Thread: [Youtube livestream view booster \(Like twitch but for youtube live?\)](#)

Reporter - January 8, 2017, 11:09 am

Looking for more ways to get viewers and livestreaming 24/7 can really help.

Anyone know a working youtube livestream booster?

Free or can cost up to \$1500. Not looking to pay more.

Not sure where this should be posted, I was thinking in Money section but since this isn't just for money so did I post here, so yeah ?

Trust me, I've searched for this service and I've found no one selling it.

Encountered 2 Scammers on HF who offered it to me, so don't fall into the trap.

Edit: poster above me bumped this old thread, didn't realize it was posted 10 months ago.

I was working on one of these in vb which only took me a hour and it actually worked so I'm sure someone is offering it.

How many livestream views are you looking to have constantly? I am able to do this.

kingregards - December 22, 2017, 12:24 am

livestream viewers are related with monthly cost i think.

how much for this Dodo for 250 viewers?

I was curious on if this was a thing, I've only seen it on qqtube, but no longer is available and qqtube seems eh.

Never seen anyone else sell it unless they were trying to scam or give a virus. I know that it's a thing because I saw a few kids popping 1,000 viewers playing zombies starting off at 500 subs and it was so obvious because of how fast he was growing and his socialblade was fucked. I know it's possible, but haven't seen anyone sell it at all besides qqtube.

I think the "only" way to do this is by simply having thousands of infected bots watching the stream.

Hard to say, YouTube's algorithm is pretty weird.

Extremely different than Twitch.

So having real bots (I talk about infected home computers) could be a good way to bypass any kind of methods Google use to prevent botting, Since this will be from a real home owners computer (Like run Youtube silently on victims pc)

I don't think anything legit like that actually exists, you can get around 1-4 more viewers by making another YT account and opening up your stream in incognito, another browser and incognito in that browser.

Sorry about my terrible english.
