Thread: [USB Assassin \[NEW\]](#).

GREN4DE! - January 8, 2017, 3:23 pm

"Hello world"

i am trying to create a pen drive assassin i have read up on other peoples and they do not have much on them.

so whats the question?

as i was thinking of
2 partitions - one bootable one file structure

bootable:
Konboot,
Backtrack,
MINIXP,
Linux,
Some testing program like memtest & HDD sentinel or seatools

File:
chromePass
Dialupass
iepv
mailpv
mypass
netpass
passwordfox
pstpassword
webbrowserpassview

also i have a copy of luminositylink and wanting to create a RAT and Keylogger.

Wanted to get Hawklogger but has been taken down,

Anyone got any other idea or program/software to share?

cheers

GREN4DE!

hunterr - January 8, 2017, 4:50 pm

If you make that make multiple and sell some I would buy one for sure

or maybe an installer e.g. plug in a usb and select what you want installed
That would be awesome
I love that idea
Thanks,

ht22

I would enjoy working with you on this. It would be very useful to have. Maybe add Kali to the mix

GREN4DE! - January 9, 2017, 1:04 pm

anyone else. in fact i need information on the hawklogger or decent equivalent

Armada - January 9, 2017, 6:45 pm

Not sure how useful this is, but I used to have a USB drive I took with me I encrypted the volume and dropped a bunch of portable apps, everything from my own Open office suite to diagnostic tools and even a couple games.

portableapps.com is a great resource for various freeware tools.

GREN4DE! - January 9, 2017, 9:53 pm

i have downloaded, a lot of testing tools from portableapp and i cannot fault them

thank you for recommendation.

you know any .iso like konboot backtrack/kali which maybe useful?

Armada - January 9, 2017, 10:09 pm

Well any OS can be made bootable, it really depends on your preference.

Gluteus Maximus - January 9, 2017, 10:13 pm

If yoyd really like make it an assassin, make it an USB killer. ?

<https://www.usbkill.com>

hunterr - January 10, 2017, 5:29 am

We want to hack the computer not ruin it.

d7e7r7 - January 10, 2017, 7:49 am

Maybe something like the USB Rubber Ducky?

Zanzibar - January 10, 2017, 8:02 am

Would be cool to see where this goes. Gonna keep stalking this one.

But you're saying is you want some kind of exploit/rat that automatically infects the PC? With the use of a USB?

GREN4DE! - January 10, 2017, 5:58 pm

right! it is 90% done

i have konboot kali backtrack ..

i have make what looks like a testing usb to the naked eye so you can lend it to friend and family or

in my case "customers pcs" :P

but i have made all the test files to pull off different things so my HDD test file opens seatools and hdat2 but it runs a password sniffer and saves it but still tests the pc.... its awesome i have now purchased hawklogger and will finalise the keylogger and rat from luminosity link

:D

hunterr - January 11, 2017, 8:21 am

Cool please send me the files

DeathByHR - January 11, 2017, 9:03 am

would you sell it or leave it open source

VeNuM1Ze - January 11, 2017, 4:39 pm

id love to look at this sick post OP

GREN4DE! - January 12, 2017, 9:25 am

i dont really know as of yes how much would you guys expect to pay for this???

hunterr - January 12, 2017, 5:46 pm

People would pay alot say 90+ dollars a setup and extra to ad their rat/keylogger and they choose the live oses/tools.

Ill help you sell too.

Maybe create a poll to find how much people think its worth and then think about how much work you do and decide how much to sell it for.

So yeah, quite a bit.

Let me know when you are gonna sell

GREN4DE! - January 13, 2017, 2:54 pm

yer a poll is a good idea but i think \$90 is too much as \$19.99 is perfect for all who wants to start

hunterr - January 13, 2017, 5:50 pm

True but paying for usb too

GREN4DE! - January 14, 2017, 6:31 am

well, i was gonna make a file you just copy, paste to USB,

as then you can use your own, and then saves money and also people giving out address etc etc,

hunterr - January 14, 2017, 7:27 am

Yeah true maybe a program that downloads what you want installed and and sets up the exploits. So people could pay for a licence for a certain number of setup. E.g. 20 dollars per usb.

GREN4DE! - January 14, 2017, 7:45 am

like a tick box but surely we are all greedy and want the lost for less :P

what program or website do i use to sell my product??

