and cpa can make you 1000s a day even 10's of thousands a day there's 1.8b people with the best targeted capabilities invented in history, you'd need to practise and prepare to loose money learning

as for cpa and fb they dont really like it too much,u can look into getting a cloaker, but always use a landing page and try multiple offers at the same time to see which one works better and optimize it, paid traffic is all about testing and optimizing whats working and whats not, jump into it and give it a shot,

youll need

domains

hosting

3 offers (email, app, pin submit etc)

landing pages

fb ads account

cpa network to find the offers

combine them all together

also use a video ad for each ad, either make, buy or rip from utube

use utube to learn about the fb ads platform its pretty simple

Multiple sources of income are good but you need to get atleast 1 source working and semi auto pilot before starting more IMO

you can't juggle everything at once right from the start

start with one, master it, move on to another, delegate tasks to people if u don't want to allocate that time to a certain thing, can get a virtual assistant to run source 1 while u start on source 2 for example

I call bull shit on \$100/month for tracking. Yes, you can get a paid one, but there a free one that is just as good as the paid ones. I havn't done PPV in a while, but i remember myself using the cpv tracker which was quite expensive. Then I found a free one which was pretty much the same shit as the paid one. I forgot the name of it, but I'll reply if I remember it.

You definitely do NOT need to pay for tracking.

Edit: It's prosper202. You can get it for free. I've used it and it works perfectly.

If you have who.is protection then you're fine as nobody will see your details. Or are you looking into black hat stuff?

Namecheap.com gives you free who.is protection on domains

Then yeah who.is protection stops your info from being seen when they lookup your domain. Make sure it's checked before purchasing.

Well, since you have given me very little information about these Instagram accounts i cannot really give you much information in return, please elaborate, even their niches or whatever,

for example if they are a free iphone niche then you would have a landing page and promote with links in bio

if its a street wear account then it would be a shopify selling clothes/your own brand

CPABuild is far from being the best network, as their payout is way too low for many GEOs.

OGAds is mainly for PPI.

Adludum is interesting if you target highpaying GEOs (FR, DE, NL) and pinsubmit offers.

Your choice, really.

Okay so three questions

1. Anyone know where to get followliker for free or a similar program?
2. What do you say when your bank asks where all this money comes from (and paypal) like if you're a highroller making 25k or so a month wont they ask?
3. Do you need like a business license or anything for this?

1. I advise you buying the full version as soon as possible. And no, I don't know any source where you can get it for free.

2. You shouldn't keep your money on your bank account. Try getting some information about Payoneer and Bitcoin, I can't really develop on that subject here.

3. Well, as you're earning money, I think you're supposed to. But only a few people do it.

You can buy shoes watches cocaine nice food and.....be back to the 9-5

or you can put all the money you make back into online internet related business
thats what iv done

lets put it this way

i make more than most of my friends make for sure and i probably only get new shoes every 7-12 months while they are out buying clothes and shoes every week/month

material items bring temporary happiness

just keep recycling any and all money you have into business online, accounts, proxies, servers, websites, coders, VA's, mentors etc etc etc you get me

Also due to high demand have updated my 6+ month aged ig acc seller on front page, read text before adding

Following then unfollowing similar niche influencers followers is a solid strategy.

Concerning massplanner, I'm 95% sure 2NWO shared a guide here containing his exact settings on how to grow an account. You can also use InstaGress.

You should consider buying a spy tool on Facebook Ads or do some spying manually.

Go on clickbank, find what seems to be a successful niche, connect via a VPN to the desired location if you target some precise GEO and launch the spying process.

You can basically do the same on Google if you want to.

Facebook is a bit harder though because advertising is based on your interests.

Even if OP shared a working landing page with you, it doesn't mean it would work for you aswell. ? Some LPs are dead, and won't work anymore. You better build a new one by yourself, or steal one from your competitors and do some tweaking.

Told you that spying was the best thing to do for you. No one will ever share with you a successful landing page when they can earn money with it. Please share your vertical first so that we have an idea of the kind of LP you want to see. I might show you a TS calls or a nutra Landing Page, and it would be 100% useless if you're targetting a gaming vertical.

See here, people are selling eBooks, most of the methods are saturated and don't work anymore. It's the same with landing pages. If OP decides to share a landing page with you, it'll mean it has high chances to not work.

Choose a vertical, go on Google, type your keyword, and analyze the first results. Go on Facebook, find a facebook page with some successful advertising going on for months (posts with a lot of engagement) and clone website.

Crak Revenue is a good network for Adult CPA when you start.

Paid traffic for Adult would be Traffic Junky (they are the ones displaying on pornhub for example)

IceRolex - January 18, 2017, 4:48 pm

Hey dude I don't really know how to say this in any right way but I'll just try to anyway.

I got into CPA 4 years ago which was CPAGrip. When I signed up at CPAGrip, I saw a lot of guys doing big numbers like \$1,000 every day. I actually somehow saw this guy's Facebook ad accidentally (because he had a site around CPA coaching) so I added him and saw him comment on his own Facebook ad. I believe it was free gems for Clash of Clans. Since then, all I knew was "these big guys" doing big numbers were doing Facebook ads and I started around that time and never saw a lot of success with it.

About a month ago, I invested \$140 something and made around \$150 back on the same day with Facebook ads so I was never great with optimizing the ad settings or getting things right so I'd make profit. Currently, I still owe that \$140 on my ad account and I don't really have the motivation to pay it off and start testing dumb ads again. Back from when I discovered other people's ads, I would just comment on a bunch of them with a link to my site and that's really how I've been making money (around \$40-\$170) daily but it's slowly dying off for whatever odd reason.

Besides Facebook ads, I knew a lot of people were doing SEO with CPAGrip. I just saw a lot of people including "high earners" talking about it. I knew about SEO for about 3 years but never took any action because I didn't really know how to. I obviously wrote down "make high quality backlinks" and stupid shit like that but I never did it.

But right now, I'm at the point where I'm not making a lot with CPA anymore. I've gotten a few leads from my SEO site that is currently on the 5th page and I know this guy from my network that is competing on the same niche with me (his site is on the first page) and I know that he makes about \$400-\$800 daily. I gotten a few leads from Instagram as well (following people) but I didn't want to pay for proxies anymore.

So I have a couple of questions.

1. Have you ever tried Instagram mentions before? Do you know of a source where to buy them? I bought a IG mentions bot last year for around \$100 but never used it nor did I know how to use it.

Wasted money, yeah. But, I had an old friend of mine that told me to get into the mentions method but I wouldn't know how to without automating it, otherwise, doing it manually would ultimately be time consuming.

2. I currently have a luxury (motivation/inspiring) Instagram page that I was building up manually but I had no idea how I was going to make profit off it. I see hundreds of motivation accounts (even with over 1M followers) but they sell heavy stuff like Binary stuff that I know nothing about. Would you have any recommendations about what to sell/profit off?

3. What do you do to motivate yourself to keep going and having energy to do more? I've been kind of down about CPA since I haven't been earning that much anymore and seeing others doing better, and then seeing my brother making over \$1,000 in a day from something else that I'm trying to get into as well (music/video) related. I just hate not being pumped all the time. I tried buying more sugar drinks, tried one energy drink but I still don't get a lot of stuff done and I have a lot of stuff to do. I just kind of procrastinate the whole day (shopping/working out/music practice) but don't get any of the other things I want to get done crossed off the list. I actually printed over hundreds of motivational quotes and taped them on my wall in my room but took them down because they didn't help. I tried listening to pumped up rap music like 21 savage but idk. How do you get shit done?

Would paid facebook ads to my landing page <http://dispaced.tk> lead me to make a profit?

(Jan 19, 2017 02:00 PM)Dispaced Wrote: [\[CITE\]](#) Would paid facebook ads to my landing page <http://dispaced.tk> lead me to make a profit?

You should give it a try, but yes, you can make profit.

Some tips :

- Forget the .tk domain, buy a .com for example
- Create a video showing some proof, that's always increasing your CR

If you plan on advertising the proof video on Facebook, you should pay for video views. If it's not the case, simply pay for Engagement with your page post.

Try targetting mainly mobile users. If you want to target desktop users as well, you should consider disabling advertising on the "right column".

If you see it's profitable, it's just a matter of scaling and decreasing CPC.

I know it's not as easy as it sounds, but you won't burn a huge amount of money by trying FB ads, which is the reason why you should give it a try.

dont do media buying if you dont have the budget youll just loose most likely

look into utilizing social medias free traffic, ask ur cpa network for the top offers and start promoting them, build cash flow then go back to fb ads imo

Id highly recommend running it off a server so it can go 24/7 pretty much

On a pc can run into minor problems, but if you are happy to run your computer all day and/or night then i guess why pay for a rdp, also depending on your computing power, i found it was slowing my pc down when i used to run it on my pc back in the day but maybe its changed

conclusion, id buy an rdp but you don't need one, all depends on your circumstances

I'm using YouTube and OGAds to get conversions, and I want to add some new niches.

How do I find really good niches? In what direction do I have to look?

well

what countries makes big money?

usa

uk

now what % of youtube is usa and uk?

<https://similarweb.com/website/youtube.com>

so what does this website tell us

USA is the biggest on Youtube with 12% of all traffic

Brazil/Russia is on the rise

UK is number 4,

the site gets 22b visitis a month

volume!

<https://www.similarweb.com/website/facebook.com#overview>

Now you gotta tie in your demographics

who downloads mobile apps on og generally?

Seems to be kids 13-25<

Now find niches that include the following:

Trending millennial topics within the US, use the Media as leverage they broadcast information into the minds of everyone so if you can tap into niches the media is broadcasting you can get huge traffic

For example

most kids 13-17 in the US think donald trump is the worst thing thats ever happened in this world, omg 6 million jews was better than donald trump..

