Thread: [How to get banned from a team speak server?](#)

thecoolcookie - January 14, 2017, 8:51 pm

Does team speak ban your IP or computer? Because the server that I am banned on I cant go on my computer but I can join on my phone. When I use my vpn on my pc it just says failed to connect. I was just wondering how to get un banned.

Mattplayson - January 16, 2017, 11:13 am

Teamspeak bans ip. When you use the vpn I think you need to create a new userprofile on teamspeak, if that doesn't work watch a youtube video tutorial. GL :)

You can change teamspeak profil on app, look on YouTube for change "ID"

TheDane - July 25, 2017, 9:05 pm

Just change the ID man hmu if you need help with it

Demrick - August 8, 2017, 6:52 am

teamspeak bans ur ip and ts identity.

if youre banned from a teamspeak. change ur ip or get on a vpn. open teamspeak click tools and select identities. delete the existing one and make a new one. then goto registry edit.

```
hkey_local_machine
software
microsoft
windows nt
currentversions
```

and inside currentversions you find something called a product id. change the 2 last numbers of ur product id.

if you didnt find this helpful search it on youtube. it works 100%
