Thread: [Method to recreate @live.com/co.uk/ca/fr/dk emails](#)

Egregious Jr. - January 11, 2017, 10:52 am

This method will allow you to recreate any of the microsoft emails.

This works on:

any @live emails

@windowlive.com

@msn.com

@hotmail.co.uk (others than .com)

PM me for the method!

Quackles - January 11, 2017, 10:55 am

Thanks received this method.

Could I have the method pls.

Cimex - January 11, 2017, 12:17 pm

Does this method include Tamper Data by any chance?

Kiyo - January 11, 2017, 12:18 pm

lol i remember this shit. i made a few emails

Interested in seeing the method :) Thanks!

Ytube - January 11, 2017, 12:44 pm

I thought the tamper data method was the only way to make them and the inspect element version was patched?

I've tried a lot of times in the past and it didn't work. I may as well have another go.

mixedBasket - January 11, 2017, 2:20 pm

Could you send me this please? Thank you!