Why not tap into this,

"Donald Trump is being Re-Elected due to Russian Hacking Proof"

But then you're entering into the fake news area

Anyway have a think, follow trends, free stuff isnt always best for content locking

sometimes content locking works best because the user wants access to a service e.g kik username hacker a very basic example over something like win a free iphone where they may win but 99.9% won't

Best of luck

OK so a few things

your page is saying it's promoting coupon deals etc but your recent tweet is about coupon hacks?

if you're gonna do a niche and build a brand you gotta work on it for months and even years, theres no quick push button to this shit. Also you gotta be engaging with users so they become AWARE of your page and start following

you can follow up to 1000 people a day, target people that need coupons, for example jerry springer fans or poor communities etc

Then build up an audience

Then you can start to monetise with cpa zip/pin submits

Seems like you have given up in December on that page

How would you suggest approaching a SEO ranking campaign?

Is it better to use a on-page generator, an article page linking to the landing page, or combined?

Well you would need to find sources that are mostly in the USA

you gotta think out the box and find lots of little accounts to use rather than just 1 big comedy ones that comes with 100000 indians

For example

If you're doing food maybe find 10 restaurants located in texas on instagram, maybe their photos only get 100 likes each but its highly targeted, more so if the offer is based around food, eating, whatever

Ewhoring or spam

no budget needed, pretty simple to do, firefox imacros can work well if you can find places to spam

there are loads of sites you can imacro to post on daily to get people to you

example

<http://snog.fm>

<http://similarweb.com/website/https://www.snog.fm/>

60% UK

20% USA

site for uk mainly teenages/21-25 year olds

getting your feet wet atm is nothing more than taking an action, actually doing something rather than reading hf threads, reddit and replying to friends on skype. You might have to try 10 things before you make money if you're new, of course you need to read on forums to learn and ask questions, interact with communities like the ewhoring one if you go down that route.

Apply the 80/20 rule to your money making online life..

Plan/Prepare for 20% of your time

Take action/DO Something for the other 80% of your time

Also make a task list, you gotta have a plan of attack. Do some surveillance by using similarweb.com, browse the site to see if you can see any other spammers or whatever people trying to make money, test their limits/security ban rates etc etc

Then have a task list and go for it. Writing it down on paper and pinning it in front of you helps a lot, its a very underestimated way to improve productivity

Hope some of my words has helped, i try and stay real with my advice and don't bs you, you're gonna fail hard for weeks maybe months before you start to see earnings consistently, sure people can make \$1k a day newbies but can they do it again and again and again? Most likely not, its the background cpa skills you need, a good base so you can apply to anything, read this guys blog if you want too, charlesngo.com its more paid traffic but he does a lot of marketing psychology on how to get people to click, what angels are and split testing, plus loads more

Goodluck brother! If you ever make it to the top, pm me and we will party together ?

Scale harder than, NET Profit Beats ROI

Would you rather make a 500% roi that's doing \$100 a day

or a 200% roi that makes \$200 a day

Obviously you need the cash flow to scale harder with smaller ROI's but

I would recommend to continue to scale this campaign, keep testing new things with it, ad creatives, caption angles, landing pages etc

As well as starting new campaigns, you don't want to find this one suddenly dies one day and then you have no income

Well depends if you're niche if BH if it is you'll get banned over time depending on the age of the fb acc and fb ad acc,

but yes often when you launch a new ad the cpc will be high, that's why you A/B test ads, try 3, all different angles and see which one is the best, cpc is not everything, if the clicks don't convert then it doesn't matter, epc is what you need to be comparing your cpc's too when you're trying new ads

Phew, just done reading all 17 pages. Amazing advice you gave there. ;)

Since i am doing Snap + CPA and IG + CPI i got a few questions aswell.

Snap:

1.) Whats the best method (most adds for time spend) to spread your Snap around?

2.) Do/Did you post your CPA link every day in Snap?

3.) Which network and offer performed best for you for Snap?

4.) Did you use any other monetizing method than CPA like selling pics of that girl via custom site or just the same dating offer over and over?

Insta:

5.) I guess you promote CPI there with Ogads. How does you bio look like?

6.) Any tips regarding follow sources other than following big accounts?

7.) What was your avg. earning per account per day and for what should i atleast aim for?

8.) Do you get int or worldwide. installs with your follow sources or 90% US ones?

9.) Do you use prelanders like wordpress or blogspot or the javascript blogger redirection trick you explained? If its the former how does your prelander look like?

I have a big title and a logo/image as CTA

10.) Would you suggest doing smth else than CPI for better earning per account per day? If yes what would it be?

Not sure if anyone said this but: Thanks a lot for your time and long replys ;)

Snap:

1.) Whats the best method (most adds for time spend) to spread your Snap around?

Why would you want me to answer this public? ;)

Mobile apps are under rated, social networks, its not about quantity with snap cpa its about quality iv had 10k's making 200 a day over 60ks making \$50 a day

2.) Do/Did you post your CPA link every day in Snap?

Most days, not everyday though you want to push your traffic to the limit but not kill your accounts, keep quality content going up with no links on too so the user doesnt just feel violated

3.) Which network and offer performed best for you for Snap?

Mostly quick hookup type offers, straight sex type PPL based, USA UK CA ZA AU
As for a network pm me if you have the traffic and ill pass you along

4.) Did you use any other monetizing method than CPA like selling pics of that girl via custom site or just the same dating offer over and over?

Once the epc's dropped lower i would change the offer up but its all about splitting up your clicks and testing different offers on different networks
seeing which epc is highest
let the data speak for its self and make data drive decisions

Insta:

5.) I guess you promote CPI there with Ogads. How does you bio look like?

6.) Any tips regarding follow sources other than following big accounts?

Follow big accounts picture like followers

7.) What was your avg. earning per account per day and for what should i atleast aim for?

You should aim for \$0.01+ a day, don't aim for 1k a day or 2k a day
aim for 1 lead a day then 2, then 4, then 8, then 16
If you're mind set is to go fro \$15 a day to \$1500 a day you'll never win in this game
you gotta appreciate the small gains a lot, thats what keeps you around long enough to catch the boat to the new world..

8.) Do you get int or worldwide. installs with your follow sources or 90% US ones?

I don't app installs so i cannot give any geo data on this question

9.) Do you use prelanders like wordpress or blogspot or the javascript blogger redirection trick you explained? If its the former how does your prelander look like?

I have a big title and a logo/image as CTA

Atm the moment i do not use any pre landers for the methods i am currently utilizing, but big CTA's, big headlines, split testing, underline keyword,

10.) Would you suggest doing smth else than CPI for better earning per account per day? If yes what would it be?

I would suggest using self-awareness to figure out your strengths and weaknesses and go from there, stick to what you're best at and what has made most money, become the best at it rather than jumping around from sources to method to source to method...

Not sure if anyone said this but: Thanks a lot for your time and long replys ;)

Yes these are the settings i use to warm up a 6 month aged account

and links in bio increase a rate of ban
iv literally had no bans though, play it safe, don't go for instant gratification
when i started out with insta and MP i used to get banned all the time
but now i know that slow and steady wins with insta

sure burn and churning accounts can work but its expensive and you'll need a niche that is working, play the long game with insta if you want to still be around in this game for when insta reaches 1b+ users :D

I would suggest splitting it up

a common math is

3x the offer pay out

so

1 email submit is \$5 payout
you spend \$15 testing that landing page
what if you have 3 landing pages to test?
you need to spend 15x3 so \$45

if the offer payout is much smaller for example i would x10 it

so ogads \$0.50 app install, i would spend atleast \$5 at each banner/ad/landing page and track each one

without proper tracking your just throwing away money

native advertising is hot at the moment if you are looking for other media buys

High male populated areas with mobile devices

ideally usa uk

dating apps/sites

mobile apps hookup etc

mobile app social anonymous posting etc

reddit

forums

porn sites

random internet sites like snog.fm

Social

try aim for older people too
will pay out better in the long run when u monetise them with adult cpl offers

best of luck
finding your own source is best
mobile apps have huge traffic flowing through them everyday
and often low security ;)

(Jan 25, 2017 08:55 AM)iNuno Wrote: [\[CITE\]](#) What sources on massplanner should I use?
Well what is your niche?
Find active accounts related to your niche and start following users that like their pics

good sources can go a long way but only way to know is to test different ones, on multiple accounts

keep splitting up your niche sources into categories

e.g

shoes (you sell all types of shoes on Shopify)

sources:
male shoes, female shoes, hipster shoes

results:
male shoes sell bad
female shoes sold some
hipster shoes sold lots

make a decision based on data

move forward, scale, optimize

Never really done email marketing, it's still hella profitable though.

Depending what area you are in you can build up a healthy list of emails over time to remarket similar products too

also you can create custom and/or lookalike audiences on facebook using emails, absolutely lethal combination

Real?

Well you would need to sentry config them but then you would almost always hit the security checkpoint while logging in, fb is strict

unless you have ratting skills and you got some slaves on your botnet and did it remotely, whatever it is you're trying to do (post in fb groups i hope ;)

I would personally buy aged accounts for fb, use unique ip and browser profile/cookies/cache each time you login to do an action, better yet get massplanner and start automating fb! 1.8b users

anything else i can help you with?

