Thread: [\[Free\] Imagine Template \[Custom\]](#)

Netflix and Weed - January 8, 2017, 6:18 pm

Has been a little while since I have contributed to the community so here is a nice simple lightweight turn into a project template.

Here is a preview and the download for the template.

Spoiler [\(Click to View\)](#)

You can download it [here](#).

Please leave feedback and understand it's free so not the highest quality.

Very simplistic as you said, but it's nice to see people giving away free templates. However, I do have one concern. What's the copyright on the background image like? Did you get it from a copyright free website? (for example, www.pexels.com provides amazing & large background images that you can use on a website without giving credit)

The Sear's Tower view is beautiful though, good image choice ?

Thanks again for sharing!

The background was a wallpaper I had found on google, I don't remember where I seen it but credit does go out to whoever released this.

Not a problem, back to helping the community.
