FearFactory - January 16, 2017, 12:44 pm

Excuse me if it is not the place to discuss about this subject here,
Is Ethical Hacking fundamental for someone who wants to practise some Black Hat?

Infamia - January 16, 2017, 12:46 pm

Ethical is quite the opposite of Black Hat, Ethical is White Hat.

Unless you mean you should learn ethical hacking first, then yes- it'd be legal at first, but then you can professionally indulge yourself in spooky activities like [REDACTED] and [REDACTED]!

:O

FearFactory - January 16, 2017, 12:48 pm

:OKnowing the security's weaknesses may look important for someone who wants to exploit them.. Isn't it?

Infamia - January 16, 2017, 12:50 pm

(Jan 16, 2017 01:48 PM)FearFactory Wrote: [\[CITE\]](#) Knowing the security's weaknesses may look important for someone who wants to exploit them.. Isn't it?
indeed

PSEUCHO - January 16, 2017, 12:52 pm

Well most hacking tools are used by both, blackhats and whitehats

So if you learn whitehat hacking, you can decide if you want to use your knowledge to become a blackhat or a whitehat

But if you want to become a blackhat then you will need to know some things that whitehat tutorials won't include

FractumSeraph - January 16, 2017, 12:55 pm

If you can be a little bit more specific about what you want to learn I can give you a better answer.

But either way, It's always good to know about both sides, good and bad. Knowing about one will help you with the other. And honestly a lot of times there isn't much difference.

Faith Connors - January 16, 2017, 12:57 pm

Why do people think whitehat and blackhat hacking are different, they are quite literally fundamentally identical. Only difference is motive.

Infamia - January 16, 2017, 1:00 pm

(Jan 16, 2017 01:57 PM)Faith Connors Wrote: [\[CITE\]](#) Why do people think whitehat and blackhat hacking are different, they are quite literally fundamentally identical. Only difference is motive.

whitehat

blackhat

dumbo

PSEUCHO - January 16, 2017, 1:01 pm

(Jan 16, 2017 01:57 PM)Faith Connors Wrote: [\[CITE\]](#) Why do people think whitehat and blackhat hacking are different, they are quite literally fundamentally identical. Only difference is motive. Thats what I said, but blackhat hackers most likely care more about anonymity and not getting doxed

ven0m - January 16, 2017, 1:01 pm

Yes. This is in one-word answers your query.

FearFactory - January 16, 2017, 1:02 pm

(Jan 16, 2017 01:57 PM)Faith Connors Wrote: [\[CITE\]](#) Why do people think whitehat and blackhat hacking are different, they are quite literally fundamentally identical. Only difference is motive.True

Faith Connors - January 16, 2017, 1:02 pm

(Jan 16, 2017 02:01 PM)PSEUCHO Wrote: [\[CITE\]](#) Thats what I said, but blackhat hackers most likely care more about anonymity and not getting doxed
Exactly. Different motive. A whitehat will still know how to stay anonymous if needed.
/Thread

FractumSeraph - January 16, 2017, 1:03 pm

(Jan 16, 2017 02:02 PM)Faith Connors Wrote: [\[CITE\]](#) Exactly. Different motive. A whitehat will still know how to stay anonymous if needed.
/Thread

That, and the majority of the time a white hat hacker will have the all important get out of jail for free papers and not have to worry about it. Aside from that it doesn't matter which hat you're using. If you're stealing info from a website to sell it or to put it in a report the technique is the same.

FearFactory - January 16, 2017, 1:31 pm

I started reading "Hacking for dummies", Is it a good book to read? I mean it explains only the purposes of Ethical Hacking but I see not very much application.

?eptic - January 16, 2017, 2:12 pm

(Jan 16, 2017 02:31 PM)FearFactory Wrote: [\[CITE\]](#) I started reading "Hacking for dummies", Is it a good book to read? I mean it explains only the purposes of Ethical Hacking but I see not very much application.

I haven't read that book but I highly recommend the e-book "The Hacker Ethos" written by True Demon on HF. You can find his free version of the e-book in his thread. I can't post the link so you'll have to search for it by yourself in the HF search bar.

Goodluck on your journey my friend. ?

DarkPython - January 16, 2017, 2:32 pm

i would say learn to program ?

thats my opinion :D if you learn that then go to networking i think it will be a breeze (thats at least my plan)

? Quick ? - January 16, 2017, 2:39 pm

I would say yes, to help you answer your question.

aeoner5 - January 16, 2017, 3:38 pm

Dude, just get a tor browser and search for tutorials on the deep web..good luck

FractumSeraph - January 16, 2017, 3:50 pm

(Jan 16, 2017 04:38 PM)aeoner5 Wrote: [\[CITE\]](#) Dude, just get a tor browser and search for tutorials on the deep web..good luck

Do not do this.

aeoner5 - January 16, 2017, 6:10 pm

Why wouldnt he?

He would find everything what he wants if he know what is he doing

Armada - January 16, 2017, 6:57 pm

(Jan 16, 2017 07:10 PM)aeoner5 Wrote: [\[CITE\]](#) Why wouldnt he?

