Thread: [Stream free anime \(no registration\)](#)

Gresundrayars1 - January 17, 2017, 6:46 am

Hi guys ?

I looking for a place to stream free anime (without the need to register or provide any of my details). Any sites I can use?

?Dominate - January 17, 2017, 6:56 am

kissanime.ru

that's the one I personally use.

Awesome thanks ?Dominate

I've been using masterani.me and moetube.net alot recently, Both are pretty good.

Gresundrayars1 - January 17, 2017, 7:22 am

Great thanks again! It's always nice to have more than one option if one doesn't have what you looking for

I personally only use kissanime and masterani.me - so I would go with one of those.

Vouch for kissanime, best selection by far. Also has dub and sub for pretty much every anime that has the option for it

MasterAnime and MoeTube were both made by HF members. Great sites to use but limited to subs only.

KissAnime is what I recommend because it has the largest selection of both subbed and dubbed anime. Not to mention great hosting.

Though when it goes down, it goes down for a while.

And it doesn't work very well on mobile in my time with watching anime on it before crunchyroll.

<https://9anime.to/>

You can import your MAL list.

It has great hosting, good streaming speed, no advertisements, sleek look, and basically the same amount of variety and selection of anime as Crunchy Roll and Kissanime.

used to use animeplace, but it closed down

animestreams is really good, the player doesn't glitch which is nice and loads really fast for some reason, huge selection and has both sub and dub and you only have to stay on one page and it's really quick to switch from sub to dub

I use <http://masterani.me> - So far I love it.

masterani.me is unlike any other streaming site in existence, however I use moetube.net when watching with friends as it is the only anime site that lets you watch in a party.
