Thread: [How to make a redirect only for people outside your city?](#)

Account of the Gods - January 21, 2017, 11:52 am

I wanna post some nasty pictures on facebook that will get reported and deleted.

Thats why I plan to put not images but link to my site that would show these images only to people from my city, and not to Facebook Moderators, that live else in other country or in country capital.

How do i do this shit? Anyone experienced??

Mr. Robot - January 21, 2017, 11:54 am

<https://geolify.com/using-geo-targeting-to-block-visitors-by-ip-address-location/>

Just remember the picture you post will be shown through facebook as it's the visitor

Quote:You can then choose to redirect a whole country or a particular state or city in the country. Just type in these details and then save the 'Geo Redirect' service.

Easy

I can give you the code tomorrow. It'll automatically detect their location and redirect them to a site of your choosing ?

It's just a few lines of code. Very easy

r1nk0 - January 24, 2017, 5:29 pm

I think what he exactly wants is cloaking... if im not wrong ?

You want facebook to see legit stuff and send users to your offer ?

Squito - January 24, 2017, 11:58 pm

Just so you know the geolocation by IP is not 100% reliable, especially when the visitor has NATed IP.
