Thread: [How to Monetize Minecraft Fan Page with 13K Likes](#)

**?clipse™** - January 7, 2017, 9:21 pm

I have this fan page with 13k page likes, relating to Minecraft gift codes. I forgot how I got those likes so I posted to see how real/active the fans are, and it mentions 5,4k Post Reach, I'm not sure if this means 5.4k people actually saw it?

I also get 17 weekly page likes but my post like was below 5 people, so this is odd although my post was unrelated

Knowing that it might possibly have active fan base, how should I go about monetizing this best? How should I increase the fan base?

I'm not looking to create any fake generators and or anything fake on that matter but instead something legit that we can both benefit from.

I'm willing to work with anyone and share the profits so pm me if interested otherwise i'm open to opinion!

Thanks!

Edit: realize 90% of fans are from Turkey...

Well i think you should search for a related cpa offer and then present it to your audience

Need to worry about the niche, not so much about the offer but good point

Contact servers and ask them if they'd like to promote their server on your page for money.

This, a pretty good way to make money right here.
