Thread: [E-Whoring | POST "LIVE" 2 SNAPCHAT STORY FROM THE ACTUAL SNAPCHAT APP ONLY! \[METHOD\]](#)

RepForums - January 12, 2017, 3:54 pm

So you open snapchat up, go to memorys and click the photo to take the photo from your camera roll as you would to post it on your story, then go to edit as you would to edit the photo then click the edit button what looks like scissors then cut the image you want around the edges, right close to the sides as possible, then it will crop that image out, and then save it to your storey and save the cropped image to your stickers on your snapchat so then the photo you want will be on your stickers all you do then is take a photo of a dark screen and click the sticker button, and choose the girl photo which will be a sticker and then stretch it a little to overlap the screen and then put the photo on your snapchat storey, you can add text and make it look even more legit, but i came across this as i was doing something and had to share and many people doing snapchat would love a method to put live pics from just the snapchat app alone, ino theres some apps but this when you have your pics saved to your stickers its so much easier & faster and from the actual app. Hope this helps alot of people or even makes it easier, ino few people will have there ways and just find this intresting.
(if anyone wants to add anything comment on the thread)(if you need help I'm here)

hey thanks man, I came across it while I wasn't even working, so I thought I got to write up a quick tutorial and help few people out with something interesting and I found when people share ideas more comes from it.

thanks for feedback homie

"ino" when I did it, I was doing it for something irl, and cut the image and then later that day I saw the same pic on my stickers so I then had light bulb moment so I signed in to my ewhore snapchat and did the method and trust me try it and itll make it so easy if you save like 10pics for usage and then you can post live pics on to your story without and pc desktop messing around and itll make it so much quicker than than apps because its straight off the snapchat app itself.
anyways give it a try and thanks for feedback

pretty good idea in all honestly, can't believe i hadn't though of it, being a frequent snapchat user.

Stixx - January 13, 2017, 6:37 pm

This is a good idea, would allow people on newer iPhones to post while on the go.

Thanks for the share!
