Thread: [Smeg Hack - GMod Cheat](#)

Avoyel - January 7, 2017, 12:55 am

I am not the original creator of this file. I am simply sharing it to this community. Credits: mmmmaaalll1

I am sharing this .lua file because I usually use it when I am cheating in Garry's Mod. It's great for DarkRP and pretty much any other gamemode, and it's been around for a while.

Download: <http://www.mediafire.com/file/nkutc4zbp327r8q/smeg.rar>

Cheat Information Spoiler ([Click to View](#))

Main

- Unload Hack (Removes all hack hooks)
- Reload Hack (Removes hooks then reloads them)
- Clear Saved Files (Deletes all saved configurations)

Aimbot

- LOS Check (Only aims at visible players)
- Auto Wall (Aims at players who are visible or who are behind walls that can be shot through)
- Auto Shoot (Automatically shoots when locked onto a target)
- Aim On Key (Bind any mouse or keyboard button to the aimbot)
- Aim Priority Distance/Crosshair (Aims at person closest to you/aims at person closest to your crosshair)
- Smooth Aim (Makes your aiming more realistic, e.g. reduces snapping to targets)
- FOV (Only aims at people within a certain field of view)
- Stick To Target (Will stay aiming at the same person as long as they meet LOS check requirements)
- Bone Aim (Prioritize which bone to aim at from the skeleton on the right of the menu, right/left click to cycle through bone priorities)
- Team, Opponents, Friends, Enemies, NPCs, Spectators (Aims/Ignores players within these categories)
- Offset X (Aim at X units away from the player on the X axis. Note: Buggy when close to enemy)
- Offset Y (Aim at X units away from the player on the Y axis)

ESP

- ESP (Master toggle for all ESP options)
- Team, Opponents, Friends, Enemies, NPCs, Spectators (Shows/Ignores players within these categories)
- Boundary Boxes 2D/3D (Draws a box/cube around players)
- Name Tags (Draws player's names)
- Weapon (Draws the weapon the player is currently holding)
- Distance (Draws how far away you are from other players)
- Health (Draws how much health a player has)
- Skeleton (Draws the bones of the player)

-Crosshair (Draws a crosshair on your screen)

-Entity ESP (Toggle entity ESP on/off)

-Name Tags (Draws the name of the entity)

-Boundary Boxes 2D/3D (Draws a box/cube around entities)

Ents

This is a menu which displays all entities currently on your game, from here you can add/remove specific entities which you want to show up on the entity ESP. Entity configurations can be saved by clicking "Manage Saves".

Misc

-Clock Speed Manipulator (Speed/Slow motion hack, fixed in the latest version of gmod, don't use)

-Admin Box (Display all admins on the server, orientation options available)

-Spectators Box (Displays all players currently spectating you, orientation options available)

Friends

Add/remove friends from this menu to be included/ignored for the Aimbot and/or ESP. Friend configurations can be saved by clicking "Manage Saves".

Cams

-Cams (Master toggle for all cam features) <-Pretty pointless, but I was originally going to have a lot more features

-Client Side Noclip (Allows you to fly around the map and see what's going on, however your actions cannot be seen by other people and you will not be able to interact with anything)

-Thirdperson (See yourself in third person mode)

Bhop

-Bhop (Master toggle for all bhop features)

-Fast Walk (Makes you walk slightly faster on bhop game modes only)

-Auto Hop (Automatically jumps while you are holding space)

-Auto Strafe (When you move the mouse your player will automatically strafe)

-Edge Jump (Automatically jumps when you are X distance away from an edge) <- Calculates the distance of the edge from the direction you are moving, NOT from the way you are facing.

-Sideways (Makes sideways mode feel like normal mode)

-W-Only (Makes W-Only mode feel like normal mode)

Spam

-Spam (Toggles chat spammer on/off)

-Delay (Time between spam messages in seconds)

-Anti-Anti-Spam (Puts a random number at the end of your message to avoid anti-spammers)

-Up to 5 messages can be inputted, only the ones ticked will be spammed

Config

Load/Save hack options you have selected (Note: Ents and Friends have to be saved seperatly within the Ents/Friends save manager).

It's not that old. Most of the things in it still work.

CapitalOG - February 5, 2017, 2:42 pm

I was wondering on how you get the menu to pop, i've got the hack to run but i can't figure out the way to bring up menu.
