Sure drop me a PM, I use premium proxies (dedicated) and have no problems. I used it with public proxies once, but since 1.4 it runs a lot better (before some threads got stuck)

Your AccountReaper looks pretty amazing.

I'm very interested if it ever gets Runescape/OSRS support; and if you decide to add it in the future let me know, you will have a buyer. <3

I wan't to follow this and if you ever get linux support I'd be interested in checking this out for the price + tip since you said this is how you pay rent.

i dont use skype, we can sort this via PMs, but like I said, I dont use paypal or skype so if u dont have skrill/btc or 10 euro PSC there isnt much we have to discuss
