Thread: [Need LOGO and Title for something big](#)

**FunctionDev** - January 22, 2017, 3:41 pm

So I need a logo and a title that looks something like this, but a lot more professional.

DESIGN: An AK47 on the bottom, two grenades on each side, and an m9 bayonet on the top. Needs to look professional as this is very important for my business. No, this is not for a game or anything like that. This is for real life emails.

Need it to be all black and white and the text needs to be a black outline of the letters!

Heres a picture of what I need. Really shittily drawn, but fuck it.

<https://gyazo.com/b6b614aa8aea8b0fe72c489e503c582a>

If anyone could do this for me i'd be more than grateful!

Its super important to me.

do you want it like a banner? or a standard image? Dimensions?

Here is what I made I can up date/change anything or what not(Sorry cant post links... i'm new around here....)

"Needs to look professional"

Erm sir, just as a heads up..this is the free graphics section so don't expect TOO much.

If this was for your business, you should definitely invest in hiring a designer from the market.

Needs to be like a tiny logo that goes on the top of emails addressing what company its from, etc. Pls if you could, make it look a LITTLE better? the cutting job on the knife is trash :P

Was thinking that too, but wanted to see what people could do for free to help me out. If needbe, i'll have to resort to paying someone.

Not exactly what you wanted. But I can provide SVG so you can scale it to whatever.

shhhh they don't need to know that, if you don't look to close, it looks fine, sure a little bland... but ya... if you were paying people would spend a lot more time...

Looks pretty good, but do you think you can make the letters with a black outline and white in the middle? Thats all I'd need, and ya send me the svg too :)

FunctionDev - January 25, 2017, 5:49 am

REALLY STILL NEED THIS PLEASE! Pressed for time and don't have the money!

Nos. - January 25, 2017, 5:50 am

PM what the company is about and if I'm interested I'll do it

PSD isn't in black and white. Once you turn it to black and white it'll all be merged together
