Thread: [\[HD\]Get Original Size of INSTAGRAM Profile Pic\[HD\]](#)

ksharma - January 8, 2017, 10:35 am

Hello HF Members,'

Here is simple method to get the original size of Instagram profile picture of any user of Instagram .

First of all log in with your Insta account on your laptop or Desktop.
and open the profile of your victim user and just right click on his/her profile pic.

then open new tab and paste this link in url bar and press enter. Here we get the image of user, but this so small. In image as you can i just highlighted small part or url of image, this is the dimensions of image default.

So get the original size of image just replace these dimensions of image with 750*750 and here is enlarged image.

Another Image

Note:-- Just keep in mind replace the dimensions equally . For example 750-750 and 350*350 and 150*150.

In my case only these three dimensions works others give me 5XX error

As you see in image.

Hope all of you enjoy this,,
Give your feedbacks..
Thanks ??

Hey, thats pretty cool. Thanks

TK Xervz - January 9, 2017, 2:53 pm

Thanks for this man! Will use this to help me get details on my dox target!

Craze* - January 9, 2017, 2:55 pm

Thanks for this , i have allways wonder how to do it

Adan - January 10, 2017, 6:01 pm

Dayumn I didn't know this, thanks for the well detailed tutorial

girn10 - January 11, 2017, 11:52 am

I never knew tis thanks for the tutorial

Agency.co - January 11, 2017, 6:37 pm

THIS IS COOL AS!! thanks for the post I learnt something on thread I always dreamed about

Famous Grouse - January 18, 2017, 3:49 pm

OP simple but effective tutorial, great post!!

KingDollar - January 18, 2017, 6:03 pm

great post i like it thanks

ksharma - January 18, 2017, 10:04 pm

Thanks to all of you HF members for your great feedbacks,,

pettanko - January 20, 2017, 9:03 am

If you don't want to change the numbers you can quickly just remove the sizing.

Code Just remove "s320x320/"

https://scontent-arn2-1.cdninstagram.com/t51.2885-19/s320x320/13696689_308697752811841_1058848684_a.jpg

So it looks like this

https://scontent-arn2-1.cdninstagram.com/t51.2885-19/13696689_308697752811841_1058848684_a.jpg

Nice ,,thanks buddy,,for your contribution..?

SIM-2398810 - January 21, 2017, 2:00 am

thats good idea thanks for this bro

badran2020 - January 21, 2017, 6:10 am

s here means small so you can change it to "L" which means large and put a bigger number..
example: l3000x3000 and you will get a better result

x0rk - January 21, 2017, 6:15 am

Thank you for this nice tutorial but i think using [this](#) is easier ?
