Thread: [With League Sharp Shutting Down...](#)

Wompus - January 19, 2017, 12:10 am

With League# shutting down I believe it is time I need to search elsewhere for my LoL scripts that still has around the same quality.

So if anyone here knows any HQ undetected scripts please list them below, I am also willing to buy a subscription if they are paid.

Or you try not to be a scrub and try playing legit.

Why do you need to script in a easy as fuck game? Are you like literally garbage? Rofl, hope your accounts all get perm-banned for scripting.

Bruh just stop scripting. They'll probs crack down on the other big ones now too. This is a sign to learn to play.

As others say, stop scripting. However, try Bot of Legends if you are really that reliant on scripts.

I don't rely on scripts to play, I just enjoy using them.

I got my main account to Plat 2 without scripting, just fun doing other things that way.

Its not fun to play against script - which is not an actual human being but just a person sitting on comp doing nothin and winning. That sounds pretty retarded right? Its cuz it is.

League is about having fun, developing skills and techniques. Scripting ruins the game. Give it up

r4z - January 19, 2017, 8:36 pm

Like ... if u had cheats to see through fog clean minimap and stuff like that i would get it.. But scripts for things u do fine on ur own is just sad.. why even play.

Mr Whiskey - January 19, 2017, 8:53 pm

There really just isn't any point in scripting League. Cheating in League doesn't have the same fun-factor it would have in CS:GO or something. It's like botting in Runescape except there are no long-term benefits. Why bother watching a robot play the game for you?

Mafius - January 19, 2017, 8:54 pm

ITT: nobody responding to what OP asked for.

I agree with the others, Scripting completely ruins league.

BUT if you do find some good scripts, please dm me, because a close friend of mine is looking for some too. I don't really support it

Yeah, pretty much. At least in CS:GO I understand how it's fun to just instakill everyone; in League I just don't see the point in having it play for you a little bit better than you can play it normally.

Bot of Legends

EloBuddy

Gaming on Steroids (External is supposed to be UD, Internal is cheaper)

League++ by Aimjunkies
