I'm currently using 1-2 playlists mainly.

Got around 1600 on my main youtube playlist.

Around 600+ with the exception that there's a limit of like maximum 500 tracks on soundcloud.

Most of these tracks are more or less, Underground/Hip Hop.. rarely anything mainstream.

Got a few others aswell, but would depend on mood.

My phone currently has over two thousands songs in Now Playing list. I am more inclined to run songs on YouTube in the background with auto-play enabled while working on my computer.

Podamron - January 16, 2017, 2:45 pm

my iTunes currently has 2510 songs on it.

I have a bunch of different youtube playlists. I actually have a pretty extensive collection. I think my most of my stuff is in the Drum and Bass playlist. I also have a collection of different movie soundtracks. mostly Hans Zimmer stuff.

by the way, did anyone get the Hans Zimmer masterclass coming out at the end of the month? my gf got it for me for xmas and i'm so excited.

OmegaTheOG - January 17, 2017, 7:50 pm

It eventually just collects and builds up over time.
