Would it be allowed to sell Windows OS licenses? (Legally obtained, proof supplied to buyers)

I don't think these would be allowed due to fraudulent issues. But I could be wrong, let's wait for Omniscient's response.

These threads I found do not provide a final answer, but I would say it's probably not allowed.

That would fall under "Product keys, cracks, and other unlicensed software" as well as "PIDs & call-ins."
