Thread: [Unable to install libgraph, error while using "make" & "sudo make install"command](#)

skyte98 - January 7, 2017, 8:00 pm

Hey Guys,

I'm trying to install libgraph (to use graphics.h in c++) on my kali linux machine. When i run ./configure in the libgraph folder it runs just fine, however i get an error while using the make command. Here's the error :

```
root@nikhil:~/Downloads/lib# make
/bin/bash ./libtool --mode=compile gcc -g -O2 -I./include -D_GNU_SOURCE=1 -fvisibility=hidden
-D_REENTRANT -DXTHREADS -I/usr/include/directfb -D_REENTRANT -D_REENTRANT
-DHAVE_LINUX_VERSION_H -c ./src/video/SDL_RLEaccel.c -o build/SDL_RLEaccel.lo
libtool: compile: gcc -g -O2 -I./include -D_GNU_SOURCE=1 -fvisibility=hidden -D_REENTRANT
-DXTHREADS -I/usr/include/directfb -D_REENTRANT -D_REENTRANT
-DHAVE_LINUX_VERSION_H -c ./src/video/SDL_RLEaccel.c -fPIC -DPIC -o
build/.libs/SDL_RLEaccel.o
./src/video/SDL_RLEaccel.c: Assembler messages:
./src/video/SDL_RLEaccel.c:831: Error: operand type mismatch for `movq'
./src/video/SDL_RLEaccel.c:831: Error: operand type mismatch for `movq'
./src/video/SDL_RLEaccel.c:831: Error: operand type mismatch for `movq'
./src/video/SDL_RLEaccel.c:831: Error: operand type mismatch for `movq'
./src/video/SDL_RLEaccel.c:930: Error: operand type mismatch for `movq'
./src/video/SDL_RLEaccel.c:930: Error: operand type mismatch for `movq'
./src/video/SDL_RLEaccel.c:930: Error: operand type mismatch for `movq'
./src/video/SDL_RLEaccel.c:930: Error: operand type mismatch for `movq'
build-deps:536: recipe for target 'build/SDL_RLEaccel.lo' failed
make: * [build/SDL_RLEaccel.lo] Error 1
```

Also I'm getting a similar error for sudo make install :

```
root@nikhil:~/Downloads/lib# sudo make install
/bin/bash ./libtool --mode=compile gcc -g -O2 -I./include -D_GNU_SOURCE=1 -fvisibility=hidden
-D_REENTRANT -DXTHREADS -I/usr/include/directfb -D_REENTRANT -D_REENTRANT
-DHAVE_LINUX_VERSION_H -c ./src/video/SDL_RLEaccel.c -o build/SDL_RLEaccel.lo
libtool: compile: gcc -g -O2 -I./include -D_GNU_SOURCE=1 -fvisibility=hidden -D_REENTRANT
-DXTHREADS -I/usr/include/directfb -D_REENTRANT -D_REENTRANT
-DHAVE_LINUX_VERSION_H -c ./src/video/SDL_RLEaccel.c -fPIC -DPIC -o
build/.libs/SDL_RLEaccel.o
./src/video/SDL_RLEaccel.c: Assembler messages:
./src/video/SDL_RLEaccel.c:831: Error: operand type mismatch for `movq'
./src/video/SDL_RLEaccel.c:831: Error: operand type mismatch for `movq'
./src/video/SDL_RLEaccel.c:831: Error: operand type mismatch for `movq'
./src/video/SDL_RLEaccel.c:831: Error: operand type mismatch for `movq'
./src/video/SDL_RLEaccel.c:930: Error: operand type mismatch for `movq'
./src/video/SDL_RLEaccel.c:930: Error: operand type mismatch for `movq'
```

```
./src/video/SDL_RLEaccel.c:930: Error: operand type mismatch for `movq'
./src/video/SDL_RLEaccel.c:930: Error: operand type mismatch for `movq'
build-deps:536: recipe for target 'build/SDL_RLEaccel.lo' failed
make: * [build/SDL_RLEaccel.lo] Error 1
```

PLEASE HELP ME WITH THIS.....

SuckySucky - *January 8, 2017, 7:10 am*

Did you install build-essential ?

PHP Code

<?php

sudo apt-get install build-essential

skyte98 - *January 8, 2017, 8:45 am*

Did that, still not working...
