Thread: [\[L33t/Ub3r\] How I wrote dozens of papers: Bypass Plagiarism Engines](#)

Anubis - January 20, 2017, 5:13 pm

Hello everyone,

I just wrote this little method on bypassing the online plagiarism engines like Ephorus and TurnItIn. Method is explained in detail so the reader could understand how the method works and have a better insight into it.

I am not sure something like this had already been posted.

Anyway, this is the method I used to write many papers and case studies when I don't have much time and still got decent grades.

I've tested this only on Ephorus but I think TurnItIn is about the same thing.

You are not allowed to share this method with anyone without my consent.

You are not allowed to re-sell this method on HF or other places.

You are the only one responsible for what you do and how you use this method!

I'll take it, but can you confirm it works on turnitin - as that is all i use :)

Read what it says on the website.

<https://www.ephorus.com>

Ephorus and Turnitin are joining forces.

Although I have not tested this on TurnItIn I am pretty much convinced that they work in same manner, just like any other checker.

If you would still like to check it out hit me a PM.

Pretty good method. As OP states this is a last ditch effort, Plagerism is a serious charge at American universities, at best case you will get a zero on the assignment, and worst case you end up expelled. However this method really will work, at least for now!

Glad you like it.

Just as you've said. Last ditch effort.

If you have time to write your paper, write it.

This is only to be used in extreme situations!

I've sent you a PM everyone. Be careful how you use this.

e?erg1zer - January 21, 2017, 2:59 pm

While I don't plan on using it personally, it looks good, I'm surprised this works--it's so simple!

Thank you for replying. Glad you like it.

Yes it's quite simple. Worked for me every time.

Although I don't use this very often, only in extreme situations.

Honestly, it really is. I'll definitely be using it on my next essay. Cheers OP! ?

KillaBoi - January 22, 2017, 1:53 am

Awesome method, vouch for OZp

Anubis - January 22, 2017, 3:01 am

I've got many PM's and replied to them, so I am once again warning you about the consequences this may bring you if you get caught.

Plagiarism is considered as a serious offense and could get you 0 on the paper in the best case or get you expelled.

You need to be smart when utilizing this method. I can give you some tips on "how to be smart too" if you are unsure on what are you doing.

amg64 - January 22, 2017, 3:01 am

And yes, just like this guy says, only use it when you're about to be fucked up and when this could be your last hope.

Plagiarism is considered a very serious offense in many Universities.

Egregious - January 26, 2017, 1:44 pm

At first, I thought this method involved creating each PDF page as an image instead of using text, but this is actually another method that could be discreet if used correctly. Thanks for the share.

Nahhh mate. That metod is useless if you ask me ?

This is way more effective and legit.

Thanks for replying,

EDIT: I got 90 out of 100 yesterday :D Was really worried because the status was "to be graded" for 2 weeks lol. And submitted another paper today. I will let you know the results.