Rocketr?

hunterr - January 15, 2017, 3:57 pm

Rocketr aiobuy anything that list you sell files
Or sell it manually.

hunterr - January 16, 2017, 6:35 pm

Maybe provide a couple vouch copies to start off sales.

spidertrackurl - January 17, 2017, 12:25 am

Would be cool to see where this goes. Gonna keep stalking this one.

hunterr - January 17, 2017, 3:59 pm

I'm hoping this works out

Stupidmouth7 - January 18, 2017, 2:34 am

Any progress on this? I'm ready to buy NOW!

GREN4DE! - January 19, 2017, 8:10 am

ok well, what i would deem a hidden password puller of a normal memory stick inc kali back track and konboot, to get into windows "not OS"

is done, when booting the usb you have 2 ways of pulling off all information...

but before i finalise this... is there anything else people what / need as my keylogger and RAT only seem to work for me as i have luminosity and hawklogger

lemme know!

ok this will be going sale tomorrow night (GMT)

and i will give out 2 Vouch copy's... but a sale artwork will also receive a free copy

it will be priced at \$24.99 as i have also added 3 options you can copy and paste to your everyday usb

talk soon all...

hunterr - January 19, 2017, 3:33 pm

May I please have a vouch copy. That would be awesome.

Blake- - January 20, 2017, 12:28 am

This is really interesting. I'm considering buying this in the near future. Might wait for some vouches/reviews though. :)

GREN4DE! - January 20, 2017, 10:26 am

right releasing this in 3 parts this is first time ive done this

vouch 1 copy - hunterr

Redbot123 - January 20, 2017, 12:01 pm

I'll take a vouch copy I'll right a paragraph review my guy

GREN4DE! - January 20, 2017, 1:04 pm

2nd and final copy - REDBOT123

pac - January 20, 2017, 1:12 pm

Hopefully you aren't serious about selling this. Anyone with enough knowledge about any of listed programs/OS can make them by them self. Also selling programs under certain licenses is illegal.

hackboy001 - January 20, 2017, 3:49 pm

not sure about using USB, haven't done this method before but keen to try it

hunterr - January 21, 2017, 5:07 am

Vouch for gren4de, maker of usb assassins, but seriously a good product, buy from gren4de.

Thanks for the vouch copy.

GREN4DE! - January 21, 2017, 6:16 am

(Jan 21, 2017 06:07 AM)hunterr Wrote: [\[CITE\]](#) Vouch for gren4de, maker of usb assassins, but seriously a good product, buy from gren4de.

Glad you like it Hunterr! :D

<https://rocketr.net/buy/64862ea12919> if anyone's interested in part one

hunterr - January 21, 2017, 1:39 pm

I loved it. Thanks again.

SynthMesc - January 21, 2017, 5:41 pm

What about hirens boot cd? Its got mini windows xp its pretty cool

hunterr - January 22, 2017, 9:27 am

Will the other parts have the live oses included

cookie stuffer - January 22, 2017, 9:59 am

are we talking bad usb style attacks?

GREN4DE! - January 22, 2017, 10:58 am

(Jan 22, 2017 10:27 AM)hunterr Wrote: [\[CITE\]](#) Will the other parts have the live oses included yes that will come intime,

as the bootable, part i need to figure out and sort the menu out,

also do people want it purely for bad or want me to hide it on a normal everyday usb??

hunterr - January 22, 2017, 11:00 am

hide it because then it is more effective and people wont expect it

GREN4DE! - January 22, 2017, 11:11 am

(Jan 22, 2017 12:00 PM)hunterr Wrote: [\[CITE\]](#) hide it because then it is more effective and people wont expect it

Totally agree,

i like to know if checked they just see a ABBA album and pictures of cars :P

hunterr - January 26, 2017, 5:45 am

(Jan 22, 2017 12:11 PM)GREN4DE! Wrote: [\[CITE\]](#) Totally agree,

Yeah lol and then all of there information is taken.

hunterr - January 27, 2017, 5:12 pm

Hey gren4de you should say that your selling it in the original post.

GREN4DE! - January 29, 2017, 9:27 am

im not a greedy HF user pal if people want it or interested they will see it when reading into and see the link,

hunterr - January 29, 2017, 2:53 pm

Yeah that's true. :?Hope people see it.
