Nice fast and clean proxy scraper and checker honestly would recommend this to anyone,
I suggest possibly adding an option where you can choose what port proxies are being scraped.
Other than that its perfect, good luck with sales!

Product is great!

Invictum - January 14, 2017, 11:07 am

So I purchased the NetScraper and I can say that's it's fast, efficient, and gets the job done as advertised. It's a very impressive program and awesome if you're getting into cracking.

You're also given the option to add your own proxy sites to scrape which is a nice touch.

I would like to see a fast proxy only option, and a ping list on the program, but other than that the program is great.

Botted - January 14, 2017, 11:29 am

Does exactly what it says on the tin and for a great price too, vouch.

Do however note that 'checking' 270k proxies does take a while.

You're also given the option to add your own proxy sites to scrape which is a nice touch.

I would like to see a fast proxy only option, and a ping list on the program, but other than that the program is great.

.iniFile - February 13, 2017, 1:03 pm

Ok so here is my review. A few things I would like to see

- An auto updater when checking proxies to show you 0/x proxies are done scanning that updates. I don't like the bar at the bottom as much
- An option to move proxies from scraped to checker that way I don't have to export, then import into program then check

Takes a long amount of time to check the 270k proxies scraped even with 10k threads or whatever. I also got only like 2k working proxies out of the entire thing that took like 2-4 hours to scan. I was very upset at that, but I guess I could not blame the creator.

My rating 3 out of 5 stars. Not bad for the price, but needs some more features.

Darkwin - February 13, 2017, 1:07 pm

Id be willing to pay more than 8EUR if the checker came with proxy speed test/results :) and maybe even an option to delete all slow proxies.

(Jan 14, 2017 12:07 PM)DVA? Wrote: [\[CITE\]](#) So I purchased the NetScraper and I can say that's it's fast, efficient, and gets the job done as advertised. It's a very impressive program and awesome if you're getting into cracking.

You're also given the option to add your own proxy sites to scrape which is a nice touch.

I would like to see a fast proxy only option, and a ping list on the program, but other than that the program is great.

Vouch for Tom. A really great piece of software here! GLWS mate!

Blue Eye Samurai - March 10, 2017, 9:38 am

Pretty interested in this, only question is, if I wanted to use this for example a Youtube View bot, Are these proxies able to work with that (After they are checked ofcourse). Have a past with working proxies but not for Youtube

Oven Mitts - March 10, 2017, 9:56 am

Does this get socks5 proxies? And how can you tell if they are socks5? Or would you happen to have a list of sources you could give me that are purely socks5 so I can use that as the sources when I want socks5 only proxies and that's all it will scrape?

xreD - March 10, 2017, 1:19 pm

Buying it now thkxxx

I'll update thread after using it :)

Hi,

I tired to scrape and it only scraped 1.3k proxies?? wtf I tried many times but it only scrapes 1.3k

need help please, I wanted at least 250k+ proxies :(

EDIT: contacted OP and he replied gave me sources within a min... and then it scraped 260k proxies.

Overall Great product and great support :)

Have a past with working proxies but not for YoutubeYes, they do work for youtube.

(Mar 10, 2017 10:56 AM)Oven Mitts Wrote: [\[CITE\]](#) Does this get socks5 proxies? And how can you tell if they are socks5? Or would you happen to have a list of sources you could give me that are purely socks5 so I can use that as the sources when I want socks5 only proxies and that's all it will scrape?You can Scrape every type of Proxies, such as HTTP/HTTPS/SOCKS4/SOCKS5 but the Scraper does not always scrape Socks Proxies.

You can check the Proxytype on Sites & you can go to Proxy Sites and filter the Type to Socks Proxies. After you did that copy the URL and paste it in the .txt -> export it to the Program and after that you'll Scrape the Socks4/5 Proxies.

If you need some Socks5 Sources, feel free to PM me or add me on Skype

You're also given the option to add your own proxy sites to scrape which is a nice touch.

I would like to see a fast proxy only option, and a ping list on the program, but other than that the program is great.

It scrapes Proxies from Premium and Non-Premium sources if you have your own source list you can import it to the net scraper and start scraping .. And the valid proxies all depend time to time it changes.

Does this software stop/freeze a lot? How many l1 proxies can I get after using this and how long does the process take?

Also are these sock proxies and http or just http?

Okay for me this program works great, the checker is abit slow. It may be my settings, but I just use an online proxy checker without publishing proxies obviously.
Great program IMO high quality proxies.

Had a bit of hiccup setting it up as I was not aware I cannot use it on more than one computer but the seller is very responsive and keen to help.

Now I am using this product and I cannot say anything bad about it really! It just works as I expected and I find it as one of the most useful and reliable products I have ever bought!

Keep up the excellent work! Good job

I have Never tested on SQLi Dumper, however the Proxies it scrapes are good for cracking and other sort of stuff ..

So it should definitely work with sqli dumper

Thanks

What type of proxies does it scrape?

What type of proxies does it check?

If it scrapes and checks different proxies does it output to separate files? HTTP/HTTPS/SOCKS4/5

If it is only HTTP/S proxies is there SSL check?

Just curious, how much alive proxies we can expect after checking?

I am asking because I have purchased few other service and when I scrape I get a 225K+ list but after checking I can get 2.5-3k alive.

Thanks for the Inquiry ,

Proxies usually last Long over period of 24-72 hours . This tool scrape proxies from Premium and Non Premium Both including private sources

However if you using for cracking or pentesting it may die against the stuff you test it with

Hi there,

I am very interested - and will purchase no matter what.

However, you say that the user potentially can grab around 250.000 proxies in thread, which is AWESOME!

But - the thing is, I only need DK / Denmark Proxies - do you think that the tool finds Danish (DK) proxies too?

Because then maybe I could find some website that could filter out IPs by country, and do it like so - if that makes sense?

Thanks a lot - and heh, I understand if my question is somewhat confusing!

I paid for it!

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first

post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
