Thread: [\[DEV\]Shadow Batchers Multitool\[/DEV\]](#)

shadow_69_91 - July 18, 2010, 10:54 pm

Hey everyone.

I have been working on a project in c# that would be greatly beneficial to batch scripters.
I have a few functions that I have added but I would like to know if anyone has a suggestion.

So far this application contains a command prompt, SMTP client, FTP client and a notepad and I would like to add more.

Any ideas would be greatly appreciated.

Hey man this sounds nice. I have no ideas on what you should add, but if i think of something i will let you know =)

Hit me up when its done, i will test it out lol

You will be the first to have a go at it :)

I mentioned it on your Facebook wall bro.

I was going to add a batch generator as well but that is a little too much plus it kind of defeats the purpose of the application :P

EDIT: Does anybody have any ideas of what SMTP servers I should add?

So far I have Hotmail, Yahoo, Gmail and GMX and I am willing to add any that you guys use :)

Come on people it is a very helpful tool.

Here is the latest screen shot.

[IMG]http://i884.photobucket.com/albums/ac47/shadow_69_91/MultitoolUpdate.jpg[/IMG]

So far there is:

An SMTP Client(Send emails)

FTP Client

Command Prompt

Notepad(Will be adding Syntax Highlighting very soon)

Simple Message Crypter

Run dialog(Like the one in Windows that you can access via the start menu or by holding the Windows key and pressing r(Still in Beta))

shadow_69_91 - August 7, 2010, 8:39 pm

BUMP BUMP BUMP!

Come on people!

So I am guessing no body like the idea of this because it doesn't do all the work for them? Ha ok.
Have fun kids.
