Thread: [Viska selling a public bustabit script for \\$7.99](#)

Fortunate - January 17, 2017, 11:34 am

User: <https://hackforums.net/member.php?action=profile&uid=2581056>

His sales thread: [>\[\\$7.99\] |>> VISKA'S PREMIUM SCRIPT <<| FULL REFUND // TESTED // ANTI-LOSS // UNIQUE](#)

Backstory:

I asked the user Viska for a vouch copy over skype for his private bustabit script he was selling for \$7.99. As soon as I received his script I noticed it was the same as the public one here:

Public script:

<http://giantmania.de/index.php?q=aHR0cDovL3Bhc3RIYmluLmNvbS91RWlyVzRYVg%3D%3D>

His script: <http://pastebin.com/raw/HzB0zYEd>

It's almost the exact same, expect Viska has changed positions of the code and has changed the multiplier from 0.14 to 0.13. Take a look yourself.

This same incident happened before when the user Fargo was selling a public script for \$4:
[\[Product\] BustaGod | The free 4\\$ script!](#)

I just wanted everyone to know that do not buy his product. You can get the same script for free.

Proof if needed ([Click to View](#))

Baitable - January 17, 2017, 11:40 am

Fargo sold a public script, now Viska is selling Fargos script, bruh
Does 8\$ really mean that much to you?

Fortunate - January 17, 2017, 11:49 am

Does 8\$ really mean that much to you?

\$8 is a lot when you get more people to buy it, but It's very sad.

Wakka - January 17, 2017, 11:51 am

It's like a miracle that this thread has nothing to do with Black Shadow ?

Spoiler ([Click to View](#))Inbefore black shadow came up with the script

Grim - January 17, 2017, 11:53 am

Thanks for the heads up man will avoid it. I think more then just he gets away with selling public

scripts sad to see people reduced to this though.

Wakka - January 17, 2017, 11:54 am

In all fairness though, at least he changed some of the code I mean that deserves a clap or two no?

Megabear - January 17, 2017, 11:54 am

MAMA TOLD ME
NOT TO SELL SCRIPTS

Nyxuo - January 17, 2017, 11:55 am

I actually got a copy of Viskas for free I forget if it was from him or from someone else here to be honest but as soon as I got it I also noticed it was exactly the same as the script you've posted. Fucked up how people will do anything for money.

A half a clap

Fortunate - January 17, 2017, 12:02 pm

(Jan 17, 2017 12:54 PM)Wakka Wrote: [\[CITE\]](#) In all fairness though, at least he changed some of the code I mean that deserves a clap or two no?
Well he just put his name in, and changed some positions, even a kid can do that. The console commands are even the same.

Viska - January 17, 2017, 12:02 pm

Script is in fact fully custom, just because source code is similar to some other script doesn't mean it's the same. I had a free version running for a month and I used that to get advice and tweak accordingly.

Prophett - January 17, 2017, 12:04 pm

Users shouldn't even purchase scripts. It's gambling! The outcome isn't guaranteed.

mvmt - January 17, 2017, 12:05 pm

Its fucking \$8, just refund him. You essentially copied it and made minor tweaks, don't be a scumbag.

Changing a few values by 0.01 doesn't give you the right to sell a public script

Pain - January 17, 2017, 12:07 pm

If you do not get a refund message me.... I will give you some money

Viska - January 17, 2017, 12:10 pm

HE NEVER PURCHASED THE SCRIPT I WAS NICE ENOUGH TO GIVE IT TO HIM AND HE DID

THIS....

(Jan 17, 2017 01:07 PM)PAIN Wrote: [\[CITE\]](#) If you do not get a refund message me.... I will give you some money

ONCE AGAIN HE DID NOT PURCHASE THE SCRIPT....

Lol this guy is literally leaking a customized script with my own settings that i spent over a month on and I was kind enough to give it to him for free. This community.

You're still a piece of shit for thinking you can sell this considering the very little changes you've done.

Nyxuo - January 17, 2017, 12:32 pm

This kids so salty he got outed. Serves you right buddy. Kids on HF think it's ok to just steal other peoples shit and make money off it. I hope you get sat on by an elephant kid.

Fortunate - January 17, 2017, 1:01 pm

Changing 0.14 to 0.13 and putting a the variations under the skips is making it fully custom? Pathetic.

(Jan 17, 2017 01:05 PM)Fade? Wrote: [\[CITE\]](#) Its fucking \$8, just refund him. You essentially copied it and made minor tweaks, don't be a scumbag.

I received a vouch copy and I didn't buy it.

You took a month to copy and paste?

RBH - January 17, 2017, 1:08 pm

Lol this guy is literally leaking a customized script with my own settings that i spent over a month on and I was kind enough to give it to him for free. This community. The only thing you customized is the cashout rate and the cashout multiplier.

Two variables.

Fortunate - January 17, 2017, 1:09 pm

(Jan 17, 2017 02:08 PM)RBH Wrote: [\[CITE\]](#) The only thing you customized is the cashout rate and the cashout multiplier.

Two variables.

Like the thing is that he didn't even really customize it at all. He just moved it.

Egregious Jr. - January 17, 2017, 1:38 pm

Wow, nice find. Shame people are low enough to scam for \$8.

Patzan - January 17, 2017, 1:40 pm

So sad kids are actually doing those stuff and even trying to hide the facts.

The exact thing happened me Turbot.

Emoticon - January 17, 2017, 1:52 pm

Why does viska love caps lock so much?

Also, if people aren't able to do research before purchasing something, while it's still a dickbag move to sell things that are already publicly available, the buyer sort of deserves whatever happens. Then again, the same can be said about many scam reports on HackForums.

Edit: This link shows the difference between the two scripts. Left is original, right is viska's. Very minor modification, nothing significant whatsoever. What a loser.

(Jan 17, 2017 01:10 PM)Viska Wrote: [\[CITE\]](#) Lol this guy is literally leaking a customized script with my own settings that i spent over a month on and I was kind enough to give it to him for free. This community.

It took you a month to change 4 values?

```
Code var baseBet = Math.round(35/0.12);  
var bet = baseBet * 35;  
var cashOut = 1.12;
```

```
cashOut = (losses / currentBet) + 1.13;
```

Two of those four values were changed by .02 or less, I might add. The others are still quite an insignificant change. Other than comments and line numbers (btw great job botching that... wtf), those are the only changes.

Baitable - *January 17, 2017, 2:31 pm*

Viska you are fucking retarded, check out Fargos public script, same exact code as yours with minor changes, stop tryna save up gambling money..