Also some pointers into traffic/daily adds would be nice

Consistency is key
gotta be ontop of the shit daily

imacros for firefox can save lives with this shit too if you can find some good sites

if you're serious invest in a coder and get some automation bots made, thats how you take snap to the next level, find 1 source, automate it, find 2nd source, automate it etc

but most importantly you just gotta stay on top of things everyday

for example posting on

reddit
snapforum
fb group

now you gotta post 2 times a day on each, sounds easy but by day 3 you might be thinking fuck im bored ill scroll fb for 5 hours and end up not doing it causing drops in revenue/adds

mobile apps are under rated too

aim for higher age demographic, better for cpa offers in the long run

also use the snap qr code and snapchat.com/add/username to your advantage

Yes millions of people participate in online giveaways everyday, its a big niche and makes money for sure if you set it up correctly built with scale

but for you it sounds like you may be new

why not join max bounty ask for the top 3 email submit offers giveaways
create a blog for each of them 3 with content
then link to offer
put url in instagram
find good sources
and start trying to get clicks

learn massplanner and scale, ig isnt all just ogads, can do a lot of different stuff just gotta stay open minded and willing to take action

Yeah link in bio increases the ban rates i think especially if its going to a cpa direct link without cloaking or anything, gotta think outside the box, setup more a brand website, with good content in your niche and cpa offers on there?

and for description's i test, i run different niche acc's within that niche to see what gains best results, always be testing! but you can use these to get peoples attention, and that is all we do as marketers is trade attention:

Survival, enjoyment of life, life extension
Enjoyment of food and beverages
Freedom from fear, pain, and danger
Sexual companionship
Comfortable living conditions
To be superior, winning, keeping up with the Joneses
Care and protection of loved ones

Social approval

Try 'angle' your ad or accounts on one of these pressure points, a few different tests if possible and see how it goes

Hi Rod. How to get a site on the first page on Google? How to rank it? I have a blackhat niche with a landing page and I want to get views with Google for cpa. I tried to optimize my content as much as possible for a good seo. I checked keywords and I do not think is great competition for my niche. Can I send you my site in private to analyze it a little and to give me some tips about it please?

jordan0159 - January 27, 2017, 12:18 am

Hey, another question. I have this antivirus offer I was considering promoting with some targeted redirect traffic. Would it be considered misleading to have a prelander/landing page that alerts them that they "May" have a virus" and to get protected now, with a cta to redirect them to the offer? I don't want to get banned on my ad network

Same for an iphone offer targeting iphone users. Would you recommend direct linking or a simple prelander with some urgency and a cta with a big heading? In regards to this offer would you recommend a \$2 email submit or a \$19 pin submit, both with similar network epc's.

Thanks for this thread. On top of my previous questions, I check it daily and read any new information I can find. Any knowledge is so valuable after all.

Hi Mate,

I am starting CPA this weekend and what I have so far is this:

1. a HQ landing page related to gaming
2. 100-500eur ready for FB ads
3. Targeted audience will be from the USA

What I want to know is whether I should start with FB ads instantly or I should first write some content on my website (it is made in Wordpress so I have users that can login and write reviews - that should be good for indexing and moving higher on Google's pages?)

As well as what type of campaign I should run on FB + what age I should be targeting? I was thinking something like 14-18 ?

as far as the anti virus angle goes it is very aggressive but it does work iv seen some landers that show a bunch of green code and black screen saying ur device is infected remove here with this AV app etc but you gotta be careful with angles like this some traffic sources wont like it, especially if you being super aggressive and using things like back button redirects and popunders on your LP's

depending on your budget you want to go with the offer that is:

- 1: working and proven to work on the netwrk
- 2: is in line to your budget, meaning if you want more data for your budget go with a smaller offer meaning you can test more angles and landers

thanks for your time

Nice good plan, take action now, learn how the fb pixel works and try track as much as possible that's what separates the A list cpa marketers from the Z list cpa marketers, you're paying for data so make sure you damn well track it and store it. Spending money on ads and not making profit isn't losing, you're paying for data to see what works, this is where split testing comes in,

idk what type of offer you're trying to promote but try use a video ad with fb ads or go with a big article story type ad with a nice image, engage the users you're trying to capture their attention in a world with 1000000000 other things going on in their minds and phones.

but seems like you're off to a good start you want to create 2 more word presses

also try find a video or make one for your offer

test 3 ad sets, and see which one performs best, also be patient, it's very easy to see a lead and get excited thinking that's the winning angle/lander but give it time and money. 3,4 days should be good, spend 3-10x the offer payout to each depending whether it's a tiny payout or higher one, for example if it's \$2 per conversion try spend at least \$10 per ad group/landr/angle

keep me updated

good work getting started though, most just read and dream, cpa isn't hard, taking action and actually doing something is.

Awesome, thank you so much. I'll look into that now. One more for now, in regards for facebook ads, what kind of budget am I looking at on starting a campaign and would I need tracking with facebook like I would with media buying? Also what kind of offers would you suggest for this traffic source. Perhaps even clickbank products instead? I know facebook doesn't like email submits but would those kind of things work as a churn and burn kind of thing?

Actually, whilst I'm asking, always been curious as well. Had some bing ads coupons laying around. Would you recommend smaller offers like email submits or advertising products instead? For example would an iphone email submit work well with bing ads.

Again thanks for the advice especially on the antivirus offer. Will certainly check that out. :)

fb ads you dont need a big budget and its true they don't like incentive cpa meaning that you are just getting the user to do something at no reward/product/service to them

fb like stuff that the users like and you'll get your acc banned in time if you don't be careful, ever looked into shopify? its killing it with fb ads atm

but fb ads can run lots of stuff, what experience do you have most in, newbies problem in cpa is jumping around, they try instagram and massplanner for a week it doesnt work out, they try fb ads and loose \$50, quit the game and say its all a load of bullshit, gotta find 1 traffic source, 1 vertical and stick to it, master it, mobile, adult, gambling, nutra, pin submits, pay per call etc

bing ads coupon nice, they dont have a huge volume of traffic but defo can run some stuff, why not try some health products from a cpa network like max bounty

Never looked into shopify, would you recommend direct linking them to a store of my creation then, stocking a product or would you say it'd be better to promote a specific product. Guess you could do either. I have a current budget of around £400 so far, looking to build it up for other projects. Just reading around planning where to spend it. Made it all through youtube cpa recently looking to branch out.

Yeah will try a product, how many keywords would you recommend targeting for a bind ads budget of 100\$? I plan on running 6 or so different ads for the product.

as for shopify i would recommend testing a few items from aliexpress or alibaba, and finding a niche that you are passionate about and have a winning seller
then contact the supplier and buy in bulk sent to you for a much cheaper price
then package and ship yourself, worked best in my experience even tho i dont do shopify anymore i prefer cpa its simpler and no bs with customers orders feedback problems etc etc

as for keywords i would recommend using this tool its ace

<http://keywordshitter.com>

gotta love the name..

id get as many keywords as possible also try include incorrectly typed keywords u can get them so cheap cuz all the main marketers go for the big main keywords for example "insurance" or whatevr but so many people type incorrectly and make grammar mistakes
think outside the box and keep testing, keep your mind open to new things, you can never test everything, always keep that in mind
always make data driven decisions
just because i think something is good doesnt mean shit

you have to actually go out there and see how the market repsonds to your ad or whatever the market is gonna make you your money not what i think will work

best of luck Jordan, keep us updated on your 'action'

you don't even have to that good at marketing or whatever to win at cpa
you just gotta keep at it, most give up after a week a month a year, stick with it and your time will come, just stay long enough to jump on the boat when it comes past, always be learning, networking with other people with similar interest (you wont find these people irl gotta go online and start sending pms)

I havent done much youtube ranking but in theory i can suggest some ideas to try:

Send the video likes, comments, upvotes, views and social shares
It can be pricey to rank videos properly but rewards are high, don't always go the simple ogads cpa route, think outside the box and try email submit offers or whatever!

I am already working with a guy atm im afraid its pretty intense work but ill keep that offer open for the future i don't plan on going anywhere soon, best of luck any more questions let me know

Always try more than 1 thing, if you want to try youtube cpa pick 3 offers, make 3 videos, rank 3 videos, make 3 landing page, this means you can get a feel for what is getting a responce and what works, rather than just trying 1 thing, getting no leads and giving up much better to start off split testing than doing it after you've failed once

cheers

What is more essential? More believable offers with a few complete landing pages and websites or more traffic to many quickly made landing pages ? I have made a few landing pages that look pretty convincing but still am having trouble getting conversions. I am using free domains at the moment until I build up some funds for a .com or .net. Also, I'm confused what cpa networks allow adult traffic.

FIRST i'd recommend building up some funds say \$100, if you can't even afford some domains than its gonna be a lot more time consuming than if you were to start with say \$100.

Clearing the meta data and all forms of hidden info in your video, buffer size, frequency etc
Resizing the video so it can't be detected, adding in loops to it, you see it sometimes if you watch tv shows on youtube the uploader will loop 10 seconds of it so it can't be detected by the standard youtube detection software

How many times have you had them removed, how fast do they get removes, try narrow it down to if its being removed automatically or manually after reports, but i would assume automatically detected

Buyaccounts is pretty well known for selling trashy accounts i believe

i havent done much youtube cpa so prob best to network with those that have and give value before asking questions if possible

but as always find 3 hot niches, see whats trending and make 3 videos/landing pages around the niches

test them out, buy video views, comments and likes to your videos, do a lot of spying, if someone else is doing it then it probably works, use similarweb.com on their landing pages to monitor their traffic and where its coming from

How long does it take to start seeing decent revenue on IG? In total I've invested close to \$150 on IG + CPA and I've only earned \$1.61 in the 25 days I've been doing it. By the way, I'm running 15 accounts and I have trouble getting people to click on my website. As you can see below, I don't get many clicks. What are the best "follows" to do? Currently I'm doing 300-400/d on all accounts and I've only gotten 1 click so far. What do you advise?

Hey which do you think is better? Using a few PVA accounts with something like massplanner or a tool to create and spam with hundreds of accounts?

Probably because saturation doesn't always mean its dry of money, in most cases saturation means there is money being made there!

Insatgram will always be good for cpa, its just a source of traffic at the end of the day, its down to the marketer how he approaches the source

I personally go for keeping the accounts for long term so i invest properly into the sim cards, proxies and aged accounts

but if you want to burn and churn thats your choice, depends on your marketing strategy, it can get costly though and frustrating

if you're using massplanner go into the results and sort by followed back, there you can see which source is giving you active users to follow your accounts, test these, hashtag sources and sources from people that like pics of big active accounts, weed out the good from the bad

maybe your niche is popular and you're just being cut out by the better guys with the more aggressive approach, always spy on others doing what you're doing to see what they are doing, start split testing different variations to see what is working, right now i have 50 accounts in my massplanner twitter different things to see what works, then when i have enough data ill turn the other 49 accounts based around the 1 that is killed it

how do you know the niche is good? many times iv gone in thinking this niche is epic and im going to make a killing to find that it flops, its about how the market responds that why you shouldnt be putting all your eggs into one basket and test multiple niches at same time, testing 1 failing 1 just kills your motivation quicker, this game isnt about how good you are, its about how many times u can fail, learn and keep moving forwards

how many views likes comments did u buy, is there traffic in this niche are people searching for it is there competition?

