These are legit. If you have any questions about my reasoning I'll elaborate.

Yeah, if you prefer PM or something, because I don't understand that much about Yeezy's, and I got this pair for 330 euro, which in my opinion, is a good price! Some people says it's fake, but only here, in HF

Just a few I noticed:

- The lines on the sole should be slightly offset. Check.
- The boost looks good. Check.
- The liner of the shoe should be blueish, not jet black. Check.
- The box should look legit, and the black box person should be square, not squished and rectangle. Check.
- The label on the box is as it should be, named properly and no funky looking print. Check.

- Alright bro, so, should I get this deal?
