I actually really enjoyed listening to this.

Would add it to my spotify playlist if it came across.

Keep up the work!

Appreciate the comment mate!

Put a lot of effort in this one.

Don't think it would be coming out on spotify sadly, since its copyrighted etc.

You really didn't do much at all other than throw some shitty dubstep effects on top of it. I think the original song sounds better than this OP.

Lol what?

Everything you hear except the vocals are completely self made, i could show you the project etc.

Also dubstep?

Its future bass.

Stop trolling please.

Giving criticism is good but yours doesn't make any sense. Make a better version yourself if you can.