Do you think CPA marketing, once you've set everything up is something you have to constantly maintain? Or does it become auto-pilot to an extent?

Would CPA still work if I didn't put any investments in?

There are so many options with cpa which is why its really amazing, for example

Adult web cam rev share, theres guys that have sent clients over 10 years ago and are still making \$300 a month from their spend on the cam site tokens!!

Thats crazy!

But really depends on the cpa, spam will need to be maintained more than buying traffic or setting up an automation tool like massplanner. Massplanner can be left for weeks if set right to follow unfollow and post for you. AFK

Media buying you ned to stay on the ball, with cpa the first few years is very hard work, it gets easier. The guys at the top in this game only work a few hours a day some of them just purely because they have all their systems setup and know their area inside out.

I would recommend making some money, you have items you can sell IRL for quick cash, or get a job, do freelancing, even ewhore. You can still do cpa without money but it will make things slow, and why go slow? Make a bit of cash to quicker your success

Best of luck

Um do you have a web host? connect to you hosting on filezilla an ftp client, then drag the files to the host, make sure your domain nameservers are connected to your hosting of course, there are many youtube tutorials on this or your domain live chat support should work fine

you need to drag your files into the public_HMTL folder usually

(Feb 6, 2017 01:30 AM)jayrod225 Wrote: [\[CITE\]](#) How do you think I can promote my niche? I will pm it to you

So both your niches i got in the PM are pretty miainstream, the first one is more targetable but the second is pretty broad so for this you want to focus on the volume of traffic you can get, im assuming youd be spamming and not buying traffic so you will need to setup multiple accounts under an automation tool like massplanner and start growing accounts before promoting. You

shouldnt just go into a niche and start promoting it, get aged accounts, warm them up by doing a little number of actions on them everyday and then after a week or two move the settings up and start being more aggressive.

As to the angle of promotion, you will need a landing page at least. Quick hosting for minimal page delay, every second counts, try get the Lander to load in under 1 second!

Without giving away too much on the niche, i would try a few angles such as>

Are you sick of having an old....Want a new one?

[BRAND] Is giving away over 2000 brand new [ITEM] this [MONTH]

Is you're [ITEM] Slow/stuck/broken

Try and target human emotion, social status/approval and fear

Gotta brain storm for different angles to approach the market

Always be A/B testing things like this

Stop worrying and thinking what others make! others arent you and you cannot compare yourself to anyone else, it will just make you quit faster.

And thats a very open question, no investment, \$10, \$100, \$1000

If focus on making \$1 a day to start off, and then \$2 a day, baby steps are necessary to make \$10 a day.

Pick 1 area and focus on it, you're probably jumping around everywhere at the moment

Should spend throughout the day if you have it set to spend daily, what i used to do was set it to spend like \$10 over 6-7 hours, and then increase the budget to \$20 so +\$10 and increase the time to 12 hours and scale like that, Id start off smaller and make sure your settings are right. Is there limited traffic with your settings? Make sure its automatic bidding etc

Well you should continue to do IG, i always say to do what your best at and have more experience in if you wanna make money. Id focus on IG, join cpa networks and ask what offers are working well on the networks and then build ig accounts around them, even setup a wordpress and write some shit about the offer, do 3 of these and get 9 accounts, 3x3, have links to your wordpress, make sure to buy aged accounts, start testing multiple offers that are known to work!

test traffic sources by following

It's nice to know how people like you are giving to the community. No need for them to invest into a fraud marketer, but to gain great value from someone who seems to have a lot of knowledge in the industry. I might consider getting into CPA again at some point - never had any success. You wouldn't have an idea for what I can do with \$25 worth of VPS hosting, is there any CPA bots or something I could host..?

Not really, you need cash to quicken your success with cpa, but until you actually start doing actions nothing will happen, its easy to say you want to get into cpa or you are going to but you have to actually take action and start launching stuff, you need to be self-aware, you need to know what you're good at and what you need to delegate to other people. What skills do you have?

I wouldnt worry about DMCA complaints unless you're asking for them, such as running blackhat, or straight ripping sites from big places, for example, clone bbc news website, then make a fake article around this company giving away xxxx, link to the cpa offer at the bottom, domain similar to bbc news.

And i usually just hosted all my domains on 1 host, sometimes facebook can ban the host so any domain you put on it will be flagged, you just gotta stay on top of it, hosting is pretty cheap tho i believe i used something called hostnine package was about \$16 a month and i had 10+ domains on it, ran over 50k+ clicks through it (which i shouldnt have, if you are getting a lot of clicks you should almost always get a VPS server from somewhere like liquidweb.com, every second counts and loading speed from someone in a remote country may mean they exit your landing page and you've lost potential revenue/lead.

Well, I currently do Internet Marketing and I've got various skills. From Grahpic Design, to Copywriting and Marketing... I've also got lots of experience when it comes to setting up sites and creating funnels. You name it, I most likely can do it.

If you meant niche wise, I'd probally be best off doing something Evergreen or Game related - E.g. Pokemon Go - Seems like there's a lot of potential / I don't actually like the game though.

Something that just came to mind is advertising. I have some experience using Facebook ads and if I find something right it could go quite well. Let's say I pay 25 cents per click on a CPA offer of \$1.50

- If it has a good conversion rate I could scale that up.. Who knows. Not sure if it would be profitable, especially when the PPC can be as high as \$5.

Nice seems like you're well on your way yo becoming a full time cpa marketer! Keep it up

Again, good. Gaming is huge for cpa, evergreen niche and always growing, especially mobile gaming! Pokemon go made a lot of markets big money including me when it came out esepcially on Facebook! Its still big altho it's dying down as far as cpa goes, but as always there is room to make money.

Have you looked into promoting gaming offers on facebook? I have a friend that does it, they promote action type mobile apps, youve probably seen ads for them while browsing if you use facebook. Usually a 15-30 second clip of the game play with a caption such as:

"Do you think you could beat [GAME FEATURE]"

"Would you make it past?"

Trying to engage the user and challenge them to get them to download it, this could be worth trying, doing other types of cpa offers on Facebook will ultimetly lead to your account being closed in time. Gaming however it totally whitehat on facebook. Doing email submits for a voucher or pin submit type offer would get you banned from Facebook. Getting more accounts is a whole nother story and headaches.

TLDR: Look into promoting straight games on fb with a video ad of the game

Join some gaming cpa networks, ask for top offers by volume and epc

Thoughts? ?

Well it all depends what you're promoting, ogads is typically for incent mobile app offers, meaning

the user usually never gets anything, leading to accounts being banned for links in bio. This is more a spammy approach quick cash, not so much long term. You wanna look at cpa as a business, not just something that makes you quick cash. Treat it like a business.

If you had to pick a category niche wise for Instagram what would it be?

Example: car, weed, luxury, photography etc etc

If I can find out what you are passionate about I can help you much more.

Let me know ? ?

Well there are 2 main ways to promote with facebook

Free traffic: Free! Tedious! Can be frustrating! Low cost usually!

Pair traffic: Can generate high roi's, best ad targeting in the world, accounts can be banned if you run too much cpa, getting new accs can be frustrating

Each have their own pros and cons

Direct linking a cpa offer is the quickest way to get banned, youd want to have a nice landing page for the user to go onto and spend a bit of time there reading your interesting blog post or whatever and then have the cpa offer hyperlinked throughout ideally, cloaked if possible although most cloakers are expensive for newbies in this scene. You should read all the ad policy to make sure your account will last as long as possible but ultimately running cpa offers on facebook will almost

always lead to your account being banned in time. That's why I moved off Facebook traffic because I didn't want to deal with the headaches of having banned accounts. There are plenty of other traffic sources out there that don't just have to be Facebook. I'd go for something that you have good experience in; it will make it a lot easier. If you have no experience then I would recommend Instagram/Snapchat for free traffic, as they are both long-term platforms that should still be hot within a couple of years. Meaning by then you will have mastered both platforms and be monetising them well. Thoughts?

Well, what have you tried and how long have you tried it for, how many variations have you tried of the things you are trying?

You have to test things properly before calling them off. But look into mobile apps, some of them have millions and millions of users on their mobiles ready to add you on Snap! A lot of untapped sources there ready to be mined. Gotta look around and test things properly, use a new account for each test and monitor the adds.

Some examples of areas, mobile apps, dating sites/hookup sites, Reddit, social media, websites examples; Snog.fm

Use this site to do research into the traffic on a website and the geos to make sure there is enough USA/UK geos for monetising on

Not right away but it's known that some CPA networks do not accept certain countries for example, people from Romania may not be allowed to join a CPA network. Gotta check their policy or ask the manager quickly before sending traffic.

Yes the niche is well known meaning more competition

Meaning there are hundreds of thousands of other affiliates

Trying to cash in on this niche whom may have 20-30-1000 accounts

How many are you following a day?

What are your sources like to follow

Are you doing follow those they interacted with posts of targeted user?

Seems like a lot of people are doing well at the moment but there are countless of other traffic sources out there, do what you have experience with is always my advice. If you're new to youtube cpa you will most likely hit a sharp learning curve and burn money and time learning, which could pay off but may make you quit and kill your motivation faster. What experience do you have right now?

I don't really have any experience :/

I have one idea that I have experience with but I do need to invest \$250 and I need something to make that money

Well you need to pick an area and research heavily into it as well as spying on other people and seeing what they are doing.

Join a cpa network like maxbounty and ask for their top offers, start building videos or landing pages based around them. Taking action and getting your feet wet is the best and quickest way to learn cpa.

Fail fast, Learn fast.

Hey Rod\$

First thanks for doing this.

I am currently earning quite okay (50/100\$ a day) with CPA on youtube, However I am looking for something less greyhat.

Do you perhaps have advice to what a good next step could be, I thought about lead generation and affiliate marketing.

However I really don't know where to start with affiliate marketing, I have the money to invest in Facebook ads but I am not eager to just throw money at ads without some learning first. Lead generation is currently work in progress, I am setting up a couple simple websites however that is not really stable income. I am eager to hear your ideas.

