My client loves it, what do you guys think?

FYI: The song is about congratulating his number 1 hater. Made the model in sketchup using a render plugin. It opened a new door for me though.. I'm going to learn Cinema 4D!

Not to get at you or anything but I think this could've been executed a little better. The effect you have on it makes it appear a little low quality. There's some noise/grain at the bottom and there's very heavy shadows behind the certificate/parental advisory. Did you consider just manipulating this in photoshop? Feel like maybe you could've had better control of the lighting and atmosphere.

I'm sure if you did this from scratch in 3D and got the textures down you'd probably have a more realistic looking composition. It's definitely a nice concept. I feel like it could've looked better in the end though. I think the placement and sizing and everything is good but it doesn't come together.

If this is made in SketchUp, well done! The lightning and such is really good for a free program like that.

Sevenply - January 13, 2017, 5:37 am
