The UI looks really good and the Chart game looks interesting. But could you explain the 0.2% house edge for chart bet?

Gay - January 7, 2017, 11:24 pm

(Jan 8, 2017 12:23 AM)Canonsx130 Wrote: [\[CITE\]](#) The UI looks really good and the Chart game looks interesting. But could you explain the 0.2% house edge for chart bet?

The house edge of chart bet is 0.2% which is very low (that is good for you :-). The house edge is applied every time the chart is updated. It works like this: We compute two numbers, a positive number which determines how much the chart changes, and a second number that determined whether the change will be upwards or downwards. We apply the house edge to the second number, this means that the change for a downward change is 0.2% higher than for an upwards change.

There are some things messed up with your website that could do with being fixed, I don't know whether they are intentional or not.

1 thing I noticed is that not all the links for the game light up as if they were active when you mouse over them are they all defined in the HTML/CSS?

TehFoxie - January 8, 2017, 7:35 pm

I love the overall design of the page. Many colours working together and very good used minimalism

Just confirmed this problem as well also occasionally the faucet breaks lol like you do the captcha and it just sits there and doesnt do anything and you have to wait like 5 minutes and refresh the site and then usually it work. This is with waiting over 3mins for the cooldown as well. Also another question can you prove this site is provably fair or do you claim it to be? Like bustabit and satoshimines provides hashes that can back up the legitimacy just wondering if you have something of the sort?

I really do like the layout, when I first got on the site the loading graphic was very eye catching. I like the colours which blend well with each other.

The site's colours and simple layout makes it even more fun and easy to navigate around. Registering was a breeze for me.

I also liked that it's provably fair. And a variety of games available. 6 games that are unique and fun to play. The only thing is the text is a bit small especailly when I read the leaderboards.

I particularly liked the in game chat offered on each of the games.

Easily among the top BTC gambling sites the web has to offer - through a combination of minimalistic graphics and a simple, yet highly effective UI.

Really easy on the eyes, streamlined for long hours of playing with assistance in the form of BurnsBank (props for being a great mod)

Will appreciate added functionality such as:

- 1: Enabling/Disabling Sidebars (Chat / Users Bet History)
- 2: Improved usage on older computers.
- 3: Streamlining of playing on mobile devices (which can be partially aided by implementing suggestion 1.)

Thanks for the good times!

Here is a more in-depth review of the gambling website.

When you first sign up you immediately get some bitcoin to gamble with. The games are somewhat fun and they can defiantly make you more money. There are options to choose of how much you want to risk but the more you risk the more you could win. I believe the majority of the games on here are slot games and they all the typical slots you usually see. Anyways, you do have to deposit some bitcoin in order to withdrawal anything so this may be a issue for some. The website design and game designs are very high quality and professional and I defiantly think that it fits the website well. Overall, it's a great service and I could see many people winning money with this to their advantage. Good luck everybody ?

I'll start off with Double or Nothing is my favorite mode so far. Its simple, fun, and easy to make quick bets which I like. The design is simple and clean, the only thing I would change is when you are in a game mode and going to a different one you don't really know which is which. So like maybe a logo next to the names or just an easier way to navigate from game to game. Overall I like the site man, good job!

It's because of no https.

Yeah, lol I know that but the fact he's offering a price for so many registers and well, there's no HTTPS protection seems just a tiny little bit shady to me.

Nice and Simple UI.Will play everyday.

Techmech - February 28, 2017, 10:49 pm

Its a very nice site.

Looks better than those 1m per day sites

UN -Techmech

tbh i really like it already.
Better than most sites.
Easy and looks cool.

enmafia2 - February 28, 2017, 11:57 pm

The website looks great, the design is gorgeous and I love the diversity of games, really liked. Good job my friend :)

Before this I didn't really like faucets and bitcoin gambling sites because they were so hard to understand and you never get paid out. This one is very straightforward and I see I can withdraw if I wager 5000 a week. Cool!

Also got the affiliate link to try that out!

I tried all of them but the one I like the most is rocket pot!! I was down to like 5 bits and I clicked Low Risk and use my entire bank role and I won 23.55 bits!! Yeah thats 4.65x what I had!

Really cool!

EDIT: I ran out cause I did a very high risk thing and it said I could ask for a tip. I did and they gave me 100bits cool!!

EDIT: Trying out affiliate link for anybody that wants to try
<https://hackforums.net/showthread.php?tid=5563834> lol

EDIT: One last thing. user burnsbank at fastbets.io said they don't usually like people asking for tips, but the website suggests that once you have 0 bits in you bankroll. you may want to change that. Oh and I love the faucet. Every three minutes you can get 5 bits!
