How To Crypt Your Server For Free!

I read many posts / threads regarding Crypters and I thought let's help some members out for free. Keep in mind, this is NOT the same as a PAID FUD crypter, this is just for members who want to make their Server less detectable!

Only L33T / UB3R / EP1C Members!
Attention - DONT PM me if you are NOT Upgraded - Learn 2 Read Please!

I do not want to make title that long.

[Tutorial] How to Crypt Your Server For Free! [Very Easy][Limited to upgraded mem]?

That is way to long.

Yes I know what you mean, but I still (today) get PM's from non-upgraded members who can't read my original thread (where I state "Upgraded members only").

So I don't think it will matter how "clear" my title is, some members will never read.

That being said, I can see this method working for Social Engineering scenarios or having skids/unexpecting downloaders.

Depends on the server.

I had 2/35 as well as 9/35 with another server I tested (more advanced one).

If you leave some "check features" open & try it again, it should decrease.

That's why I added the beautifully paint-edited text in the photos + content how to do it.

Thanks for your kind words, I appreciate it!

Codefuser - March 20, 2017, 8:00 pm

This ebook is pretty much a free version of Exterbyte crypter.

U should grab it, it is basically the same thing as that \$13/month crypter.

OctaviaStark - March 20, 2017, 8:57 pm

I have been looking around and mostly people are leaving positive comments. So could i have a copy? Thanks for sharing!

trojanhorze - March 20, 2017, 10:31 pm

Is this really worth getting? Do i need any special programming skills before i can understand how to use ebook.

You don't need anything which you can't find for free (default program at any laptop basically..)

Please come back when you're upgraded.

It's nice to see that such "new" user (no offense, new as in not many posts) is this kind.

Thank you for the kind words, the reputation and the feedback you left at my thread!

As stated in my thread:
"Only L33T / UB3R / EP1C Members!
Attention - DONT PM me if you are NOT Upgraded - Learn 2 Read Please!"

So, no I won't share it with you, else I have to break my own rule over and over again for other members as well. ?

I just sent you a PM, but it's definately not to advanced for anybody, but again, this is just a "free method" so don't except too much from it.

Next time, send me a PM, so I won't have to check all my posts and PM you manually after creating this thread, it's not much that I ask you guys to do to get this so I hope you understand me haha. ?

Regulus - March 23, 2017, 5:34 am

Received the method and I've already read it through.
This is something anyone can do to be honest, it's very easy and useful.

Thanks a lot for sharing this!