Yes you have answered your own question pretty much, you do not have enough data to make a data-driven decision, but it may just be ad burnout although if its free traffic it shouldnt be ad burnout, ad burnout is simply when the creatives need to be updated and replaced. Try get more traffic to your lander or banner and keep testing new variations of your current working ones. Remember day parting can play a big role in the success of a campaign so make sure you are hitting the traffic at peak times for the geo for best results.

Well its good that you have experience with lead gen its meant to be getting a lot bigger over the next few years, i would take your skills you have earned on youtube and start applying them to more traffic sources, scaling. Although im assuming you are doing game hacks as you mention its a little grey. Hacks and such are good for short term cash quick buck sort of thing but if you wan to make it big in this scene you need to treat it like a business and be in for the long game. You need to start building assets, stat instagram accouts within your area for example, maybe you like gaming, why not start growing 10 gaming related instagram. See which out of the 10 gains most attraction and optimize the others based around what the market is responding well too. Thoughts?

As the user above states, reading all the questions and answers your fellow hf members have left would be a good start. I'd also recommend using free information to learn such as watching youtube videos, reading cpa case studies, taking part in cpa/shopify webinars and being pro-active in the way you approach this area. Ask questions, network with others on skype. Give value before leeching it.

Jab, Jab, Right Hook

As nize states, just because someone told you there is big money in adult cpa does not mean it is easy to make that money. There is big money in everything isnt there? Coffee, cars, banking, shampoo, apples, phones, water bottles, all these areas are multimillion and multibillion markets too.

You shouldn't get into an area because there is 'big money' in it, get into something that you actually find interesting or have passion for. Because if you don't, failing 100s of times in an area you don't even like just makes the whole thing 10x harder to succeed at.

Best of luck

The thing is that I want to make it big however I want to have a solid foundation. Game hacks don't provide this because of their greyhat nature.

However you make a valid point that the techniques I learnt with youtube can be applied to more markets, mainly the A/B testing and scaling part. I will keep building assets and dominating youtube and see where it gets me.

Hey, About everything I already do is already written somewhere in this thread. Rod\$ Gives tons of valuable information and it would be shooting my self in the foot if I would supply more tricks. I suggest just reading as much as you can and scouting youtube/instagram and other channels to see how cpa related offers are spread there. Remember that even if you don't fall for marketing a lot of people possible do get interested and you will learn a lot to see how the "sales funnel" works for those offers.

Well adult spamming is common for beginners, find a source of traffic, create a funnel(landing pages to offer) and start getting your link out there on your female profiles.

Instagram just surpassed 600m people on mobile devices, it could even wipe out Snapchat which would mean it could be a massive source of traffic over the next 5 years. But the trick is to stick at 1 thing, master it and the money will follow. Newbies always jump around and thats why they fail.

Focus on 1 thing and nothing else.

Snapchat, Instagram, Facebook, Twitter All great places to promote cpa

Well, you have a high click through rate (CTR) and a low conversion rate (CR) meaning that your offer is more than likely performing badly, i assume its an offer wall, check the geo of the traffic, seems like the offers and/or geos for the offers are poor. Try on other networks or add new/different offers to the wall/offer page

The higher payout offers can often convert poorly compared to a lower payout, do you have any app install offers, or better yet ask your account manager for the top performing offers on the network

Also remember where the traffic is coming from, what they see before the offer

Is it incent or non incent traffic?

I've sent over 100k clicks via Snapchat stories, just because they can't click them doesn't mean they won't type it in, the volume and attention in Snapchat more than makes up for it.

Youtube, Instagram, twitter in terms of traffic sources all have a lot of free information and guides online.

Affiliatefix is a decent cpa forum but to be honest you have to take action yourself and start launching anything to get your feet wet.

Even if you setup 1 Instagram account, 1 WordPress, and start writing some articles about a diet pill, then you start following fat people from a good source, have quality content and try get clicks to your WordPress and ultimately your offer.

Maxbounty, peerfly, crakrevenue (adult) are all cpa networks beginners can use

How long is a piece of string?

Very broad question, the internet is the best site haha

However video is on the rise so youtube and snapchat are great platforms for capturing the markets attention

like if you have 50k followers on snapchat thats 50k people that actually watch your video or look at your picture everyday thats an insane engagement compared to instagram or fb which only 30% may see your shit each day, don't worry about which sites at the moment i think by the sounds of it you just need to get some experience so pick a source of traffic and start learning it, you'll want to jump around after it doesn't work for a week but try stick it out

Ofcourse it is possible, but it isn't easy.

There isn't really a good guide on how to do this, you will need to find new niches, new tactics and have enough money to experiment.

But if you give your full dedication and read as much as possible I am sure you are able to earn a living with it.

Learn background skills rather than just 1 niche, a good cpa marketer should be able to apply his skills to any sector of a market and be able to win after time.

As for kik and as the user stated above you are gonna have to slave away at it, you gotta start automating things after some time. Ewhoring manually can only take you so far for the most part unless you learn a skill like findom or sugar daddy monetising.

If ghosted i dont think there is much you can do, id burn it or leave it and come back and check later, make sure you check all the urls on your profile to see they work correctly simple mistakes like that can cost us marketers a lot of money.

As for the clicks dying out id continue to run traffic for a few more days to see if it picks up at all, if not than maybe its time to try a new niche or at least some new angles within the niche

About Snap:

- Seems like the more CPA offer you post the more guys will unfollow you. Is the Snap game about getting fresh new Adds daily or creating more accounts?

- I think having an niched based big account is a good strategy. You can shoutout your own accounts and go from there. Would you agree and did you test it yourself?

I always ran adult with snap, never really did much else as that is what worked for me and what im best at in cpa marketing. Of course you will loose some followers but not that many, at the end of the day the guys still see tits so what if there is a link on a few of the images it doesn't affect their pleasure ;)

Its all a traffic game and quality traffic at that, you can have a 2k snap making more than a 15k snap if the quality is there. Gotta find good sources that can be automated and scaled when necessary but snap is still pretty small, wait for the 30-50's to jump on it just like they did with facebook and are doing with instagram (if instagram stories dont take over rip touch wood)

Well you would most likely be banned eventually but in my experience, the best way was with a video ad, i used to run this niche to give you an idea

https://www.youtube.com/watch?v=NqVC_4NiAjl

then i had a landing page with some images and whatnot then forward them to ogads to get this cool "tweak" made a solid \$4k from this over 10 days, very low targeting, very cheap video costs! Although after a while of doing shit like this you loose your account, and it can be rather hard to get back. So I'd recommend running whitehat on facebook, keep it for shopify or whitehat cpa products, its not worthing loosing for ogads IMO

I would say invest a lot of time into instagram now to be earning from it over the next few years, its gonna keep rising by the looks of it and there is a huge amount of mobile traffic on instagram and with tools like massplanner its a no brainer for me. You could just grow stats now, run them for 6-12 months and by that time you might have 10 x 50-100k stats, then you just sell shoutouts and run cpa on them and you're set making 100,200,300,400,500+ a day passive income

Treat instagram long term, run it like a business and grow assets!

Pretty low paying but its a start! You have to upload a fair amount of videos and get them viewed. Go for niches that are similar to the offer you're promoting for better results, try split testing different video types to see which one gets more views, and if you have a budget and time buy say 5 URL's and try 5 different areas, tracking which one gets most clicks and conversions.
You just gotta stay consistent with video upload

i have always used real info when buying domains, i use namecheap, whois is a must

and no it shouldnt, instagram ban waves come from the same link being on multiple accounts i believe, some worth while reading on this topic

<https://www.blackhatworld.com/seo/method-how-to-post-links-in-instagram-bio-without-getting-flagged.851970/>

<https://www.blackhatworld.com/seo/how-to-get-your-instagram-account-banned.882560/>

you can look into TLD's i think they are called

basically domain is like

123.domain.com

321.domain.com

otherwise you can use a pre landing page, weebly or self hosted which will forward the user to the actual landing pages, instagram have link crawlers that scan the page for stuff they don't like

so maybe if you had the same cpa offer in each landing ig could detect that and mass ban your accounts, gotta be careful but as always test the limits and join mpsocial forum, its the massplanner forum, lots of gold info in there and you can ask questions its great!

(Feb 18, 2017 10:34 PM)jayrod225 Wrote: [\[CITE\]](#) Rod, I'm about to buy ig accounts and run it on massplanner and also set up a proxy my question is do I need a vpn, do I need new phone number per acc, what proxy should I use, how many accounts per proxy and how many accounts if i put multiple same landing pages per ig?

limits are as following

3 accounts per 1 ip

1 sim per account

no you don't need a vpn, you will need proxies for your accounts to run through in massplanner, proxies look like this: 234.75.34.22:2322

actproxy.com/highproxies.com are both good for proxies

as for sims what i do is i have a cheap phone and i buy the sims off amazon for 0.01\$£ each, means i dont have to rely on a web service to do it and means i can keep the accounts for a long period, phone verifying them quickly if needed

Well say you are running 100 instagram accounts on massplanner, the robots at instagram are gonna be like wtf, this dude is running 100 accounts from 1 ip!! ahh BAN

Its suggested to have no more than 3 accounts per 1 proxy IP!

All traffic sources are capable of making money! There isnt a super profitable one so much, you just have to have a good offer, landing page, angle and proper testing

as for cpa networks

peerfly
ogads
adgatemedia
adwordmedia
cpagrip
crakrevenue
clickdealer
mundomedia
convert2media

I've signed up at some of your recommended CPA networks, what is your thought on :
<https://www.wealthyaffiliate.com> and <https://www.maxbounty.com/index.cfm>

He was speaking about using CL as a tunnel to getting people to get to his landing page, when he was posting the ad for customer service reps, he said he would send the survey, the issue is that wouldnt that get rid of any incentive they initially had to email him ? They're looking for a job and they get a survey sent to them ? its at the 25 min mark. THANK YOU SO MUCH!

Hello, I am interested in diving into CPA.

I have spare money I've been wanting to invest but yet to find something worth it.

