Thread: [Email SPAM Prank 3.6 - Prank your friends or your enemies](#)

prilux - January 11, 2017, 2:17 pm

Email SPAM Prank is a tool that sends spam to any email. A user just need to write the email and click send. Version 3.6 (Public) is available below. I didn't post earlier here in the forum because is a bit worthless spending my time distributing the tool just to receive feedback.

Note:

Version 3.7 (Public) and (Private) is already finished and send to the customers, so if you want a free copy for the Public version pm me. (I will publish later on the forum). The private version which sends aprox. 3000 emails can be purchased by email. Contact me at privateloader@hotmail.com
