Pumpkins - January 8, 2017, 6:59 pm

A new thread is coming soon.

LanMan - January 8, 2017, 7:22 pm

Nice, something unique for a change !

With all these upcoming java RAT that's a good thing.

Edit: your site is all broken on my side (+ non-verified ssl warning)

Any page is particular? All works on my end.

And yeah, I thought something like this would be needed, so I'm just putting it out there. ?

I got that on the main page, and others like TOS page.

Purchase page seems fine.

Ye, GLWS. ?

French Products - January 8, 2017, 9:06 pm

Ahhhhhhh you had a great idea, GLWS.

I'm so happy to see a java crypter since some years.

Computerjul - January 9, 2017, 1:15 am

Will this work with SllentBytes or isnt this neccessary for this RAT ?

Ar1a - January 9, 2017, 1:59 am

after a long time have seen a Java crypter.

(Jan 9, 2017 02:15 AM)Computerjul Wrote: [\[CITE\]](#) Will this work with SllentBytes or isnt this neccessary for this RAT ?SilentBytes is coded in .net so it wont work with this crypter.

Computerjul - January 9, 2017, 2:04 am

Whow .. did u just say .net ??? Could u explain to me what the fuck i am missunderstanding here becausei thought it is a java rat without any dependencie.. coder said a crypter wont be needed .. on the other hand u just said somewhere else that most java rats will not stay fud at all and u updated ur crypter for java rat.

Thanks in advance

IntelCore8700K - January 9, 2017, 2:06 am

Pumpkins do you offer any discount to OSCelestial owners? Lmk man

We have transferred to https. We are also in the process of accepting card payments - cheers!

Dief - January 11, 2017, 3:52 am

Just bought the crypter, looking forward to use it. Could you tell me if it works with OSCelestial?

Thanks.

joeing777 - January 15, 2017, 10:47 am

Its made by him.
OSC already has this built into the builder process. Its the only one.

joeing777 - January 15, 2017, 11:31 pm

Its not working on the other Java rats. Not working for Jrat, not working for Unknow rat.
Please jFuzzle has not been working for me since i got it. Please help me out. I have tried everything. Help me out.

Pumpkins - January 19, 2017, 11:59 am

New update coming soon for ignoring particular packages/classes that do not run particularly great through a classloader.

joeing777 - January 19, 2017, 2:32 pm

am waiting for it, nice one

jp78 - January 20, 2017, 7:14 pm

I downloaded it when it was free, and it worked very well so nice job. I do have a suggestion though, command line control, for stuff like CI servers.

joeing777 - January 22, 2017, 3:54 am

Are we good to go Pumpkins?

Almost, re-fudding today and releasing a new update for better support of all java programs.

joeing777 - January 22, 2017, 9:53 pm

okay. let us know. we are waiting for it.

Pumpkins - January 23, 2017, 5:42 pm

Refudded today.
I am close to finishing the increased support update, it's quite complex.

joeing777 - January 25, 2017, 2:01 am

Is this the last version ...jFuzzle_215
Please confirm it, cos its not fud

It shrinks whatever you crypt by a slight amount from the compression, the base stub is about 15kb
I have not tested netwire message me about it

Sent you a PM, please kindly respond.

Pumpkins - March 7, 2017, 9:44 am

All licenses extended for 14 days due to me not being able to update whilst away on a last minute business trip.

I have pushed an update:

-Main class is now obfuscated, and the manifest reflects the new location.

-The base package for obfuscation is now given a random name.

-Paved the way for another obfuscation technique I plan to introduce - control flow obfuscation.

The aim is to make jFuzzle do all the "re-fudding" for me, by using intricate byte-code manipulation methods.

v2.38:

- Increased randomisation of class and method names.
- Insertion of dummy fields.
- Insertion of dummy try-catch blocks.
- Control flow obfuscation (random (nested) for loops).

All existing licenses are extended for 45 days. If your license has expired recently, use it again to gain access.
