Thread: [PostgreSQL problem](#)

sernic8901 - January 23, 2017, 4:57 am

Hi guys,

Installing metasploit and also other stuff that require the use of postgresql always tells me that there is an error with various packages, all of PostgreSQL, after also will add the logs, although is still very vague.

log:

Code Configuring postgresql-common (173) ...

/usr/share/postgresql-common/supported-versions: 3: /etc/os-release: OS: not found

dpkg: error processing postgresql-common package (--configure):

subprocess installed post-installation script returned error exit status 127

dpkg: dependency problems prevent configuration of postgresql-9.5:

postgresql-9.5 depends on postgresql-common (>= 142 ~); anyway:

The postgresql-common package is not configured yet.

dpkg: error processing postgresql-9.5 package (--configure):

dependency problems - leaving unconfigured

dpkg: dependency problems prevent configuration of postgresql:

postgresql depends on postgresql-9.5; anyway:

The postgresql-9.5 package is not configured yet.

dpkg: error processing postgresql package (--configure):

dependency problems - leaving unconfigured

dpkg: dependency problems prevent configuration of postgresql-contrib-9.5:

postgresql-contrib-9.5 depends on postgresql-9.5 (= 9.5.5-0ubuntu0.16.04); anyway:

The postgresql-9.5 package is not configured yet.

dpkg: error processing postgresql-contrib-9.5 package (--configure):
