Thread: [\[Mini Tutorial\] How to view all scam reports](#)

Egregious Jr. - January 8, 2017, 1:07 pm

I feel like not enough people know how to use this. Not all scam reports are entered into the deal disputes database. If you want to see all reports, follow this guide.

Go to the search page (<https://hackforums.net/search.php>):

Now enter the UID of the user you are looking for on the left side (I'm using mine as an example):

Make sure "Search Titles Only" is checked.

Select "Deal Disputes"

Click search.

Now you have all scam reports of that user.

Tip: You can also try this with marketplace discussions to find community alerts.

Hopefully this is useful to some.

Quite useful for new members. Nice little tutorial

Rhinoo - January 10, 2017, 1:33 pm

would be very worried if people weren't doing this, but then again wouldn't be suprised

Deathy - January 10, 2017, 2:31 pm

I thought more people did this over checking the the trust scan?

Tomodachi - January 10, 2017, 3:09 pm

Sometimes only the username is posted. Should search both to be safe.

Be careful of users that have special characters in their username. Just to be extra sure, copy paste the username in the search box instead of typing it down.

I don't think it's necessary to specifically search under deal disputes. They could have a thread under marketplace discussions as well; it's better to search the entire form imo.
