Thread: [Keyboard doesn't work without Razer Synapse open.](#)

TRAUMA - January 22, 2017, 4:37 pm

PREVIOUS ISSUE FIXED.

Now my issue is that I HAVE to have Razer Synapse open for my keyboard to work..
Any idea how to do this?

I can't get onto my main PC account because its password protected and when I sign out of guest account synapse closes..

Therefore disabling my Keyboard.

Mr Fox - January 22, 2017, 4:37 pm

uninstall the razor drivers and reinstall

Nvidia?

Reinstall drivers with DDU.

Some of these errors can happen with nvidia drivers crashes displaying others, worth a test.

"dpc_watchdog_violation"

This is Aiden Pierce's malware signature... Wipe your entire hard drive. Immediately.

Spoiler [\(Click to View\)](#)(just kiddin, sorry but i don't know these error codes) ?

Do you use a program to update your drivers automatically?

Nope, I don't..

Thanks for the help by the way

Have you tried what I wrote...

TRAUMA - January 22, 2017, 6:36 pm

Fixed, but there's a new issue.
