Thread: [Unlimited Free Uber Rides | Uber Bypass \[\\$100+ in Rides / Day\]](#)

24K. - January 22, 2017, 4:30 am

Verified Working: September 10, 2017

This is a method on how you can get unlimited free rides through the Uber app for Android/iPhone. I've used this method well over 20 times with no problems whatsoever. This shouldn't really be too difficult for anybody to figure out, but I haven't seen the method around anywhere so I figured I'd share.

Don't be a leech, leave a thank you to keep the community aware. Feel free to PM me with any questions. This has been tested working in the U.S. and the UK.

1. Sign up for a new Uber account with an iPhone/iPad/Android that has never been used to register an uber account. (It helps to have multiple devices to do this with) Uber saves the MEID of your phone when you register, so if you have a rooted android you can reset and reuse the same device. Otherwise you'll have to use a new device or an iPhone/Android emulator such as BlueStacks from your PC or VM each time you want a ride.
2. Open the menu in Uber once you're signed up and go to "Promotion Codes" and enter: `uberlrideforfree` (It will give you your first ride free "up to \$20")
3. When asked for your card either use a vcc your own sources, a prepaid debit card (vanilla visa, etc.) with at least \$5, or a personal bank card (since you wont get charged.) You can re-use the same card number a couple times before they decline it usually.
4. When asked for a phone number you can:
 - Use Pinger.com to get a temporary number
 - Download the TextNow app on your phone
 - Download BlueStacks android emulator for your PC/VMand of course you can just use an actual number. You will need a new one each time.
5. You can use a temporary email from tempmail, guerillamail, etc. This is the easiest part.
6. Rinse and repeat. Make sure the fare is under \$20 before taking the ride to avoid the risk of being charged if you use your card.

Make sure you don't use the same driver more than once because they will probably catch on that you're using different names. They still get paid, but I wouldn't risk it. It will tell you who is coming to pick you up when you request a ride so it's not difficult.

Just as a side-note, they will take you through a drive-thru. Pretty nice when those edibles you ate just kicked in.

Don't forget to vouch if his helped you out. Have fun on your travels.

Does this work for the UK too?

To be completely honest I'm not entirely sure. I would assume the system would be the same internationally but I could very well be wrong.

Hydraxus - January 22, 2017, 6:45 am

Could I get this? Thanks OP. Really need this because I don't have a car. Walking everywhere is fairly annoying.

TheBlueOwl - January 22, 2017, 6:48 am

Could I get this please? This would be really helpful to me

Gentlema?n - January 22, 2017, 8:47 am

Will test it out, thank you.

FROst - January 22, 2017, 8:57 am

If this works this is awesome could I get this please and thanks.

Wires - January 22, 2017, 9:23 am

Does actually work. Hardest bit is probably obtaining a VCC if you don't want to use your own card.

rrdein - January 22, 2017, 12:16 pm

May I please check this one out?

Wings of Redemption - January 22, 2017, 12:20 pm

wait dont i have to "post here or pm" you to get the method? I dont!?

thanks for actually showing the method in your thread

Also, you can have an uber/lyft account on your legit phone you can just use that code instead so your legit account also gets a bonus

Sure does work!

I have been personally using this method for quite sometime. All you need to get is promocode, IG is your best friend for that.

?

XmysteriousX - January 22, 2017, 4:39 pm

i would like to have this please thanks

Bobby Trill - January 22, 2017, 10:08 pm

thank you for the guide !

Evanescence - January 23, 2017, 3:21 am

Very good method. Thanks for the MEID tip.

Excalibur - January 23, 2017, 5:25 am

Hey, everything is great but i need some help verifying my phone number, i dont wanna use actual numbers since i used them all but what do i do?

Good to know, thanks for the information. I updated the thread to include the UK as well.

4Chan-/b/rother - January 27, 2017, 9:55 am

The method sounds like it should work. How do you go about changing your MEID on bluestacks?

N?co - February 4, 2017, 3:19 pm

The code "chaseuber" allows you to receive up to \$30 on your first order.

Use that one for maximum scheme status.

The value of code isn't constant and is dependant on user account location + account itself.

I am just guess that , that this can be your referral ?

It's not my referral code (lol?), it's a referral code provided to new users from Chase. It's always been \$30 off for me and everyone that I've known that's used it in the mid west. I actually just used it through ubereats today and it worked perfectly fine. Check below.

Ok, this would work for 30\$ only for members from Chase.

Whiz4rd - February 5, 2017, 4:01 pm

I'm from the Philippines and yes, this works but different method though. I remember the time about one/two years ago when they didn't seem to register your Device ID, I was able to create about more than 5 accounts under one phone, lol.

Anyways, thanks for sharing this ?

thanks a lot OP!!

very nice tutorial if this actually works where i live this would be insane

Excalibur' - March 26, 2017, 9:41 am

I don't think it works anymore since Uber only uses gmail and facebook as login!

u dont have to use gmail or facebook :P ?

Mustys - March 27, 2017, 9:57 am

You can always register new account, add your card make sure it got 0\$, then call and block it get a new one and G_g re-do.

I usually do this when I party and take the ride home, then I get a new card next week.

I have 2 banks so one of them are only for free rides, then you are - but just do a new account with new number etc..

Sick Info - March 27, 2017, 11:07 am

Thanks OP. Going to try this out today!

armcuts - March 28, 2017, 8:03 am

Can confirm this method does work, used this yesterday and using this once again tonight.

G*59 - March 28, 2017, 12:33 pm

Thanks for posting, I'll see if this works.

CloUd - March 28, 2017, 11:58 pm

be careful doing this method on your main phone or device. The device will get IMEI banned. Make sure to this method on a phone or device that you dont use your main uber on

Not unless you have some method of changing your MEID / IMEI, which is unlikely.

The only hard part is verifying the phone number. Uber doesn't accept VOIP, Google Voice, or anything now...
