Thread: [Why does my sig not show up in threads?](#)

fall3n_ - January 19, 2017, 2:07 pm

Hey support,

I've tryed to use my sig with .png, .gif and .jpg but the pic wont show up in threads.

I can see it in my profile tab and in previews of threads...

Could you fix it? or at least tell me whats wrong?

It only shows '[img(])<https://i.imgur.com/WgS1oBf.jpg>[/img]' (dont mind the ())

Thank you for your time!

Best regards

You have to use HTTPS and not HTTP.