Wondering if you have any tips on what platform I should start out on and some starter knowledge would be appreciated.

?

GoToSleep - February 20, 2017, 3:29 am

Thank you for this thread. I saw a lot of useful information and I think I'm ready to take action! But I really need to clarify some things first.

I want to take action but when I think that there are a lot of possibilites of doing CPA I'm kinda struggling on what should I chose, focus and so on.

1) I know the instagram "spam" method where you buy aged accounts and you are running them with OGAds for example (as I guess OGAds it's the best for this kind of method) but to be honest I was kinda struggling here. I had like 5 accounts running on private proxies with massplanner (different niches, not saturated and with a good looking landing page) but I guess I was kinda unlucky because 3 accounts were banned and the remaining 2 made me like 0\$. I know I should change those a little bit, buy more accounts and trying to make some money but I wanted to keep it

low, just testing. I saw it was not working for me and I quit.

2) Another thing for Instagram I guess it will be making a niched (passionate) account like dogs, cats, fitness etc and not doing cpa at all until I get at some point where I have quite an audience and then I can launch CPA offers, shoutouts, maybe a shopify store and things like that?

3) What can you say about twitter and facebook? Like what CPA can I make on those, which cpa website (maxbounty, cpalead??) should I use? Joining facebook groups and things like that "spamming" CPA offers?

4) I saw that even you mentioned about making a website (blog or how do you wanna call it) about something. Writing quality articles, doing some SEO and after that including some CPA links? I know this can take some time to build but after that everyone can find your post and if your CPA links are not dead already you can make money on auto pilot? Can you elaborate this a little bit? Like making a wordpress blog with good plugins which can help me making a nice looking website with good SEO..just writing articles on my niche and include some cpa links? How can I promote my website? On Quora, yahoo answers and websites like that?

I'm kinda struggling every time on what offer and from which one should I use. Like there are many CPA companies and everyone is offering you "the best rates". I know that I should make my own research. Like when I've wanted to start CPA by myself I joined quite a few cpa websites and tried to see which one is offering me an offer for my niche, what type of offer it is and so on. But let's say I would make a fitness blog. I guess maxbounty or clickbank are pretty good on this niche but I'm really looking on something "free". Like when I see "30-40\$ revenue per lead" but the visitor should buy something I really gave up on that offer because I think like from 3000 visitors maybe no one would buy anything. But maybe at least 100 would do a sign up thing and from that 100 people at least 10 would be from US.

5) What can you tell me about Adult CPA? I saw many things related to this. Can you offer me some advices? Like..

-a) Making a porn website with that wordpress theme where I upload videos on categories and things like that? After I can monetize this website with exoclicks or plugrush? What's the deal here? I mean I don't see any CPA here (sorry for that because we are on a CPA thread lol) but I guess this is pretty hard to monetize as I don't really have money for buying traffic and such things.

-b) Snapchat - I guess here I will make a girl snapchat using casper.io to make it looking real..spamming on which traffic sources? Like dating apps and such things and redirecting them to a dating offer? Like from CrackRevenue? Because I saw that CrackRevenue is paying 3\$ for tier 1 but as I remember the tier 1 list is pretty short and the others are kinda low. So chaturbate is offering 1\$ for many countries but they are paying shit for others. What do you recommend me here?

-c) Is there any method involving Adult CPA on facebook or instagram? Like I can create by myself an instagram account (no need for a aged one I guess) and post like sexy pics of the same girl or maybe not and trying to get as many followers as I can and to have in my bio something like " Check my live here: " and such things? And for FB what should be the deal?

Here on Adult CPA what do you think it's the best network? Like I'm on crackrevenue for a long time and I can tell that they have some pretty good offers but you've said it's good for beginners. I can tell that I like their email sign up offers and I'm only thinking of spamming them on any social media website. Do you have any other ideas? Or for the offers where the client would have to pay for a sub on their website and I get a % revenue?

Thank you very much for your time! I wanted to make my questions very detailed.

Never heard of wealthyaffiliate but it looks alright, maybe google around for reviews first, maxbounty is a solid network they have been around for many years and have always paid out for good leads.

As for CL, maybe you mean CLICKFUNNELS.COM which is a landing page/funnel creator, its very smooth and you can make some seriously nice landing pages which dragging and dropping!

As for trying to generate your own leads via your funnel (lead-gen) before getting them to take the cost per action(CPA) I.E fill in the survey for the offer, you are asking them to enter their details for your lead-gen? That surely won't help the conversion rate as the user will feel betrayed and feel like their information is being leeched by more than one way.

But as always setup 2 landing pages and split half of the traffic to each, its all about the EPC (earning per click, $SUM = \text{Revenue} / \text{Clicks}$)

All the best,

Quote:you can let me know when I can stop asking.

It takes me barely any time to blast out this sort of information which has the potential to help a lot of people, so I think you will be the one to stop asking questions before i stop answering them ;)

Awesome! Thanks too!

The way I see it is all this information I'm giving away, 95%+ of readers will never put it into action. So it's mostly wasted, I just hope the 5% of readers that do read my full thread put it into action, and ask questions which will help their process, rather than questions like:

"What is cpa"

"how do i make money"

Basic questions are not worth asking here, google can answer most simple to advanced cpa questions, to get maximum value from this thread you should read the full thing, try implement some stuff, anything but just take an action, even if its setting up an instagram account in massplanner, posting some pics and following people! Action is necessary for results, most just sit dreaming and thinking about how they are going to become this super rich and successful affiliate.

Best of luck and feel free to ask questions here anytime i try to reply the same day

TLDR: ...

As always you should read my full thread ;)

But its good you have money, not having a starting budget will seriously slow your progress at the beginning so you do need some money if you don't want to be hanging around, more money means more failing, more failing means more learning!!!

Anyway what are you good at? Give me your strengths and weaknesses both online offline and anything marketing related, past experience etc ill try advise you from that rather than being like:

"you should sell cat necklesses with shopify using fb ads"

(yes people do this and bank HARD lol! they are called passion stores/products, cat socks, dog coats shit like this..)

Finally, somebody is actually taking advantage of the information im handing out on this thread! Well done to you sir +3

Quote:1) I know the instagram "spam" method where you buy aged accounts and you are running them with OGAds for example (as I guess OGAds it's the best for this kind of method) but to be honest I was kinda struggling here. Ok so the narrative that Instagram and OGads is the best and main way to make money from instagram is completly ludacrise! Instagram is simply a source of traffic, such as facebook, twitter, tumblr, google and pornhub all are! Ogads and Instagram is not great iin my view and ill tell you why:

OGads is mostly incent offers, this means 9 times out of 10 the user gets fuck all for downloading an app or giving away their details to be sold on the information highway and hassled until they get a new identity xD

So what does this mean?

It means an extremely bad user expereince! Which leads to people reporting your accounts for being fake bullshit scams that they probably were.

It also means 9 times out of 10 you are forced into running fake bullshit scams like, free iphones, game hacks and other fake bullshit scams that go along with this business model!

As for accounts being banned, that could of happened either by a few reasons from the top of my head:

If accounts were sharing proxying 3< per ip accounts could of been linked after 1 was banned
Accounts were reporting
Bio text was similar
Creatives (i.e the media images/photos) were the same across multiple fake bullshit accounts!

Or most likely the URL was the same across multiple accounts OR the URL was a direct link to the ogads landing pages, meaning instagram's 'crawlers' that scan links and landing pages found that your landing page was doing to

HorribleCPALink.BlackListed.Scam/48u538y3tr/48yehd/ntkgihufe/jdjd

Quote:2) Another thing for Instagram I guess it will be making a niched (passionate) account like dogs, cats, fitness etc and not doing cpa at all until I get at some point where I have quite an audience and then I can launch CPA offers, shoutouts, maybe a shopify store and things like that?

OK nice! This is another great way to utilize the traffic source we call Instagram!

It helps if you pick a niche that you actually have a passion for, I.E weed or cars! Because if you're not passionate for the thing you're doing how do you expect to fail many times and still have the motivation to carry on, Only a mad man would do that? Our society we are used to the easy way, if something doesn't work then you get someone else to fix it or buy a new one. You have to be prepared to fail literally 100s of times! This may mean you get accounts banned on IG but so what, you try again with twice as many and track everything better, being sure to split test exactly what could of banned so that you can get to the bottom of the bans!

As for Instagram and shopify, many people are doing huge volume with this.

Either you can go down a few routes from the top of my G-fueled brain this morning:

Instagram Ads!

Instagram Stats! (Growing multiple stats over a time period, using each other to help grow + shouts)

Instagram Stats (Buying shoutouts to your personal IG)

Instagram mass following!

Which ever one you do pick, don't go back on it

Personally, depending on your situation, I would go for the Instagram Stat Building! You will need patience and money for this but the results will far exceed the wait time and effort put in!

So what do you do?

Pick a niche

Create 5/10/15/20 IG accounts, bios, post lists, captions, content, account builds etc etc

Find 5/10/15/20 unique sources

Now each stat you start growing you can test different sources of traffic, account builds, content and all the good stuff, which means you are collecting 20 or even more sets of very useful data! It's like when you were in school chemistry or biology classes, doing experiments on nature or whatever, you always used to test multiple variables and never just the one thing!

Instagram has just passed 600m users! There are currently over 1.8b on Facebook and 3.5b+ connected to the Internet!

What does that mean? Well if Instagram keeps growing the way it will then soon it will be well over a billion users and my estimate it will reach 2b some day. What you should is start now, start building stats and run them from now until july, build up assets for your business! Stats are so diverse in terms of ways to monetise them! Shopify, shoutouts, cpa etc!

Quote:3) What can you say about twitter and facebook? Like what CPA can I make on those, which cpa website (maxbounty, cpalead??) should I use? Joining facebook groups and things like that "spamming" CPA offers?

So facebook and twitter is pretty different in terms of how the platforms work and the restrictions.

