Per the conversation on the livechat, the VPS was suspended for port scanning.

You mentioned as this was for "VPN" service only. I provided you the iptables configurations to fix this.

blackaf69 - March 14, 2017, 12:25 pm

I went ahead and rented a KVM Windows VPS. Got the Platinum 4 vCPU / 10GB RAM / 125GB option and I am blown away with the performance for the price I paid!

The ordering and setup was so easy. I have an admin dashboard that allows me to use the KVM console and it also gives metrics and data for hardware and usage. Very professional and useful stuff here. This isn't a fly-by-night operation here, folks. I will be a customer forever with this service. So happy I stumbled onto it.

As for the seller, I have purchased several products from Tom and he is extremely responsive over Skype and always goes out of his way to help. I doubt I'll need it with this particular product but I am confident that if I did need help, he would be right there to offer it.

Vouch for Tom, I've bought ALMOST everything he has posted and I haven't had a problem with any of it! All of his products are HQ! DO NOT HESITATE TO DEAL WITH!

Flyrect - March 26, 2017, 1:21 am

I just placed an order for VPS

Paid with BTC, waiting on confirmations

Do you also offer cPanel Licenses ?

Their Shared Hosting not suitable for Wordpress. Stay away

GammaDune - March 26, 2017, 4:26 pm

Tom's got great products wouldn't doubt this one would be great too!

Hey,

I have just tried to purchase one of your services using 2checkout, but I got an error saying: Failed to authorize: Authorization Failed

So I went and tried again, and got the same error.

The problem is that the Credit Card I used on the transaction got issued twice, for a total of 14\$ (

6.99 x 2) without receiving any payment from your website nor 2checkout.

I contacted 2checkout regarding the matter, you think you ca help ?
