Hey, anyone know a way to get a rat through an antivrius? or anyway to disable it? with out SEing?

PSEUCHO - January 9, 2017, 3:56 pm

Are you talking about a Crypter?

FRI?DBAO™ - January 9, 2017, 4:02 pm

noo but crypter only help with anti viruses.

are there some taht work with antivrisu?

sp00ki - January 9, 2017, 4:08 pm

Crypters make it where the file doesn't show up as a virus.

but i am pretty sure anti viruses still can reconize it!

Charm ? - January 10, 2017, 12:28 am

Cryptic your file will not have avs detect the file. However after a certain amount of time, depending on the price and quality of your stub, it will be detected.

Sure some might, but if you get a good enough crypter it should sneak past most Anti Virus solutions. The whole point of a 'crypter' is to do just that. Whether crypter owners admit it or not.

LiftMaster - January 10, 2017, 5:32 pm

I think your confusing scantime fud and runtime. Some cheap crypters will be undetectable when you scan it but will be detected upon execution.
