Thread: [\[Last Chance\] Join Royalty Programming Sector - looking for two more members to join!](#)

exploit.c - January 11, 2017, 7:25 am

Hey all, want to join our awesome programming sector in Royalty run by me?

We're here with a lovely contest, only 2 people will gain entry. You can pick from one of the two following tasks, do note there are strict requirements on entries.

Requirements:

1. No scam reports (open/unresolved/valid)
 2. You must not be involved in any criminal or questionable activity
 3. Morals are required, immoral people need not apply
 4. You must produce a final result yourself, you can work in a team but each individual must produce an original entry
-

Software Challenge

Show me what you got! Demonstrate anything you're passionate about, something you're willing to speak about, and explain in-depth, along with show us the code so we can review it's quality. This can be done in any non-web language (save and except NodeJS)

Web Challenge

Your task is to make a multi-site management platform, you can use existing libraries, however the core must be written by you. It must include in-code documentation and brief explanations.

PMing for help will result in disqualification

Good luck

Vitani - January 11, 2017, 7:29 am

I would definitely apply for this if I had something big to show you but I'm pretty sure any of my current contributions aren't what you are looking for.

I do have one thing I could show right now, I'll PM you about it to see if it qualifies.

Approved. Now we're just looking for one web developer to show us what they've got!

Elitas - January 11, 2017, 8:32 am

I'm a web developer, have made plenty of websites, including forums, mostly community-based sites, also built some chrome extensions and things. Lmk if that sounds good. :P

Charm ? - January 11, 2017, 9:43 am

GI to everyone! I wish I still coded.

Maybe I'll take an apprentice program for getting back into the group

Kapo - January 12, 2017, 7:35 am

Name:Kapo

Profile Link:[Profile](#)

Age:19

Time Zone:CET

Skills:Web Hacking,Bypassing Web Servers Security

Exploiting Web Vulnerabilites such as: LFI,RCE,RFU,RFI and little SQLI

PHP,Javascript Developer

Web Designer

VB.NET Programmer / And also little Python

Why do you want to join the Royalty?:It looks exciting to me because i havent been on a group before.

Why should we invite you to the group?:I have good skills

Prove you have the programming skills - it's a requirement

Z3r0D4y - January 12, 2017, 10:48 am

I have PM'ed you, perhaps it's what you're looking for.
