Thread: [\[UPDATED\] xCoins.io - Make Over \\$4,000 PER MONTH | 100% Legit Method \[FREE\]](#)

mvmt - January 15, 2017, 12:17 pm

XCOINS.IO

A guide to making over \$4,000 per month, practically autopilot
By Fade

Introduction

The previous thread was hosted by [BLURRYF?CE](#) so I will give him credits for the original idea, however he is closed now and there is a lot of interest in xCoins so I figured I would re-make the thread with updated information and all that I have learned from it. If you are using this site to its full potential, you can earn approximately \$4,500 per month and it is basically autopilot. I'll take you through all the steps as well as give you support here on this thread, so lets get started.

Signing Up

Head on over to <https://xcoins.io/> and register your account

When registering, enter: vomtyx as your Promo Code

It is best to use all real information when doing this in order to keep everything safe and have it match up with your PayPal account. This will prevent issues in the future so please do not use fake information.

Setting up your account

Now that you're registered, we need to get your account set up with the best settings in order to prevent issues. There are a few ways to go about this depending on what type of PayPal you have. Firstly, I would highly recommend that you have a verified account. This will prevent you from getting limited for receiving an influx of payments. If you do not have a verified account, I would not do anymore than \$50 of exchanges per day.

Lending Limit - this is the total amount of Bitcoin you wish to lend. So for example, you want to start out with \$100 BTC to sell.

Also be sure to check the 1st box that says "Adjust the amount automatically" so that when you make a new deposit, it automatically will adjust the amount to meet your deposit. The second box means that your limit will gradually increase over time as you get more exchanges. I would advise checking this if you don't normally receive many payments to your PayPal and you are concerned about getting limited.

Lending Offers - this is where you can adjust the settings of your offers, meaning you can set the minimum amount, maximum amount, your fee %, and more. I would highly advise using the same settings as me in order to get the best results, this way you are not dealing with new sellers that could potentially be trying to scam.

If you want to stick to smaller exchanges, edit your maximum amount to something smaller. If you want to keep your exchanges to a higher amount, edit the minimum amount. Pretty self explanatory.

Finally, enter your PayPal email address on <https://xcoins.io/client/lend-paypal>. Make sure it is 100% correct or else your funds will be lost in the abyss of PayPal.

Making your first deposit

Now that your account is set up, you are ready to make your first deposit and start selling Bitcoin. Go to <https://xcoins.io/client/deposit> and there will be your deposit address listed, it normally shows up in your activity within about 30 seconds and after the transaction is confirmed in the Blockchain, it will be added to your balance.

Once your funds are confirmed, your Lending Offers will go live and you will start getting sales. Depending on the time of day you deposit, it may take a few hours before you start seeing exchanges but normally all of my funds are gone within 4-8 hours. After transactions start coming through, you can keep track of all your statistics on the Activity page at the bottom. It will look something like this:

So as you can see, I've made \$316.46 profit from investing \$2,109.72 into the site. I did this over the course of a few days in my free time.

The maximum amount per day is \$1,000, which at 15% that would be \$150 per day or \$4,500 per month in profit. So if you want to go all out with this service, keep your account filled all day and you will see results immediately.

Protecting yourself from chargebacks

As we know, PayPal is reversible but luckily you are covered while using xCoins. For anyone to make a purchase on xCoins, they must verify their identity and will automatically agree to a Loan Agreement. Basically, the exchange process isn't even shown as a Bitcoin Exchange, it's viewed as a loan. xCoins also automatically produces 2 PDF's, one being the Delivery Confirmation and the other being the Loan Agreement which has all of the buyer's information on it as well as their official ID. Both of these documents you can submit to PayPal which shows proof of delivery and they will most likely end the case in your favor.

These documents can be found when clicking the Check Box under the Status of each transaction, and at the bottom of the page. I would also advise calling PayPal and expressing that the buyer is purchasing a digital item, therefore he does not receive buyer protection and should not win the dispute. I have done this countless times with other disputes and have won every single case, however I have yet to have a chargeback with xCoins (knock on wood).

Bonus Tips

How to buy BTC for low rates: <https://hackforums.net/showthread.php?tid=5517875>

Want to do more than \$1,000 daily? Create alternate emails under your PayPal and set up different xCoins accounts with the emails. This will essentially multiple your profits by 5 if you keep all accounts loaded with \$1k daily, the potential to make over \$20,000 per month.

