Thread: [Osu - What tablet?](#)

Galaxias - January 8, 2017, 7:53 pm

Trying to figure out what tablet to get, someone help.

Sorun - January 8, 2017, 10:29 pm

Wacom line Ctl 460, 470, 480

Xp pen G430

Gaomon s56k

Huion 420 (or osu! variant)

I personally main the ctl 460(have owned 470) I got way back in the day but I also own the osu! tablet which is alright to. I prefer the smoother surface of the 460 because I drag. From my research on the other tablets regarding the surface the xp pen g430 has a scratchy surface and the gaomon has a smooth one so take that into account if you drag. Apparently the gaomon and xp pen are more responsive though I don't think you will really notice the difference from what people say.

I use the osu! one they sell on their website. It's alright as a budget first tablet if you only play for a few songs a day but I would suggest investing in something a bit better if you intend on playing it as a casual game.

Egregious - January 9, 2017, 12:04 pm

Official Osu tablet, unbranded.

I prefer to use something light weight in regards to the pen, do you know which one is ideal for me with that requirement in mind?

I've been playing casually from time to time since day 1 (4 years ago haha) so I thought it was time to try out playing on a tablet is best now :p

Holy shit, you play osu on that big of a screen? I mean I have the same size but I reduce the size of osu to like 1280x720 or something cause I thought it was too far apart LOL..

As long as it's relative movement you'll be fine.

Running the Wacom Comic right now, but I'm pretty bad.

That leaves you with the XP pen g430 and the Wacom tablets. I can't speak from personal experience about the XP pen g430 but it should be as light or lighter then the Wacom pens because it doesn't require a battery.

Does that have latency problems like the 490 Intuos line?

Lyrlei - January 10, 2017, 7:56 pm

I've used Wacom Comic and several Huion Tablets for Osu! and They are equally fine. It's more about getting the proper screensize profile for your playstyle.

?now - January 10, 2017, 7:58 pm

I heard wacom was a very good brand to buy.

Is that what the community said?

I haven't noticed any latency at all honestly.

Yeah if you look in the gameplay section you'll find a thread about it. Driver updates helped a bit but people say its basically the hardware holding it back. If its your first tablet its something you learned to play with so you don't notice it. Similar to having the "Enhance mouse pointer" option checked gaming back in the day.

I used the Wacom Intuous Pro before, but opted for a smaller one.

How long did you use it for and why would you downgrade? My friend uses the pro for art and he loves it. Were you only planning on using it for osu! ?

Galaxias - January 11, 2017, 8:18 pm

I purchased a Huion 420, do you guys think it was a good choice for now?

It should be fine since osu! tablet was based on that model anyway and there's plenty of youtube osu reviews on that.

Playing osu! with a tablet just feels natural so you will probably like it. Give the wacom tabs a try if you ever come across a good deal.

I'll most likely buy a Wacomm tablet in the near future when I have money :)

I thought the size of the old one was overwhelming and besides I wanted that pressure pen support for illustrating too I guess.

Okay I have no idea how to setup this thing, anyone willing to help LOL?

Sorun - January 15, 2017, 11:42 pm

Should be plug and play but there are drivers if you want to adjust the area. Make sure to have sensitivity set to 1.0, dedicate screen to tablet, and disable mouse buttons in game.

Mirai - January 16, 2017, 7:55 am

I use the h420 its cheap and a really good entry osu tablet.

Who exactly? - January 16, 2017, 10:21 pm

If you haven't got a tablet yet I highly recommend the CTL-480.

I and 2 other friends bought it at the same time and I can tell you for sure it's so damn good.

Kiyoshi - January 17, 2017, 11:40 am

I got the Wacom 480. Really happy with the purchase. ^_^

Larsenpower - January 17, 2017, 11:42 am

Used to have the Wacom 480 but I broke it. I can recommend it though :)

daiguo - November 5, 2020, 6:35 pm

I'd highly advice either a wacom device(mainly the 480-471) or otherwise, a xp-pen tablet.

I use the XP-Pen STAR G430 (xp-pen.com/product/46.html) . I think it was good for it's price as it lasted me for at least two years now, but really it's up to you.

This post was 3 years ago man I doubt he'll need any help right now with finding a tablet?

Sirbonbon - November 21, 2020, 1:52 pm

don't buy a trashy one, if you do i'd be better off to wipe your bottom wit it