Yea, lets forget the fact TOR is US Navy technology, and 3/4 of the TOR nodes are run by the FBI. Seems totally safe to be searching for illegal shit.???

aeoner5 - January 17, 2017, 5:00 pm

Ur typing sh** my friend

Then why are all pablo escobars selling the drugs on deep web??

Armada - January 17, 2017, 5:08 pm

(Jan 17, 2017 06:00 PM)aeoner5 Wrote: [\[CITE\]](#) Ur typing sh** my friend

Then why are all pablo escobars selling the drugs on deep web??

Because they are retards.

How many versions of Silk roads have been busted and people arrested over the years?

SIM-2580909 - January 17, 2017, 10:00 pm

Just use incognito in Google Chrome smh, Its not operated by the FBI

TechTrash - January 18, 2017, 12:13 am

(Jan 17, 2017 11:00 PM)Brinoz Wrote: [\[CITE\]](#) Just use incognito in Google Chrome smh, Its not operated by the FBI

agreed my dud3 ?????

FearFactory - January 18, 2017, 10:25 am

(Jan 17, 2017 11:00 PM)Brinoz Wrote: [\[CITE\]](#) Just use incognito in Google Chrome smh, Its not operated by the FBIIt s funny how many times I saw people recommending TOR for annonymous searching then half of HF comes with other things lol (Can you search through DW with Chrome incognito? lol) ?

The-hunter22 - January 18, 2017, 11:23 am

(Jan 18, 2017 11:25 AM)FearFactory Wrote: [\[CITE\]](#) It s funny how many times I saw people recommending TOR for annonymous searching then half of HF comes with other things lol (Can you search through DW with Chrome incognito? lol) ?

Lol no, they are trolling lmao?

FearFactory - January 18, 2017, 11:26 am

(Jan 18, 2017 12:23 PM)The-hunter22 Wrote: [\[CITE\]](#) Lol no, they are trolling lmao?It could be

possible that Tor is not that safe for illegal activities since it has been created by US NaVy

No i mean the chrome thing he said.

Trinity - January 20, 2017, 9:27 am

Hi there FearFactory ?

First off, Dont do black hatting, it's just plain stupid and gives you prison time.

Here is my advice as i was told.

Learn hardware & networking and Understand it WELL! When i first Joined and was asking around for help, most of the advices that came my way was "Learn how to program".

Well, yes do learn how to program! But be sure to understand How hardware and networking functions first(if you wanna be a white hat and a black hat as well). I can give you this advice because thats the advice i got and the advice that i took to me(and the fact that its really good advice :P) Now im a by no means L33T HACKER, im in fact very new to hacking. And i have made many stupid posts on here(please dont look them up!) But i am trying the hardest to "UnSkid" my self and im well on my way to becomeing a Ethical hacker(also known as a whitehat). I do not do ANY sort of black hat activities, however i respect the black hatters... after all, if there where non, white hats would be out of a job :P.

We white hats learn from black hats, and visa versa, its like Jing and Jang, one cannot exist whitout the other...

Here is some sites i recommend:

Cybersecurity & Certifications<https://certification.comptia.org/home> - CompTIA Certifications
<https://www.cybrary.it> - Free cybersecurity training.

Programming(paid and free)<https://www.lynda.com> - PAID!
<https://teamtreehouse.com/> - PAID!
<https://www.codecademy.com/> - FREE!
<https://www.udacity.com/>- FREE & PAID!

Good luck on your journey, Kind regards EngLen ?

sunj35t3r - January 21, 2017, 2:42 am

To me there is no "Ethical" hacking, it seems to be more a term coined up to not scare people off. Even the white hat researchers do mischievous labs for project research. As for the question the best place to start is not with hacking, but rather your mindset. Everything can be taught, start thinking outside the box. Read books and motivate yourself, many people give up because it gets boring or tedious. It's like school you will need to continue, try books not all books only a few. Do not

try to read to many books at once stay focused. My recommendations would be the following:

Starting out with Programming Logic and Design

A specific programming language not all or you'll never really get out of the basics fast enough as you would like.

CompTIA A+,NET+,SEC+ (All basic)

Hacking: The Art of Exploitation (note: this is old and the Ubuntu distro will not work on newer hardware, a VM will require system modification to run it. The book is good for learning where to start.)

Malware Analysis Cookbook (older methods but educational)

Hacking Exposed books

At this point you should know what OS you would like to use as your primary. Read more about it. Windows, Unix(looking at you MACs) and GNU/Linux I can tell you in confidence you do not know everything about the system.

Watch some nugget videos, learn about

Solid advice. But you wrong about some of the things, I have a hard time understanding what your writeing, since it's a bit messy...

Quote:Starting out with Programming Logic and Design

what do you mean here? that he shuld start whit a programming language? well this is wrong. He wont be able to use it if he dosent understand Networking.

Other then that the rest of the post is quite solid especially the mindset part?

here's a link for OP: <https://hackforums.net/showthread.php?tid=5529101>