Facebook:

Either you do:

FB ads: Potential to make high ROI's

Risk of losing accounts unless its pure whitehat methods

Need sufficient cash flow to scale

FB group spam: Need quality aged accounts

FB have checkpoints/ ID checks etc which can be a problem

URLs need cloaked and get banned so you will need to replace fairly quickly

FB group finding, joining and posting can be automated with tools such as MP

FB Private message marketing: This consists of usually have a fake profile and marketing over the PM system!

[Read this to get your mind thinking about this style of marketing](#)

Quote:4) I saw that even you mentioned about making a website (blog or how do you wanna call it) about something. Writing quality articles, doing some SEO and after that including some CPA links? I know this can take some time to build but after that everyone can find your post and if your CPA links are not dead already you can make money on auto pilot? Can you elaborate this a little bit? Like making a wordpress blog with good plugins which can help me making a nice looking website with good SEO..just writing articles on my niche and include some cpa links? How can I promote my website? On Quora, yahoo answers and websites like that?

Ok yea, I am pretty noobish to SEO although i am going to be learning a lot more about it over the coming months!

So for example you would setup a Wordpress site, based around something. For example a review of Lawn mowers, the site would have amazon affiliate links in it which you would get a % of the sale! Then you would SEO it and attempt to rank the site for a fairly uncompetitive niche.

As for cpa links you can do this as well, try find a few good converting offers and then create the

content around that rather than in reverse!
SO for example

Dating website review:

Cpa links to Pay per sale dating offers and a review of each one. You can pay people to write articles on topics from places like fiver or whatever if you have the money to spend on that!

Another example:

Vouchers-Hub

Maybe your website Vouchers-Hub is the place to go to find cracking deals for both online and offline! A lot of poor people out there trying to save money! You would update the blog daily or weekly with great voucher offers, walmart gift cards, free grocery type vouchers etc Along with reviews, testimonials and graphics. Once you have a solid blog and "brand" you can start taking it to social media as well, promoting it via youtube, IG, fb, twitter and traffic sharing between them all. It does seem like more work doing this but setting up a full passive income operation is never easy gotta put in the work!

Quote:I'm kinda struggling every time on what offer and from which one should I use. Like there are many CPA companies and everyone is offering you "the best rates". Don't get hung up on the best cpa network, there are literally over 10,000 cpa networks out there to choose from!

Just go with a big one that you know are legit, maxbounty cpagrip etc to start, i assume you are pretty new to cpa so you just need to get your foot in the door, most of the best cpa networks don't let anyone in, they phone you, require to see volume of payments and traffic from other cpa networks and sometimes even need to speak to your old Account Manager!

Also, the amount of traffic doesn't matter in cpa. You can send 100k visits to a landing page but if it's a shit offer and shit funnel you won't get one conversion, people aren't cattle, you can't just send them to a webpage and expect some to convert, they all have brains too!

Always aim on quality traffic at the start, because cpa heavily depends on the advertiser making money as well! Otherwise there wouldn't be any offers for you to run in the first place. Everyone has to be making money for CPA to work. SO focus on sending quality leads so you have more leverage and don't get kicked off the offer before you have really sent a lot of traffic.

Quote:5) What can you tell me about Adult CPA? I saw many things related to this. Can you offer me some advices? Like..

And for FB what should be the deal?

a)Ok so yea, exoclick pay pretty well to have their ads on your site, problem is actually putting up quality content and getting traffic Why would someone go to your shitty porn site when they can go to eporner and get full free HD porn?

You have to go very niche targeted with adult tube sites these days, so for example. Femdom, Black BBW, Granny porn. Mainstream standard porn sites are much harder to promote and get viewers coming back, identity a growing niche in porn and do that, TS(trans porn) is on the rise I believe!

As for monetising it you have 2 main routes:

Have ads on your site, banner ads, popups/unders from a place like exoclick

Or

Have your own offers on your site, dating offers, cam rev share etc But if you have a niche specific porn site you can base your offers around that so:

If you have a gay porn tube site, you would have a gay cams affiliate offer around your site!

But as always you should split test having your own offers versus having other people's ads from places like exoclick to see which one makes you more revenue, you will never know until you try it im afraid!

b) ok so yea, pretty much you have answered mostly what you would need to do for this method. As for what to promote I always did tier 1 dating offers! About 80-90% of the traffic was US/UK/CA/AUS which is fine for tier 1 offers generally.

Snapchat only has 150m+ people and most of them are from developed countries, god forbid when Saudi moves onto snapchat :(

Anyway, you would buy a domain such as, FuckSlags.com and have it URL forward to the offer URL and post it on the story! Apart from that all you really need to do is spam around your username in as many places as you can consistently to keep the traffic flowing in! As for the network i would stay away from chaturbate haven't heard great things, for adult stick to crackrevenue until you actually send some leads and clicks before moving to better places. Not a whole lot of adult cpa networks would take you on without any past experience!

c) As for FB adult its not too great, they have restrictions but as always there is of course adult spam, simple hot female accounts posting in fb groups saying things like, im on cam here, anyone want to chat, my nudes are here, which will take them to a cloaked dating offer url landing page!

Refer back to my reply at the bottom of Q3 for a thread on fb adult promoting!

For instagram the possibilities are still there but expect lots of bans testing and trying out adult on IG, you have to be sneaky with the mainstream places that strictly don't allow adult content. If you're starting out with adult i would do snapchat to start with and get a feel for the whole scene.

Quote:Here on Adult CPA what do you think it's the best network? Like I'm on crackrevenue for a long time and I can tell that they have some pretty good offers but you've said it's good for begginers. I can tell that I like their email sign up offers and I'm only thinking of spamming them on any social media website. Do you have any other ideas? Or for the offers where the client would have to pay for a sub on their website and I get a % revenue?

Crak is good for spam because they have a lot of low quality traffic from their affiliate so they are pretty used to it, a lot of adult cpa networks won't put up with that and will kick you off the offer if not enough Free Signups never end up converting on the back end I.E buying a membership on the dating/cam site!

But you can try sites like, vipoffers, monsterads, clickdealer and mundomedia for much more adult sites, just be careful with quality, make sure to check with your manager before sending \$1k in leads or whatever!

Other ideas for adult would consist of Media buying, I.E buying banner ad space on porn sites, sending them to a landing page and then to your offer! Its arbitrage!

Yes you are talking about revshare, revshare is always harder to promote and usually done by more experienced adult affiliates who are either a webmaster or have a lot of money to dump into testing a revshare offer! check out gfy.com for a lot of worth while adult reading!

So when doing CPA on IG is it better not to scam the users which complete the offer or does not matter ? Speaking of a saturated niche with gift cards for example.

Solid proxy provider with about 40k visits a month to their site, well known and for the most part have decent proxies. I left them temporarily because they gave me a set of proxies that got accounts banned instantly so i was a bit pissed off that why i went to highproxies for a bit but im back with actproxy now for some account builds.

Hey man, cool thread! Just finished reading it, like it a lot, very helpful! Just need help with something... How do I insert a content locker or captcha locker into my website. For example, instead of using a direct link on my site, how do i lock the url when the user clicks on my website url (html wise)... for example, I want the user to see this upon clicking on my VALUable content- "sorry content is locked until you download a free app" and after they click and fill out offer/download app, I actually want them to be redirected to the content, therefore it's not a scam and it will spread better. Help?? Also, i have been recently dm'ed on instagram about a free giveaway (happened to be a new weed pipe) and the person who sent it had a captcha locker making users verify if their human by downloading an app (very lucrative btw) and unfortunately for him, I knew what he was actually doing, but still did the offer, asking/hoping in return the answer of what I just asked you above. As you may know though, he never responded and left me with a sense of mystery, but I believe being that I've profited with cpa before, I should know how to do this. I am sure it's super simple, but just could not find a specific way of going about it, therefore im asking you... Hope you can help me and thank you in advance!! ??

p.s.

I believe that once I find out how to accomplish this simple integration, I will profit very well!! ?

Thanks for reading my thread in time i appreciate your attention!

As for ogads content locker i assume you want them to be confronted with the app install locker page before the full site loads?

It may cause a problem when instagram is scanning your link and finding an instant cpa offer link. Can't say iv ever done this style so i think you will need to play around a bit with yourself

or hire a coder to look into it, altho prelanders work better 90%of the time rather than making them complete an unknown action before the site even loads

never know tho until u try it

I have a rather large snapchat acc whilst pulls around 5k views each story.

The niche is adult/ewhore.

I'm wondering where the best place to start & a few tips that would boost me.

5k isn't huge to be honest! When i did snapchat i had accounts between 10k,20k and some 30k's, the number of snapchat views is irreverent anyway!

If the views are shitty and they don't convert then they are worthless, iv had some 5-6k accounts make \$200 in a single day while 20-30k adult ones only made \$70-80

Traffic quality is key, preserving your traffic and not just spamming it hard to the followers hate you, give them a few nice pics and the slip in a link in a middle photo, try keep the same girl if you can altho its not necessary! But opens up the possiblites of having an auto buy store to sell pics/vids on too as well as cpa dating offers!

Join the snapchat famous group run by Krave!

S4s with people and build up, join crak and start promoting some offers, do at least \$1k there before applying for better networks as the higher paying networks require proof you can earn and quality!

Thats another reason to maintain HQ leads, so you don't get kicked off the offer or cpa network

As for traffic, you will need to find your own method to make a ton, as for common methods:

forums
dating sites
porn sites
mobile apps/ mobile dating apps
reddit
social media
fb groups

Thank you for your detailed answer, Rod\$!

I forgot to mention something about youtube. I saw that a lot of people are making youtube videos, ranking them and making money with CPA on auto-pilot. So what's the catch?

I mean, all those youtube videos would be about fake things (as instagram) but you need to imply some work as making some fake generators and making the youtube video (I can't think about something else. I saw others doing this and I founded by myself some videos. I guess this is the over saturated method..just switching the niches when something new appears). After that you rank them up (here..what should I do? I've read that you just need to send some HR views, likes, some comms and the video it's ranked up? + some keywords). What kind of CPA should I use here? Is there any other "method/niche" ? I saw the movie niche where you upload some parts of the movie or nothing (just an image so the youtube doesn't get down) and you make the others to enter to your movie website to watch the latest movie..bla bla. What kind of CPA should I use here aswell?

