Viska's Premium Bustabit Script

Hey all, today I present to you my highly anticipated private bustabit script. Within is my personal highly tweaked and modified custom script that ensures steady and safe profits. It effectively manages to dodge long red streaks. This script contains one of the most advanced algorithms which allows for the most profit with the safest bet possible including the ability to very easily comeback from any losses.

My script has been through vigorous testing and several beta phases but I truly feel that it is now capable of performing on a level that is worth purchasing.

[+] Features [+]

Stable and safe script

Anti losing streak (prevents you from losing your bits during long loss streaks)

Full refund if you don't manage to profit substantially

Personal support

Paste & Play (script is fully setup all you need to do is run it - no tricky setup)

Here is a link to my old thread where I gathered feedback and data from several script users and tweaked it accordingly (Over 1 month of testing with 40+ people)

<https://hackforums.net/showthread.php?tid=5497417>

[>> Purchase the full package today for only \\$7.99 <<](#)

Bitcoin & Credit/Debit Card Accepted

An investment of about 10k-20k bits is more than enough to get you going with this script steadily. As mentioned, this is still gambling so I would suggest constantly withdrawing profits. In the event of you losing with this script you can simply contact me with a link to your bustabit profile and I will immediately issue your refund, absolutely no questions asked.

Maybe add the stats of an account that keeps the bot running.

This is a very good idea, in fact I am now in the midst of setting up a live example account right now!

Showing a graph without posting the profile link doesn't really mean anything.

For all we know, you bet high and cashed out at 1.01x.

TSG? - January 17, 2017, 10:56 am

Keeping an eye on the account, posting to come back.

Just to let you know that this script is public. Opening a community alert to prevent him selling it.

Will update this with a link.

So wait what you are giving away a public script and you are also selling it?

You literally took a month to copy and paste. You should close this thread now.

zhyreox - January 17, 2017, 1:20 pm

Yes, this product has been proven that it's public.

zhyreox - January 17, 2017, 2:22 pm

How do I acquire a refund? Through the user or staff?

Baitable - January 17, 2017, 2:37 pm

Just saying, it has been proven all of the code is the same and certain values have been changed on the community alert thread, there are like 5 differences between the two :)

But it does do pretty good, a hefty 15k profit :o

The code may be similar to some other types but obviously? Like the code needs to be formed off a skeleton script when you modify yourself and settings ive gotten have taken a long time.

Trust me 15k profit is just a start. Been running now for 4 hours flawlessly.

zhyreox - January 18, 2017, 2:10 am

I think I have been scammed. The script is not long at all. Quite simple, just multiplies bet if you lose. Where do I open a community alert?

This is your own fault.

Check the previous posts on this thread before purchasing. It's your own fault.

"Quite simple, just multiplies bet if you lose. "

What did you expect it to do?