After receiving your payments on PayPal, go to Add Tracking Info and mark the transaction as "Service Processed." This way PayPal will know it is for a virtual transaction.

I will be giving full support on this thread so if you have any questions, please just post here or PM me and I'll be glad to help. I'll also be updating the post with everyone's earnings if they wish to share. Thank you and I hope you all enjoyed this guide.

Quackles - January 15, 2017, 12:20 pm

Woah, this is quite a smart method, going to try it.

Bezo - January 15, 2017, 12:21 pm

It's back!

Is this thread going to be more a help desk?

mvmt - January 15, 2017, 12:23 pm

Is this thread going to be more a help desk?

Pretty much. After the original poster got closed I figured I would remake the guide with more information and make it better, as well as give full support here on the thread.

LotusHF - January 15, 2017, 12:26 pm

This looks like a method that's been working for a ton of people, but I'd warn against putting ALL of your BTC into a single website, we've seen large amounts of BTC "disappear" before, so don't put all your eggs in one basket! Looks respectable though.

ShennagigansDN - January 15, 2017, 12:29 pm

LOL it's back....

Not sure how I feel about it..

FiftyTwo - January 15, 2017, 12:30 pm

We definitely learned something about XCoins, Fade, didn't we? ?
Great thread.

Diclonius - January 15, 2017, 12:31 pm

i tried this and i did make the money back in a day (300\$) but got several chargebacks and while xcoins helps with its delivery confirmation its still a bit nervewracking for your paypal to go negative or wait for paypal to resolve

luckily i won the chargebacks

XmysteriousX - January 15, 2017, 12:37 pm

Seems interesting but ubhave to deal with those PayPal chargeback

corcuff - January 15, 2017, 12:38 pm

Good job, OP. I'm gonna try this in the future.

Podgor - January 15, 2017, 12:50 pm

We do not currently offer bitcoin borrowing in your country.

Is there a way to find worldwide offers?

Nyxuo - January 15, 2017, 12:52 pm

I've been using this method for a little while now. I'm considering investing more and will update once I've made some decent earnings.

mvmt - January 15, 2017, 12:53 pm

I'd advise setting your offers to levels 2-5 so you don't have to deal with new buyers.

Is there a way to find worldwide offers?

I assume by that message you're trying to buy BTC, sellers can't set countries for their offers so I guess your country just isn't supported whatsoever.

debilu - January 15, 2017, 1:00 pm

It seems very interesting, but doesn't paypal limit your account if you have too many chargebacks?

Visualize - January 15, 2017, 1:02 pm

(Jan 15, 2017 02:00 PM)debilu Wrote: [\[CITE\]](#) It seems very interesting, but doesn't paypal limit your account if you have too many chargebacks?

Many times they do because your account is flagged for high risk

Patzan - January 15, 2017, 1:04 pm

Really good site, you helped me a lot fade on skype as well.

Thanks.

Wires - January 15, 2017, 1:09 pm

I was going to try this and was in the middle of registering when I thought I would look at the reviews. When looking at the reviews, majority of them were negative and were talking about chargebacks etc. Have you personally lost any money using xCoin?

Here's the reviews I was talking about: <http://bittrust.org/xcoinsio>

mvmt - January 15, 2017, 1:17 pm

Yes this is true, however if you are limited you can always call PayPal and explain the situation and they will unlimit you.

Here's the reviews I was talking about: <http://bittrust.org/xcoinsio>

I have seen these reviews and personally I don't think many of them are legit. I haven't lost any money with this and have yet to have any issues with it, most people just don't set up their offers correctly.

GoFlex - January 15, 2017, 2:25 pm

I'm trying this out. Thanks to Fade and to another user for helping me set this up.
I'm worried about chargebacks but I'll try it with money I can afford to give up.

mvmt - January 15, 2017, 4:47 pm

I'm worried about chargebacks but I'll try it with money I can afford to give up.

No problem, make sure to use the tips on how to avoid chargebacks + how to win them if they occur.

Omniscient - January 15, 2017, 5:19 pm

Anyone doing this is an idiot.

In the best interest of the community I'm closing this thread. Unsure if it's financial fraud, HYIP, or just plain dumb. Won't allow it here.