Thank you very much! You are the real MVP. ?

Well if you're good at business and marketing it shouldn't matter what you do ;)

"Sell me this pen"

On a serious note,

Seems like you are running hf businesses which does get your feet wet in terms of running an online business but it doesn't prepare you much for a real customer.

You're gonna want to start a brand or something, an asset that doesn't just fade away, something that grows over time as you grow. Something that can eventually be sold if necessary. Something like shopify may be good for you, you have to find what you like, what you're passionate about and create a shop around that. You can't just jump into any niche and expect to do well, it might take 3 stores before you get more than 5 sales a week but that's just the way the cookie crumbles in this game. Determine what you like in real life and what makes you get out of bed, build a niche around that. I can't tell you what niche or area to get in too, you need to decide this yourself, then I can help you on how to promote it and such.

Best of luck, don't let your motivation fade.

Mmmmmmmmmmm let me roll some ideas out

Ok so in terms of the platform its self, you have 2 options to send out content to the world:

1: Live content, taken by you in real time or close enough.

2: Using a tweak of the app, to upload content which is not yours

1: This will require more skill, you will have to upload content daily either of yourself or the niche you're in which may prove difficult. For example, comedy niche if you're good at making quality comedy content you could build that up and post daily funny videos.

What else, dogs, cats, nature, cars! All these things would work if you can keep up with the consistency which again might prove difficult unless you are on the move all the time. But chances are you are in school or stay in the same place most of the time meaning the organic content you can provide is probably limited based on real life circumstances.

2: Ok so this is going to be a lot easier but obviously more FAKE. Which is not necessarily a bad thing. For this you will need to grow a niche same as I mentioned above,

Cars, boats, animals, comedy, news memes!, weed etc etc etc

Problem is snapchat is not as much a conventional social media as the rest, it's harder to find organic traffic with snapchat, so almost always you are going to need to create a circle around your snapchat

Meaning you will need to be active on other social media platforms, using them to grow your snapchat, such as facebook, instagram twitter reddit tumblr pinterest and so on.

As for monetising it there are a number of ways you could monetize it

Shopify

Cpa

Shoutouts (company and user based)

Snapchat traffic is pretty valuable because if you have 10k adds, it's suggested that 90% of your followers watch your story everyday!

That's a huge amount of people and attention, 9k out of 10k followers direct see your content! Not many other platforms can do that atm

Anyway give me your thoughts

(Feb 21, 2017 03:50 PM)Summer Vibe Wrote: [\[CITE\]](#) Can I log into my multiple IG accounts from my PC and edit my description and profile pic or would that be suspicious for IG ?

Instagram accounts would almost always be flagged, it's not just about the IP it's about the device data as well, instagram logs everything! You have to be super clean and take every precaution or face risking a ban later down the line

In this exact order

Join Crak revenue
Find a dating PPL offer
Buy a related domain - Examples(snapfucker.com)

Put a URL forward on the .com domain to the PPL offer
Post the .com domain on your snapchat story along with an image and text such as:

Webcam offer: "See me on cam tonight at Cunt.Com"

Dating offer: 'Fuck local Sluts at Cunt.Com"

You need to buy a .com bro and you need to get more traffic, 100 adds a day aint much, you need to get 1k a day to make decent money from snap and it has to be everyday

setup more snaps and try more traffic sources, only use 1 snap per traffic source so you can track the adds from that source. otherwise its pointless testing a source if you cant track the adds

For almost 2 years when i did snapchat i always just logged in at night time and posted a story, the automation tools i used were mainly C# bots i got coded to automate apps and website

for example a bot to post on multiple forums, run it once a day, instant 500 adds a day from running that bot

another bot i had made was a reddit posting bot that was another decent 500-1k adds

Find a source, test it, automate it, move on

And how exactly is this going to drive traffic to my niche website?MassPlanner is a tool that allows you to automate social media accounts. Take Instagram for example, if I have 50 Instagram accounts, I can use MassPlanner to automate everything - from Following / Unfollowing, Commenting, Liking, Messaging etc. How does this bring you traffic? Well, with Instagram you can link your domain in the bio (description) of the accounts so that when people see your account, there is a change they may go to your site.

It usually involves buying aged accounts (to avoid bans / speed things up), Buying Proxies, and having a VPS to run MassPlanner 24/7. If done correctly, in a good niche, I'm sure it can generate some good traffic.

Currently using gaming niches, what are the best sites to get users to visit ur site, and is buying advertisements worth it?

iNuno - February 24, 2017, 3:43 pm

Hey back again, Rod :D

I will start with youtube soon I think it's more worthy than Instagram at this point, I'm having so much issues with Instagram... it's a mess. Whatever, could you give me some tips?

How I can make a good hack proof also a good niche to do with youtube? What you think I should focus on in youtube? Giveaways, hacks...?

See you soon :D

Right now I'm growing an instagram account that I bought from the one in your thread. I'm building it up with the bot running and a coke or pepsi survey link in my description saying its for my stats midterm. Is this going to get me any hits? Because it hasnt yet haha

orochimaruhf - February 24, 2017, 4:44 pm

should i put banner ads on my LP? Or would it lower my CR to the point where it would not be worth it?

Thanks.

Gaming niches as in game hacks or promoting real game apps?

Let me know ?

I'd suggest sticking with Instagram it's really not that hard once you learn how and why you are being banned, plus it seems you have spent a nice amount of time on it, jumping to Youtube is the easy way out and you will likely run into problems as well on the platform.

But what can I say you are promoting game hacks so you are always gonna be running into bullshit problems, it's just the area you're in. Why not try something a little less blackhat in terms of cpa?

Ideas:

Building stats: monetise via shoutouts/shopify/cpa

Building a shopify and using Instagram to drive traffic: monetise via dropshipping products for a high ROI

Or even just promoing email submit/zip submit cpa offers, Setting up a blog with proper cloaking, giving the user an actual valuable product or service. Right now all you give the user is nothing! This is good for short term cash but don't you want to build a business here, building real assets that retain their value rather than just burning n churning blowing all your money.

Keep up the work iNuno, you'll get there. You're taking action which is more than 90% of people that want to make money online ever do.

Pleasure answering your question, and thank you for reading my thread!

Well,

Are you diect linking or a pre lander. Watch out for throwing links in your bio's make sure to properly warm up accounts. Read this: <http://123accs.com/how-to-warm-up-instagram-accounts/>

As for clicks, its early days and you only have 1 running? With these types of offers you can only expect to make a few dollars upto \$5-10 max usually, so you must have more.

Also you are only testing 1 variable here, you need to test multiple variables at the same time otherwise you're just wasting time.

You need to setup more accounts and test more traffic sources!

I just came across this awesome script too, you can quickly see which sources are working well and which arent by exporting the follow results on MP and running it through python!

Questions ?

I wouldn't personally but it depends really, although like everything you never know until you try so always if in doubt test!

Usually simple clean landing pages work the best from my experience in cpa marketing, crowding the user more bullshit can often lead to a bad experience causing them to click off it

But of course, try segmenting some of your traffic to another LP with the banner ad on and see if you get any clicks, measure if its affecting the EPC on the main offer in a good or bad way, of course you will need a decent amount of traffic to get the proper data needed to make that all important DATA DRIVEN DECISION

Do you know of any snapchat bots?

Rod\$ - February 28, 2017, 4:28 am

In terms of snapchat bots there arent many public ones for posting/auto dming/auto adding, Capser.io Dev sells the API for a monthly rental to use.

As for Bots to get snapchat adds you should look into paying a coder to automate a site which has potential, a classic one at the moment is people automating the mobile app called Yellw, this can be mimicked with many other social hookup style apps and sites even with iMacros for firefox. I talk about a POF.com > Snapchat method earlier in my thread if you have the patience to scroll back and find it

What would you suggest is the best way to optimise my Instagram campaign as I keep getting accounts banned,

Currently, my accounts keep getting banned all 1-month accounts email verified, I run 4 accounts per proxy paying \$3 per proxy and I currently run on a \$12P/M VPS. Any idea how I could stop getting so many bans

For proxies i would recommend actproxy, i have been using them for well over 2 years without many problems. You can get them here for \$1.30 each! Run 3 IG's per proxy so that the proxy is only costing you \$0.40 a month per account ran!!!

My ref link to the site: <http://actproxy.com/aff.php?aff=396>

As for accounts you should get 6 month aged accounts, aged accounts save you with a massive slow restricted time period at the start and an quickly be moved up to following over 1k people a day!!!! HUGE NUMBERS

Also phone verified is needed, i buy my accounts from youtube comments his autobuy link is here: <https://goo.gl/2mz4nh>

Let me know how you get on with these adjusted configurations, should avoid bans!

Also let accounts sit for 12 hours after adding them to proxy and editing bio/name/pic! Top tip

Cheers

Anyone else needing help feel free to ask

jayrod225 - March 2, 2017, 3:04 pm

Rod, do you know a tool that I can use on snapchat that my photos on gallery can be post on "my day post".

RBH - March 2, 2017, 3:18 pm

Well I don't want to make a new thread but a quick status update since I started a couple days ago on the niche accounts:

Every number represents an account and the number of followers it has.
Last accounts were added today (last hour).
First account was an older account I played with about a year ago.
I hope to post more of this to keep me motivated, thanks for the help rod.

Yes i believe i understand what you mean, posting image from gallery to story to fool the unsuspecting horny male into thinking you are a girl therefore making them take action to signup to the cam site! ;)

WOOT Nice got accounts running, early days but you are getting a glimpse into some early results of the split test, make sure to log everything, id recommend <https://docs.google.com> free online sharable excel!

Well done for taking action, ill be here every step of the way. Feel free to ask whenever

You are a big motivation for me. I'm running since 2 months now a small business. I can run it semi-autopilot (1 hour a day) and gave me 1500\$ a month. I have plan to start again with YouTube

(CPA have video's), I did that a few months ago. That was going pretty well. I just need someone who can create the video's, but never mind.

I will start soon with Facebook ads. At the moment I don't run any ROI with it. Most of the time just 100% - breakeven. Thanks for this! ?
